Reduce the number of people killed and seriously injured on Lincolnshire's roads

People killed and seriously injured in road traffic collisions

Data is reported by calendar year, with 3 month (1 quarter) lag. Revisions in previously reported data can sometimes occur when the reported severity of an injury can increase or decrease (For example an injury may worsen over time or an unreported injury is later found). Subsequent quarter cumulative totals may include revised figures from previous quarters.

People killed and seriously injured in road traffic collisions

About the latest performance

Following the lowest number of killed or seriously injured (KSI) casualties on record in 2015, we have seen an increase in 2016. Analysis of collision and casualty data does not indicate any clear commonality or patterns and the overall increase in KSI's is mirrored across most user groups. However Lincolnshire Road Safety Partnership (LRSP) are prioritising under 125cc motorcycle riders and pedestrian collisions as emerging trends and over 125cc motorcycle riders as an established high risk group.

Further details

About the target

It is not appropriate to set a target for this measure however the Lincolnshire Road Safety Partnership want to see a 20% reduction over 10 years from the 2010/2012 annual average.

About the target range

A target range is not applicable as this is a contextual measure.

About benchmarking

The Department for Transport publish data which allow comparisons to be made with other Councils. Comparison has been made against the CIPFA group of local authorities. The Chartered Institute of Public Finance and Accountancy (CIPFA) facilitates a benchmarking services to enable Local Authority performance to be monitored against other similar local authorities. We benchmark against other Local Authorities within our CIPFA Group of 16 authorities.
