

Proposed changes to reporting performance against the Council Business Plan 2016/17

Increase public confidence in how we tackle domestic abuse

The relevant Executive Councillor has been consulted and recommends that:-

- The 'Domestic Abuse reoffending' measure is removed from the Council Business Plan as the Domestic Abuse Perpetrator Programme (which this measure was originally based on) has not been established in the format it was originally intended. Therefore the service is unable to report against this measure. (Measure 10)
- Repeat victims of domestic abuse is renamed Repeat referrals of Domestic Abuse to MARAC (Multi-Agency Risk Assessment Conference) as this better reflects what is being measured and reported. The definition of the measure would remain the same, only the title of the measure would change. (Measure 9)

Alcohol treatment

In light of recent changes to the national Public Health Outcome Framework (PHOF) the relevant Portfolio Holder has been consulted and recommends that the wording and definition of the 'People referred for alcohol treatment completing treatment in a planned way' (measure 31) is amended. This is because the PHOF now includes, for the first time, an indicator relating to "Percentage of alcohol users that left drug treatment successfully who do not re-present to treatment within 6 months". In line with other council business plan indicators (such as NHS Health Checks and Chlamydia rates) this recommended change would align to the wording and definition of the PHOF indicator. A target of 40% is proposed for this revised measure.
