		disclosure received by any of the agencies the victim is to be referred back to the MARAC as a 'repeat'. This measure is a count of repeat referrals to MARAC expressed as a percentage of the total MARAC referrals on a rolling 12 month basis. Although this measure is used as a proxy for repeat victims of domestic abuse, it does not provide a full or accurate picture of repeat victimisation. MARAC covers high risk domestic abuse victims who account for less than 8% of all reported incidents of domestic abuse. This disproportion means that there are likely higher numbers of repeat victims than can be detected in the MARAC data.

The BOSS will have an impact on 2016/17 and 2017/18 academic years, which will be reported in 2017/18 and 2018/19. Reduce the risk of flooding	<b>73. Flooding incidents within a property</b> This measure is calculated on the basis of the number of formal investigations undertaken by the County Council under section 19 of the Flood and Water Management Act 2010 where the incident involves flooding within a property from any source, although under the Act the County Council only has a responsibility for local flood risk i.e. from surface water, groundwater or ordinary watercourses.
