Actions Required:

To consider the information in the 2017-18 Annual Report of Lincolnshire West Clinical Commissioning Group

1. Background

Introduction

Each clinical commissioning group has a statutory duty to produce an annual report and accounts. The annual report and accounts are a means in which CCGs set out their main activities of the previous year. The accounts and financial statements aim to demonstrate a CCG's stewardship of its share of the NHS budget.

The form and content of all CCG annual reports and accounts are directed by NHS England and in addition they have to meet requirements set by the Department of Health. As a result of these requirements, annual reports follow a standard pattern.

An annual report and accounts typically include:

- an annual report section, including the CCG's performance, for example in reducing health inequalities;
- a governance statement;
- a statement of the accountable officer's responsibilities; and
- financial statements, including a report and opinion from an independent auditor.

It is the responsibility of each CCG's accountable officer to prepare the annual report and accounts. When annual reports and accounts are approved, the governing body must confirm that they are satisfied they present the CCG's year in an appropriate, comprehensive, balanced and coherent way.
