# Report of the Pensions Committee

## Introduction

The Pensions Committee of Lincolnshire County Council is responsible for the management of the Pension Fund, covering administration, investments and governance. It approves the investment policy of the Fund and monitors its implementation during the year. The Committee generally meets eight times a year, including two manager presentation meetings and two training meetings. Special meetings are convened if considered necessary.

Members of the Committee as at 31 March 2019 are listed on page 1.

All members of the Committee can exercise voting rights.

## Corporate Governance and Responsible Investing

The Fund expects its appointed investment managers to act as responsible investors and that they fully integrate environmental, social and governance (ESG) issues into their investment process. It has produced a Responsible Investment Policy that can be found on the Pension Fund's shared website, at [www.wypf.org.uk](http://www.wypf.org.uk). To assist the Fund in being a responsible investor, it is a member of the Local Authority Pension Fund Forum (LAPFF), an organisation that monitors the governance of companies. The LAPFF seeks to protect and enhance shareholder returns by engaging with companies on a wide range of ESG issues. The Fund has produced a Tier 1 Stewardship Code Statement, in accordance with the Financial Reporting Council's Stewardship Code, to explain how it acts as a responsible shareholder. This can also be found on the Fund's shared website.

## Investment Performance

The Fund has an investment objective to meet its liabilities over the long term and to produce a return of 0.75% p.a. over the return produced by the strategic asset allocation benchmark.

The twelve month period ended 31 March 2019 saw the value of the Fund increase by £171.8m to £2,361.2m. The overall investment return of 8.2% was ahead the Fund's specific benchmark return of 8.1%. Over the last ten years, the Fund's annualised investment performance of 9.9% is slightly behind the benchmark return of 10.5%.

Detail on the global markets over the year can be found in the Investment Background, on page 34.

## Manager Arrangements

No manager changes or new investments were made during the year.

## Pensions Administration

The shared service arrangement with West Yorkshire Pension Fund (WYPF) to provide Pensions Administration services for the Lincolnshire Fund is now four years old. A satellite office for WYPF is based in Lincoln, co-located with the LCC Pension Fund team. This arrangement was made to improve efficiency and reduce costs in the provision of the Pensions Administration service, and this is now being seen. The move from an annual data return to a monthly process has considerably improved the quality of data held in the administration system, enabling a better service to be provided to scheme members. WYPF continues to work with the Lincolnshire Fund and its employers to improve all aspects of administering the scheme.

The initial period for the shared service was five years, from April 2015, with two additional two year extensions available. At its March 2019 meeting, the Pensions Committee approved the first two year extension to the shared service, taking the agreement to 31 March 2022. The final extension will be considered in March 2021, to allow time for any retender of the service, if required.

## Local Pension Board

It is now four years since the introduction of the requirement for a Local Pension Board for the Lincolnshire Pension Fund, as prescribed in the Public Service Pensions Act 2013 and the Local Government Regulations 2013. Its oversight role to ensure that the Fund is meeting all the requirements for administration and governance, as set out in the various regulations and by the Pensions Regulator, has been a welcome addition to the governance structure of the Pension Fund. The annual report of the Board can be found on page 27.

## Asset Pooling

The requirement to pool the Fund's assets with other LGPS Funds came into statute in November 2016. Lincolnshire chose to become part of the Border to Coast Pensions Partnership (Border to Coast), alongside eleven other partner LGPS funds. Much progress has been made in creating Border to Coast as the pooling vehicle to implement the investment strategy of the twelve partner funds. The result is a £45bn+ asset pool, governed by a Local Government Joint Committee and Administering Authority shareholders. The outcome should reduce investment costs, improve performance and increase resilience across the Funds, over the long term. Border to Coast went live in July 2018, with assets from three of the partner funds with internally managed assets. Work continues with Border to Coast in creating the sub-fund range that will be available to the Fund. The expectation is that the first assets from Lincolnshire will be transitioned to Border to Coast in summer 2019.

## Fund Governance and Communication Statements and the Investment Strategy Statement

The Fund's investments are managed in accordance with the Investment Strategy Statement (ISS).

The Fund's ISS, Governance Compliance Statement, Communications Policy and Funding Strategy statements are all attached at the end of this report. These documents, and other related publications, can also be downloaded from the Pension Fund's shared website, at [www.wypf.org.uk](http://www.wypf.org.uk).

Hard copies of any of these statements may be obtained from:

# Management Report of the Administering Authority

The Local Government Pension Scheme (LGPS) is a national scheme administered on a local basis by Lincolnshire County Council, providing current and future benefits for nearly 73,000 scheme members.

## Local Government Pension Scheme Membership

As can be seen from the chart below, the active membership has dropped, much of which is due to data cleansing activity undertaken with employers. The Fund has matured over the last five years, with pensioner and deferred members (those that are no longer in the Scheme but will be entitled to a pension at some point in the future) making up 68.6% of the overall membership.

Year ended 31 March	2015	2016	2017	2018	2019
Contributors	21,262	25,451	24,893	26,153	22,820
Pensioners	17,264	18,281	19,916	20,543	21,715
Deferred Beneficiaries	27,577	27,618	28,182	27,356	28,221
<b>Total</b>	<b>66,103</b>	<b>71,350</b>	<b>72,991</b>	<b>74,052</b>	<b>72,756</b>

(Note: The numbers disclosed in the table above reflect individual pension records within the County Council's database. Current and past members of the LGPS may have more than one pension record as a result, for example, of having more than one part time contract of employment with a Scheme employer.)

## Investment Policy

The Fund is managed with regard to a strategic asset allocation benchmark. This is reviewed at least every three years, alongside the Fund's triennial valuation. The strategic asset allocation is set to provide the required return, over the long term, to ensure that all pension payments can be met. The actual asset allocation may differ from the strategic benchmark within tolerances that are agreed by the Pensions Committee. The distribution of investments is reported to the Pensions Committee monthly and quarterly.

## Strategic Asset Allocation Benchmark

Asset class	Strategic Benchmark 31 March 2019 %	Actual Allocation 31 March 2019 %
UK Equities	20.0	18.2
Global Equities	40.0	44.3
<b>Total Equities</b>	<b>60.0</b>	<b>62.5</b>
Property	9.0	8.6
Infrastructure	2.5	1.9
Alternatives (incl. Private Equity)	15.0	14.0
Fixed Interest	13.5	12.0
Cash (incl. net current assets)	0.0	1.0
<b>Total</b>	<b>100.0</b>	<b>100.0</b>

## Total Actual Asset Distribution

The distribution of the assets is shown in the table and pie chart below.

Asset Class	Market Value £'m	31/3/19 %	31/3/18 %
Fixed Interest	283.2	12.0	12.1

## Fund Investment Performance

The twelve month period ended 31 March 2019 saw the value of the Fund increase by £171.8m to £2,361.2m. The overall investment return of 8.2% was ahead the Fund's specific benchmark return of 8.1%. Over the last ten years, the Fund's annualised investment performance of 9.9% is slightly behind the benchmark return of 10.5%.

Annual investment performance over the previous ten years is set out in the table below. The Fund's annual return of 8.2% compares to a rise in retail prices of 2.4% and an increase in public sector earnings of 2.7%.

### Investment Performance of the Fund | April 2009 to 31 March 2019

	Lincolnshire Fund Return	Comparative Benchmark Return	Retail Price Inflation	Public Sector Increase in earnings
	%	%	%	%
2009/10	29.7	36.7	4.4	4.0
2010/11	7.9	7.8	5.3	2.2
2011/12	1.5	2.4	3.6	1.8
2012/13	12.6	11.3	3.3	1.1
2013/14	6.3	6.2	2.5	1.1
2014/15	12.3	12.4	0.9	(0.9)
2015/16	1.0	1.8	1.6	1.9
2016/17	19.8	19.3	3.1	1.3
2017/18	3.3	3.0	3.3	2.6
2018/19	8.2	8.1	2.4	2.7
<b>10 years annualised</b>	<b>9.9</b>	<b>10.5</b>	<b>3.0</b>	<b>1.8</b>

## Manager/Asset Class Performance of the Fund

Asset Class	1 Year		3 Years**		5 Years**	
	FM	BM	FM	BM	FM	BM

\*\* Performance annualised.

## Top Holdings

Listed below are the top twenty holdings in the Pension Fund, including pooled investments, as at 31 March 2019. These account for £1,493.7m and make up 63.2% of the Fund's investments.

	Market Value £m's	Proportion of Fund %
Legal & General UK Equity Index Fund	418.7	17.7
Morgan Stanley Alternatives	285.0	12.1
Morgan Stanley Global Brands Fund	207.3	8.8
Blackrock Aquila Life < 5 year Corporate Bonds Fund	138.0	5.8
Blackrock Aquila Life Corporate Bond Fund	71.2	3.0
Aberdeen Standard Property Fund	63.8	2.7
Aviva Property Fund	48.5	2.1
Blackrock Property Fund	42.1	1.8
Blackrock Aquila Life > 5 Year ILG Fund	39.7	1.7
Blackrock Aquila Gilts Fund	27.8	1.2
Royal London Asset Management Property Fund	24.2	1.0
Microsoft	20.8	0.9
Amazon	17.0	0.7
Innisfree Secondary Fund	16.8	0.7
Alphabet	15.3	0.6
JPMorgan Chase	13.6	0.6
Apple	12.4	0.5
Standard Life European Property Growth Fund	12.1	0.5
Visa	10.3	0.4
Bank of America	9.1	0.4
<b>Total</b>	<b>1,493.7</b>	<b>63.2</b>

## Investment Management Arrangements

The arrangements for segregated management of the Fund's assets are set out below. Portfolio values include cash at 31 March.

## Segregated Investment Management Mandates

Asset Class	Manager	Market value £m's	% of the Fund
Global Equities - (Ex UK)	Invesco	542.3	22.9
Global Equities	Schroders	135.7	5.7
Global Equities	Columbia Threadneedle	148.8	6.1
<b>Total Segregated Equities</b>		<b>826.8</b>	<b>34.7</b>

The Fund also invests in a number of asset classes by means of collective investment vehicles, also known as pooled funds. Pooled fund values exclude cash held at an asset class level with the custodian.

## Pooled Funds

Asset Class	Manager	Market value £m's	% of the Fund
Property	Franklin Templeton	2.6	0.1
	Igloo	1.0	0.0
	Aviva	48.5	2.1
	Royal London	24.2	1.0
	Rreef	0.5	0.0
	Blackrock	42.1	1.8
	Aberdeen Standard	76.0	3.2
	<b>Total Property</b>	<b>194.9</b>	<b>8.2</b>
Infrastructure	Innisfree	32.8	1.4
	Infracapital	7.7	0.3
	Pantheon	4.0	0.2
	<b>Total Infrastructure</b>	<b>44.5</b>	<b>1.9</b>
Private Equity	Capital Dynamics	4.9	0.2
	Pantheon	13.3	0.6
	Aberdeen Standard	4.8	0.2
	<b>Total Private Equity</b>	<b>23.0</b>	<b>1.0</b>
Alternatives	Morgan Stanley	290.1	12.3
UK Equities	Legal and General	429.8	18.2
Global Equities	Morgan Stanley	219.7	9.3
Fixed Interest	Blackrock	283.2	12.0
<b>Total Pooled Vehicles</b>		<b>1,485.2</b>	<b>62.9</b>

## Investment Administration and Custody

The Fund's segregated managers are responsible for the administration of the assets held within their mandates, and the Council's officers are responsible for the administration of the pooled fund investments.

The Fund's custodian at 31 March 2019 was JPMorgan, with responsibility for safeguarding the segregated assets, in addition to providing investment accounting and performance measurement services. This contract was terminated on 1 April 2019 when, following a tender process, Northern Trust was appointed to provide the same services for an initial five year contract period.

## Funding

The Lincolnshire Pension Fund's latest triennial valuation was as at 31 March 2016. The results from this are published on the Fund's shared website.

The table below summarises the latest triennial valuation's financial position in respect of benefits earned by members up to this date, compared with the previous valuation.

	31 March 2013	31 March 2016
Past Service Liabilities	£2,092m	£2,288m
Market Value of Assets	£1,495m	£1,759m
Surplus/(Deficit)	(£597m)	(£529m)
Funding Level	71.5%	76.9%

The funding level of the Fund is monitored each quarter on a roll forward basis, and this is reported to the Pensions Committee.

## Stewardship Responsibilities

As a responsible shareholder, the Lincolnshire Pension Fund has produced a Tier I Stewardship Code statement, in compliance with the Financial Reporting Council's Stewardship Code. It encourages its external managers and service providers to produce their own codes, and to report their engagement and stewardship activity to the Fund.

The Pensions Committee agree that the adoption of good practice in Corporate Governance will improve the management of companies and thereby increase long term shareholder value. The Fund's Responsible Investment policy and Corporate Governance and Voting policy can be found on the shared website at [www.wypf.org.uk](http://www.wypf.org.uk). These policies are aligned with those of Border to Coast, who will be responsible for implementing them once assets are transferred.

The Fund requests that its segregated managers vote on all direct company holdings, wherever possible. Prior to December 2018, votes were filed via a third party agent, Manifest Voting Agency, in accordance with a template agreed by the Pensions Committee. This contract terminated in November 2018 ahead of the transitions from segregated managers to the pooled investments that will be managed by Border to Coast. The votes cast by managers are reported to the Pensions Committee on a quarterly basis, and this information is available on the Lincolnshire County Council website in the relevant Committee documents.

The Fund is also a member of the Local Authority Pension Fund Forum (LAPFF), which is a voluntary organisation of 79 public sector Pension Funds based in the UK. LAPFF exists to promote the investment interests of Local Authority Pension Funds, and to maximise their influence as shareholders in promoting corporate social responsibility and high standards of corporate governance in the companies in which they invest. Further information on the work of the LAPFF can be found at [www.lapfforum.org](http://www.lapfforum.org). LAPFF engages with companies across a wide range of issues that can broadly be grouped into five engagement themes:

- Environmental and carbon risk;
- Social risk;

- Governance risk;
- Reliable accounts; and
- LGPS and Stewardship.

## Risk Management

Risk management is an integral element of managing the Pension Fund. The Pension Fund has a risk register which identifies the major risks associated with managing the Fund. This is reviewed by the Pensions Committee annually, and new or changed risks are reported at each quarterly meeting.

The table below highlights the key risks and how they are managed.

Key risk identified:	A range of controls are in place including:
Assets do not cover liabilities	Triennial valuation, diversification of investments, regular monitoring and reporting, professional advisors.
The inability to deliver the Pensions Administration Service, due to failure in the shared service agreement	Performance and management indicators, regular meetings, internal and external audits, service level agreement and benchmarking.
Paying pensions correctly	Process controls, audits, reconciliations, task management.
Collecting contributions correctly	Employer contribution monitoring, monthly contribution data returns, audits, employer training, reconciliations.
Not meeting statutory requirements	Pension Board oversight, checklist against the Pensions Regulator requirements, regular reporting to Committee and Board.
Loss of key staff, knowledge and skills	Diversified staff/team, pensions user groups, procedural notes, appraisals.
Asset Pooling – the management of the relationship with Border to Coast Pensions Partnership and the investment performance, as a client and a shareholder	Joint Committee, officer operations group, senior officers group, regular meetings with Border to Coast.

Information regarding the risks relating to financial instruments is included within the notes to the accounts, later in this report.

Lincolnshire County Council's (LCC) internal audit team regularly undertake audits across different aspects of the Fund's management and administration. The output from these audits is reported to the Council's Audit Committee, and brought to the Pension Board and Committee as appropriate. Internal audits undertaken in 2018/19 covered assurance of the administration service provided by West Yorkshire Pension Fund (WYPF). The Council's audit team reviewed outcomes of the pensions administration audits undertaken by the Bradford Metropolitan District

Council, who are responsible for the internal audit function of WYPF. Areas covered and outcomes are shown below:

- New Pensions and Lump Sums – Deferred Pensions = Effective
- Reimbursement of Agency payments = Mostly Effective
- LGS Contributions = Excellent
- New Pensions and Lump Sums – Ill Health Pensions = Good
- New Pensions and Lump Sums – Fire Service Pensions = Good

Following their conversations with the WYPF audit provider, LCC can continue to place assurance on the robust nature of the audits completed by Bradford MDC. They were pleased to see that the audits continue to have positive assurance levels to date and that actions are implemented promptly. They are happy to place reliance on this assurance over Pension Administration and plan to maintain their relationship with Bradford MDC.

Assurance from the service suppliers and fund managers appointed by Lincolnshire Pension Fund is obtained thorough the receipt and monitoring of control reports – e.g. ISAE 3402 (AAF 01/06) or SSAE 16/70. For 2018/19 reasonable assurance was obtained from all third party operations.

## Employer Contribution Rates

Analysis of Active and Ceased Employers in the Fund:

	Active	Ceased	Total
Scheduled Body	207	12	219
Admitted Body	27	12	39
<b>Total</b>	<b>234</b>	<b>24</b>	<b>258</b>

The employers' contribution rates (including deficit cash or percentage of payroll amounts where applicable) applying in the year ended 31 March 2019, for all employers are set out below, alongside actual cash contributions received from both the employer and the employees for each body.

Scheduled & Admitted Bodies Contributing to the Fund as at 31 March 2019:

Employer	Primary Rate	Secondary Rate	Contributions received £k	
	%	(% or £k)	Employer	Employee

Contribution payments are paid by the employers directly to the Lincolnshire Pension Fund bank account, and monthly data submissions are sent to the Fund's administrator, WYPF, through a secure portal.

The timely receipt of contribution payments and data submissions is monitored closely. Late payers (either actually paying cash or submitting data after the statutory deadline of the 19 of the month following payroll) are reported quarterly to both the Pensions Committee and the Pension Board.

A policy is in place to fine employers where they are late in three of any six months over a rolling period, to cover additional administrative costs. However the Fund and its administrator work closely with employers to ensure that employers understand their responsibilities and the processes required to meet them.

Over the year to 31 March 2019 there were 22 fines raised to employers.

# Asset Pooling

## Introduction

In the LGPS (Management and Investment of Funds) Regulations 2016, enacted in November 2016, the Government required all Local Government pension funds to combine their assets into a small number of asset pools, in line with guidance issued by the Secretary of State and meeting the four criteria set out below:

- a. Benefits of scale - a minimum asset size of £25bn;
- b. Strong governance and decision making;
- c. Reduced costs and value for money; and
- d. Improved capacity to invest in infrastructure.

These regulatory changes do not affect the sovereignty of the Lincolnshire Pension Fund, and the pooling of LGPS assets will have no impact on the employee contribution rates or pension entitlement of members of the fund (pensioners, current employees and previous employees who are yet to draw their pension).

## Lincolnshire Pension Fund's Solution

Having assessed the various options available, it was decided that the Fund would pool its assets with eleven other like-minded funds, and create a new entity to implement the investment strategy and manage the investments. Some core principles were agreed at the very beginning, these included:

- One Fund one vote – regardless of size all Funds will be treated equally;
- Equitable sharing of costs; and
- To drive efficiencies and work effectively, partner funds must have a complimentary investment ethos, risk appetite and strategy.

This new entity was to be a fully regulated asset management company, jointly owned by the twelve partner funds' administering authorities, with each Fund having an equal share in that company. It would have capabilities for internal management and appointing external managers. Its role would be to implement the investment strategies of the partner funds, through a range of investment sub-funds offering internally and externally managed solutions. The new entity was called Border to Coast Pensions Partnership Ltd (BCPP), and the proposal was approved by Government in December 2016. BCPP started managing assets in July 2018.

## Border to Coast Pensions Partnership

BCPP is based in Leeds and has around 60 employees. This includes a large team to directly manage assets, alongside a team to select external managers. As a FCA (Financial Conduct Authority) regulated company, BCPP has to comply with all the requirements that any other asset manager has to, and is subject to company legislation.

## Governance

BCPP has twelve LGPS partner funds – Bedfordshire, Cumbria, Durham, East Riding, Lincolnshire, Northumberland, North Yorkshire, South Yorkshire, Surrey, Teesside, Tyne & Wear and Warwickshire, with assets in excess of £45bn as at March 2019. The Chairs of the Pensions Committees of these funds sit on a Joint Committee, to exercise oversight of the investment performance of the company and report back to, and take feedback from, the various Pensions Committees. In addition there is a scheme member representative that has a non-voting seat on the Joint Committee, who is nominated by the twelve Partner Funds' Local Pension Boards. The Joint Committee represents the Funds as investors in BCPP. As BCPP is jointly owned by the administering authorities of the Pension Funds, there is also a shareholder role that the authorities provide, and the responsibilities are all set out in a shareholder agreement. Pension Fund Officers provide day-to-day oversight and work closely with BCPP to ensure that the company provides the investment vehicles the funds need to implement their investment strategies.

As at 31 March 2019, the Lincolnshire Fund had not transitioned any assets. The first transition is expected in Q2/3 2019 to the Global Equity Alpha Fund.

## Border to Coast set-up costs

The table below shows set-up costs incurred by the Fund this year and since inception:

	Direct £000's	Indirect £000's	2018/19 Total £000's	Since Inception Cumulative £000's
Recruitment				17.1
Legal				26.6
Procurement				36.2
Other support (e.g. IT)				2.0
Share purchase	833.3		833.3	833.3
Other working capital				-
Staff costs				61.9
Other costs				41.3
<b>Total Set-up Costs</b>	<b>833.3</b>		<b>833.3</b>	<b>1,018.4</b>

	Direct £000's	Indirect £000's	2018/19 Total £000's	Since Inception Cumulative £000's
Governance		171.0	171.0	171.0
Implementation		239.4	239.4	239.4
Development		12.2	12.2	12.2
AUM		0.3	0.3	0.3
Total Running Costs		422.9	422.9	422.9
Total Costs to Date				1,441.3

\*AUM is notional figure based on asset allocation

The costs identified above have been incurred as a result of creating Border to Coast in order to meet the Governments requirements, in a way suited to the core principles that the Fund and the partner funds agreed at the beginning of the pooling process. As no transitions have yet taken place, no real savings have been made, however it is expected that over the medium to longer term investing with Border to Coast will create fee savings through reduced manager turnover and improve net of fee performance.

# Annual Report of the LGPS Local Pension Board 2018/2019

## Introduction

I am pleased to present the report of the Local Pension Board of Lincolnshire County Council (LCC) for the year 2018/2019.

Pension Boards were introduced in to the Local Government Pension Scheme (LGPS) from April 2015 under the Public Sector Pensions Act 2013 with the responsibility to assist administering authorities, in particular pension managers, and to secure compliance with the LGPS regulations.

The Lincolnshire Local Pension Board was established by the Administering Authority in June 2015 and operates independently of the Pensions Committee.

## Purpose

The Board's role is to work closely in partnership and assist the Administering Authority in its role as Scheme Manager in relation to the following matters:

- Securing compliance with the Scheme Regulations and any other legislation relating to the governance and administration of the Scheme;
- Securing compliance with the requirements imposed by the Pension Regulator (tPR) in relation to the Scheme;
- Ensuring any breach of duty is considered and followed under the Scheme's procedure for reporting to tPR and to the Scheme Manager;
- Assisting the Scheme Manager to ensure the effective and efficient governance and administration of the Scheme; and
- Such other matters as the Scheme Regulations may specify.

Further detailed information on the Board's functions is set out in the Terms of Reference.

## Constitution and Membership

The membership of the Board during the period was as follows:

- **Independent Chair** (non-voting)  
Roger Buttery

- **2 Employer Representatives** (both voting)  
Councillor Mark Whittington (Lincolnshire County Council)  
Kirsty McGauley (Grantham College)
- **2 Member Representatives** (both voting)  
David Vickers  
Ian Crowther

Four meetings were held within the period – 25 July and 11 October 2018, and 10 January and 21 March 2019.

All the Board Members have completed the Pension Regulator’s Public Service toolkit. All the Board Members have also attended a variety of externally organised conferences and seminars throughout the year as well as several internal training sessions on LGPS Asset Pooling, the forthcoming actuarial valuation and Club Vita longevity update.

## The Work Programme

At each of the four meetings, the Board considered several standard reports. Lincolnshire’s compliance to the Code of Practice produced by tPR is regarded as a very important report.

The eleven elements of the Code are:

- a) Reporting duties;
- b) Knowledge and understanding;
- c) Conflicts of interest;
- d) Publishing information about schemes;
- e) Managing risk and internal controls;
- f) Maintaining accurate member data;
- g) Maintaining contributions;
- h) Providing information to members and others;
- i) Internal dispute resolution;
- j) Reporting breaches of the law; and
- k) Scheme advisory board.

A checklist of 99 items covering the above was produced in a traffic lights format. It is pleasing to report that Lincolnshire was largely compliant throughout the year. At the March 2019 meeting, there were 94 green and 1 not relevant. There were still 4 partially compliant and progress continues to achieve green. The Board considered that the compliance to tPR’s Code was very good.

Each quarter, the Board considered a report from the Business Development Manager (BDM) from WYPF on current administration issues within the Lincolnshire Pension Fund. The Key Performance Indicators (KPIs) are a key consideration. Throughout the year, the Board has been comfortable with the performance of WYPF and most of the KPIs have been in the 90%+ range.

At the January meeting, the Board questioned the BDM on the data scores as reported to tPR; these were Common 95.71% and Conditional 94.81%. At the March meeting, the scores had improved slightly to Common 96.01% and Conditional 95.78%. The target is 100%, particularly for Common data. WYPF are currently working on a data improvement plan and using a tracing company in an attempt to track lost members. Overall, the Board's conclusion was that the administration continues to be sound. It was also noted that the partnership between LCC and WYPF continued to develop well.

Each quarter, the Board considered a report from the Head of Pensions on any current issues within the fund including investment matters. In last year's Annual Report, I mentioned that the Board had written to an employer concerning a huge backlog of outstanding leaver forms. The employer self-reported to tPR and produced an improvement plan. It is pleasing to report that in addition to clearing the historic backlog, the in-year leavers for the particular employer had reduced to normal levels. The Board acknowledged the improvements made and suggested to the employer that it would be appropriate to notify tPR that all backlogs had been cleared.

The Head of Pensions also reported on the employers' monthly submissions and contribution monitoring at each Board meeting. Generally, the payment of contributions and the employer data submissions on a timely basis are good but there are a few outliers. This is both disappointing and unacceptable. The officers felt that it was important to work with the employers to attempt to resolve issues before taking further action. The Board will keep this issue under close review.

At the July meeting, consideration was given to the Pension Fund's draft Annual Report & Accounts for 2017/2018 which had been approved by the Pensions Committee on 19 July, 2018. The Board subsequently received a report from KPMG giving their opinion on the Pension Fund Accounts and Annual Report. Overall, the audit of the Pension Fund Accounts did not identify any material mis-statements and there were no adjusted or unadjusted audit differences that they needed to be reported. An unqualified audit opinion was issued on the Pension Fund accounts as part of the Lincolnshire County Council Statement of Accounts. The Board concluded that the Report and Accounts was an excellent document.

At the January meeting, at the request of the Board, the Head of Pensions produced a report which detailed the governance structure of the Border to Coast Pensions Partnership (BCPP). The report was excellent and identified the key stakeholders of BCPP and explained what each of the roles entailed.

It is also a pleasure to report that not only was the Head of Pensions awarded the Rising Star of the Year Award at the UK Institutional Investor Awards, but she went on to win the Rising Star of the Year at the Institutional Investor European Peer-to-Peer awards. This is a fantastic achievement for both Jo Ray and the Lincolnshire Pension Fund.

## Conclusion

This is the fourth report of the Board. The Board considers the governance and administration of the Scheme to be sound. Lincolnshire's compliance to the vast majority of tPR's Code of Practice is particularly impressive. The Report and Accounts for 2017/2018 is an excellent document and there was an unqualified audit report. The Board will continue to monitor the LGPS pooling arrangements as the proposals unfold.

The Board would like to express its thanks to Jo Ray, Head of Pensions, her Team and the staff of the WYPF for the huge amount of work undertaken during the year. Finally, I should like to thank the four Board Members for their considerable input and support during the year.

Roger Buttery  
**Pension Board Chair**  
**April 2019**

Any questions regarding the Pensions Board or its work can be addressed through the Head of Pensions.

# Lincolnshire County Council Pension Fund

## Actuarial Statement for 2018/19

This statement has been prepared in accordance with Regulation 57(1)(d) of the Local Government Pension Scheme Regulations 2013. It has been prepared at the request of the Administering Authority of the Fund for the purpose of complying with the aforementioned regulation.

### Description of Funding Policy

The funding policy is set out in the Administering Authority's Funding Strategy Statement (FSS), dated March 2017, updated July 2018. In summary, the key funding principles are as follows:

- to ensure the long-term solvency of the Fund, using a prudent long term view. This will ensure that sufficient funds are available to meet all members'/dependents' benefits as they fall due for payment;
- to ensure that employer contribution rates are reasonably stable where appropriate;
- to minimise the long-term cash contributions which employers need to pay the Fund, by recognising the link between assets and liabilities and adopting an investment strategy which balances risk and return (NB: this will also minimise costs to be borne by Council Tax payers);
- to reflect the different characteristics of different employers in determining contribution rates. This involves the Fund having a clear and transparent funding strategy to demonstrate how each employer can best meet its own liabilities over future years; and
- to use reasonable measures to reduce the risk to other employers and ultimately to the Council Tax payer from an employer defaulting on pension obligations.

The FSS sets out how the Administering Authority seeks to balance the conflicting aims of securing the solvency of the Fund and keeping employer contributions stable. For employers whose covenant was considered by the Administering Authority to be sufficiently strong, contributions have been stabilised to return their portion of the Fund to full funding over 20 years if the valuation assumptions are borne out. Asset-liability modelling has been carried out which demonstrate that if these contribution rates are paid and future contribution changes are constrained as set out in the FSS, there is still around a 66% chance that the Fund will return to full funding over 20 years.

### Funding Position as at the last formal funding valuation

The most recent actuarial valuation carried out under Regulation 62 of the Local Government Pension Scheme Regulations 2013 was as at 31 March 2016. This valuation revealed that the Fund's assets, which at 31 March 2016 were valued at £1,759 million, were sufficient to meet

77% of the liabilities (i.e. the present value of promised retirement benefits) accrued up to that date. The resulting deficit at the 2016 valuation was £529 million.

Each employer had contribution requirements set at the valuation, with the aim of achieving full funding within a time horizon and probability measure as per the FSS. Individual employers' contributions for the period 1 April 2017 to 31 March 2020 were set in accordance with the Fund's funding policy as set out in its FSS.

## Principal Actuarial Assumptions and Method used to value the liabilities

Full details of the methods and assumptions used are described in the 2016 valuation report.

### Method

The liabilities were assessed using an accrued benefits method which takes into account pensionable membership up to the valuation date, and makes an allowance for expected future salary growth to retirement or expected earlier date of leaving pensionable membership.

### Assumptions

A market-related approach was taken to valuing the liabilities, for consistency with the valuation of the Fund assets at their market value.

The key financial assumptions adopted for the 2016 valuation were as follows:

Financial assumptions	31 March 2016
Discount rate	4.0%
Salary increase assumption	2.6%
Benefit increase assumption (CPI)	2.1%

The key demographic assumption was the allowance made for longevity. The life expectancy assumptions are based on the Fund's VitaCurves with improvements in line with the CMI 2013 model, assuming the current rate of improvements has reached a peak and will converge to long term rate of 1.25% p.a. Based on these assumptions, the average future life expectancies at age 65 are as follows:

	Males	Females
Current Pensioners	22.1 years	24.4 years
Future Pensioners*	24.1 years	26.6 years

\* aged 45 at the 2016 valuation

Copies of the 2016 valuation report and Funding Strategy Statement are available on request from the Administering Authority to the Fund.

## Experience over the period since 31 March 2016

Since the last formal valuation, real bond yields have fallen placing a higher value on the liabilities but there have been strong asset returns over the 3 years. Both events are of broadly similar magnitude with regards to the impact on the funding position.

The next actuarial valuation will be carried out as at 31 March 2019. The Funding Strategy Statement will also be reviewed at that time.

# Investment Background

## Returns for Major Markets

The twelve months to 31 March 2019 produced mainly positive returns across all asset classes, with equities generally performing the best.

Equity market returns were positive, in the main, ranging from -1.8% in Japan to 17.7% in the US.

Bond asset returns were better than previous years, with UK Gilts and Index Linked Gilts returning 3.7% and 5.5% respectively, and UK Corporate Bonds returning 4.1%.

Property returns improved on last year, returning 4.8% for investors.

## Investment Returns to sterling based investors | April 2018 to 31 March 2019

Asset Class	Index	Index return to sterling investors %
<b>Equities</b>		
United Kingdom	FTSE All Share	6.4
Global Equities	FTSE World	10.7
United States	S&P 500	17.9
Europe ex UK	FTSE Developed Europe	2.9
Japan	TOPIX	(1.8)
Emerging Markets	FTSE Emerging	1.9
<b>Fixed Interest</b>		
UK Gilts	FTSE UK Gilts	3.7
UK Index Linked Gilts	FTSE Index-Linked	5.5
UK Corporate Bonds	IBOxx Sterling Non-Gilts All Stocks	4.1
Property	CBRE Index	4.8
Cash	LIBID Seven Day Rate (compounded)	0.5

## World Equity Markets

Global equity markets reported gains over the twelve months to March 2019 (in GBP terms), with US equities outperforming their European counterparts.

A brief summary of the highlights of each quarter of the financial year is shown below:

### Quarter 2 2018

Global equity markets ended the second quarter of 2018 in positive territory, despite concerns about trade tensions and increased political and economic uncertainty. In particular in May, markets remained on a strong footing. Macro data had been largely supportive in the US with unemployment falling to the lowest level since the end of 2000. In terms of corporate news, global deal-making reached US\$2.5 trillion in the first half of 2018, breaking the all-time high for the period in spite of an increasingly challenging geopolitical backdrop. A wave of mega deals led by the US media and telecoms sector helped to lift worldwide deal volumes. Regarding monetary policy, the US Federal Reserve (Fed) raised interest rates in June for the second time in the year, as expected. It also signaled that it expected two further increases in 2018 – one more than it had previously forecast. In the eurozone, the European Central Bank (ECB) announced its intention to end its bond buying programme by the end of this year.

### Quarter 3 2018

In the third quarter 2018, global equity markets ended in positive territory despite mounting political, trade and policy headwinds. Despite the sharp decline in share prices in US mega-cap technology stocks in July after their latest earnings and the political concerns about ongoing trade tensions, the main US equity markets continued its record-setting run in August to reach twin landmarks: an all-time high and the longest bull-run in history. September also rounded off a strong quarter for the US equity market, as it clocked its best quarterly performance since 2013. The quarter-point interest rate hike from 2% to 2.25% reflected an upbeat assessment of the US economy. UK and eurozone equities were broadly flat during September after the more challenging environment in August, mainly driven by concerns over the Italian budget combined with contagion fears over Turkish Lira weakness. Meanwhile, Japan's equity market ended September with solid gains, shrugging off investor concerns about the outlook for Chinese economy and escalating trade tensions between the US and China.

### Quarter 4 2018

Global equity markets ended the fourth quarter 2018 in negative territory to round off their worst year since the global financial crisis. October 2018 was one of the worst months for equity markets in more than six years. Investors grew cautious in the face of a cocktail of factors including signs that trade tensions are fueling a global economic slowdown. Meanwhile, increases in US interest rates signaled the end of cheap money that had driven a near decade-long bull market for equities. The combination of a less aggressive Fed and the easing of trade tensions between the US and China saw global equity markets deliver positive returns in November. The

UK and eurozone equity markets continued to struggle during November. In December, markets were rattled by a myriad of concerns including the US Federal Reserve raising interest rates too quickly, US economic growth being revised down for the third quarter, political turmoil in Washington, as well as the UK's exit from the EU and the ongoing US-China trade talks.

## Quarter 1 2019

It was a good start into the new year for global equities over the first quarter 2019. Driven mostly by gains in the US equity market, global stocks saw their largest quarterly gains since 2010. The positive investor sentiment offset concerns over the health of the global economy and was fueled by optimism over trade talks between the two largest economies, China and the US, and a dovish rhetoric from several central banks, including the Fed and the European Central Bank. Markets were especially boosted by the Fed's announcement that it would put further interest increases on hold. All three months in the first quarter saw positive returns in global equity markets. Despite the question of UK's departure from the European Union, which dominated headlines throughout the first quarter of the year, the UK equity market along with the European equity market provided positive returns three months in a row.

## Fixed Interest

A brief summary of each quarter of the financial year is shown below.

### Q2 2018

It was a bumpy quarter for global government bonds. While risk aversion mounted in May on the prospect of a trade war between the US and China, government bond yields were more heavily influenced by the Federal Reserve (Fed) indications that US interest rates could rise more quickly than had previously been expected. Core government bond prices in the US, Germany and the UK fell in response. Thereafter, however, political uncertainty in Italy and Spain fuelled demand for core government bonds, driving prices higher. In June, the Fed's interest rate hike was accompanied by signals that two further increases would be necessary in 2018, causing a further fall in government bond yields. Corporate bonds began well, but struggled to make headway as the period progressed. First, the credit market was unnerved by political uncertainty in Italy as the country's president vetoed the soon-to-be government's choice of finance minister. Then, as things began to stabilise in Italy, volatility in financial markets picked up once again as the spectre of global trade wars returned. The US traded verbal blows with its major trading partners – China and Europe – creating a more febrile political environment and increasing, in many people's eyes, the risk of higher inflation and the potential for economic slowdown.

### Q3 2018

The primary influences on global government bonds were risk aversion and the move towards policy normalisation in the major economies. Risk aversion was largely rooted in an escalation in the trade spat between the US and China. Against that, a slew of encouraging US economic data caused the market to price in two interest rate rises before the end of 2018, and pushed the 10-year Treasury yield decisively above the 3% mark. Towards the end of Q3, Italian bond yields reached a five-year high after its government unveiled plans to sharply increase public spending,

risking a conflict with Brussels. It was a challenging but positive quarter for corporate bonds, with fears of faster-than-expected US interest rate rises and escalating global trade tensions fuelling volatility. Concerns surrounding the sustainability of the Italian budgetary position also contributed to some periods of markedly risk-off sentiment. Despite such worries, the global economic and corporate backdrop remained resolutely supportive, enabling modest returns for corporate bonds over the period as a whole.

#### Q4 2018

It was a relatively good quarter for government bonds, as risk-averse investors flocked to safe-haven assets. Driving sentiment was the deteriorating outlook for the world's economy and uncertainty over US monetary policy. The same underlying themes continued to trouble the market. These included the trade war between the US and China, and unease as the Brexit deadline grew closer. Meanwhile, Italy's clash with the European Union over fiscal spending weighed on sentiment. The fall in the oil price was also an influencing feature. It was a tough period for corporate bonds. Primary concerns were the global economy and longevity of the corporate earnings cycles. This came against the backdrop of tightening global liquidity and the elevated level of non-financial corporate debt. Beyond this, the escalating US-China trade war depressed investor sentiment. There were also more localised worries. These included Brexit and Italy's budget drama. Unsurprisingly, corporate bond spreads widened. However, the impact on higher-quality investment grade bonds was lessened by the sharp decline in government bond yields.

#### Q1 2019

The main factors influencing global government bonds were the outlook for world economic growth and US monetary policy. Underlying themes included the US/China trade war, and unease as the Brexit deadline grew closer. Other significant factors were Italy's clash with the European Union over fiscal spending, and the falling oil price. An escalation of risk aversion in March drove German bund and UK gilt yields to their lowest points since 2016 and 2017 respectively. Meanwhile, the US yield curve inverted for the first time since 2007. Global corporate bonds bounced back strongly following a poor final quarter of 2018. In large part, this reflected the Fed's unexpected shift to a dovish stance. This led to investors pricing out any further US interest rate hikes for the remainder of 2019. Treasury yields fell in response. The other big external headwind for corporate bonds had been increasing US/China trade tensions. Here too, optimism increased as talks resumed. Investors hoped a deal was now possible.

### UK Commercial Property

A brief summary of each quarter of the financial year is shown below.

#### Q2 2018

UK commercial real estate delivered modest capital growth during the quarter, but at the sector level, there was further divergence in performance. While industrials continued to outperform the wider UK real estate market, signs of a slowdown in offices were more apparent and there was further distress on the high street. Mothercare and House of Fraser were the latest retailers to resort to CVAs (company voluntary arrangements), while others like M&S looked to rationalise their physical store portfolios. In this environment, real estate investors remained focused on assets in good locations, offering resilient income.

### Q3 2018

UK commercial property remained stable, although there were some indications during the quarter that the market was moderating. Total returns had been marginally weaker in recent months, with the return for August (the latest data available) the lowest since September 2016. Although capital growth was weaker, rents held up fairly well – particularly for industrial and office property. Market trends continued to see industrial and retail property move in opposite directions. Industrials were still outperforming all the other commercial sectors as the relentless demand for all types of storage and distribution facilities drove the sector higher.

### Q4 2018

Total returns continued to slow amid a difficult period for the UK commercial property market. As expected, 2018 was a weaker year for real estate. Full-year returns were unlikely to match the double figures achieved in 2017. Ongoing uncertainty surrounding the Brexit withdrawal agreement caused investors to be more cautious. Over the last nine years, real estate had delivered returns of more than 10% per year. However, the market was at a late stage in the cycle and valuations appeared expensive relative to their long-term worth, therefore returns were expected to be lower going forwards.

### Q1 2019

It was a weak start to the year for UK commercial real estate. Monthly total returns continued to slow and were barely positive. As property values were reassessed, capital growth turned negative at an all-property level. This was largely a result of weakening values for large-scale retail assets (e.g. retail warehouses and shopping centres). Industrials in the South East remained the strongest sector and capital values continued to rise for these assets. Central London offices continued to slow having defied the odds in the face of heightened levels of Brexit uncertainty.

## Administration of Benefits

The shared service arrangement with West Yorkshire Pension Fund (WYPF) to provide Pensions Administration services for the Lincolnshire Pension Fund is now four years old. This arrangement was made to improve efficiency and reduce costs in the provision of the Pensions Administration service, and this is being seen. In August 2018, a third partner joined the shared service – Hounslow Pension Fund. It is expected that this will add further benefits and efficiencies over the medium term.

A satellite office for the WYPF administration team is based in Lincoln, co-located with the LCC Pension Fund team, to enable scheme members to have a point of contact in Lincolnshire. Members are always able to visit County Offices and speak to someone regarding their pension arrangements.

The monthly data return from employers is a considerable benefit to the administration process, and has improved the quality of data held in the administration system, enabling a better service to be provided to scheme members. However some employers and their payroll providers still need to improve their own processes for submitting accurate data. WYPF continues to work with the Lincolnshire Fund and its employers to improve all aspects of administering the scheme.

The Pensions Committee and Pension Board take a keen interest in the administration of the Fund, and receive regular reports and presentations (see the Board's annual report on p29) on all aspects of the administration service.

The Head of Pensions is part of the overall shared service management team, and attends the bi-monthly management review meetings held in Bradford. In addition, as part of the overall governance of the service, the County Finance Officer and the Head of Pensions sit on the Collaboration Board of the shared service, alongside the senior management of WYPF, to ensure that the original aims of the partnership with WYPF are met.

The service is monitored through a number of performance indicators. These are detailed in the table below, showing the performance achieved over the last year against the expected performance, and highlighted with a red, amber or green to show where expectations have not been met. Performance is reported quarterly to the Pensions Committee and Pension Board, and regular meetings are held between LCC and WYPF to understand and manage any performance issues. The critical business areas impacting on pensioners and their family take priority, these being members requiring immediate payment for retirements, redundancies, dependents pensions and death grants.

## Key Service Performance Indicators

Event	No. Cases	Target Days to Complete	Cases Target Met	Minimum Target %	Target Met %	Average Days Taken
AVC in-house	344	10	334	85	97.1	2.2
Age 55 Increase	6	20	6	85	100	5.5
Change of address	972	5	926	85	95.3	1.0
Change of bank details	288	5	260	85	90.3	2.4
Death grant nomination received	3,781	10	48	85	98.0	3.4
DWP request for information	49	20	3,256	85	86.1	8.5
Death grant set up	124	5	121	85	97.6	1.3
Death in retirement	568	5	527	85	92.8	2.4
Death in service	14	5	13	85	92.9	1.7
Death in deferment	36	5	30	85	83.3	3.2
Deferred benefits into payment – actual	1,071	5	944	90	88.1	2.2
Deferred benefits into payment – quote	1,362	35	1,315	85	96.6	9.6
Deferred benefits set up on leaving	5,021	20	4,738	85	94.4	7.0
Divorce quote	194	20	188	85	96.9	4.6
Divorce settlement – pension sharing order implemented	1	80	1	100	100	0.0
Estimates for deferred benefits into payment	464	10	295	90	63.6	12.8
General Payroll Changes	295	5	280	85	94.9	1.2
Initial letter death in service	14	5	14	85	100	1.0
Initial letter death in retirement	568	5	559	85	98.4	1.1
Initial letter death in deferred	36	5	32	85	88.9	10.3
Life certificate received	17	10	15	85	88.2	13.9
Monthly posting	3,245	10	2,828	95	87.2	5.3
NI adjustment at state pension age	24	20	24	85	100	12.8
Pension estimate	1,158	10	1,040	75	89.8	6.1
Refund payment	961	10	938	95	97.6	1.6
Refund quote	1,996	35	1,906	85	95.5	7.2
Retirement actual	625	3	592	90	94.7	1.0
Spouse – set up new pension	254	5	219	85	86.2	6.7

Event	No. Cases	Target Days to Complete	Cases Target Met	Minimum Target %	Target Met %	Average Days Taken
Spouse potential	31	20	30	85	96.8	8.2
Transfer in payment received	116	35	98	85	84.5	25.0
Transfer in quote	168	35	168	85	100	2.9
Transfer out payment	55	35	49	85	89.1	14.0
Transfer out quote	460	20	390	85	84.8	12.6

As can be seen from the table above, overall performance has met or exceeded targets. Those below target are shown below:

One area is highlighted in red:

- Estimates for deferred benefits into payment – following the regulations changing in May 2018, allowing deferred members to take their pension from age 55 without their previous employer's consent, there has been a sharp rise in the number of estimate requests. To reduce the number of requests going forwards, changes have been made to the annual benefit statements for 2018/19 showing what reduced pensions would look like at ages 55, 60 and 65.

Four areas are highlighted in amber, however three are very close to their target. The one area worth commenting on is below:

- Monthly posting – all employers are required to submit their data on a monthly basis, however over the year this KPI was at 87.2% (a big improvement from 64.5% last year) against a target of 95%. The KPI is to be able to process the data from the employers within 10 working days of receipt. Much work has been put into ensuring the timeliness of payments and data submissions, and work continues with the employers and their payroll providers to improve the data quality, and therefore the ability for straight through processing. Employer numbers are rising each year, with the growing numbers of academies and out-sourcings, so this is an ever-increasing challenge. The Fund is working closely with WYPF to communicate to employers on the importance of clean and accurate data.

### Industry standard performance indicators

The service is also monitored against industry standards and national averages. These are not directly comparable to the figures above as they are measured at different points, but do provide a useful indicator of the overall level of service in comparison to others.

Industry Standard Performance Indicators	Target days	Achieved %	National average %
Letter detailing transfer in quote	10	98.4	84.9
Letter detailing transfer out quote	10	91.8	85.9
Process and pay refund	5	97.4	89.3
Letter notifying estimate of retirement benefit	10	92.1	91.0

Industry Standard Performance Indicators	Target days	Achieved %	National average %
Letter notifying actual retirement benefit	5	91.4	92.4
Process and pay lump sum retirement grant	5	100	94.2
Letter acknowledging death of a member	5	95.5	90.4
Letter notifying amount of dependants benefit	5	92.6	90.4
Calculate and notify deferred benefit	10	93.8	79.1

## New Pensions Paid

New pensions paid over the financial year are shown below, both from an active member status and a deferred member status. This is split across the various types of events that can cause a retirement:

- Normal – retirement at normal retirement age (NRA)
- Early – retirement before NRA – generally with reduced benefits
- Late – retirement after NRA – generally with increased benefits
- Ill health – release of pension through certified ill health
- Redundancy – release of pension from age 55 when made redundant

New pensions paid	2018/19 Member numbers
<b>Active Status</b>	
Normal	256
Early	323
Late	113
Ill health	38
Redundancy	50
<b>Total active</b>	<b>780</b>
<b>Deferred status</b>	
Normal	401
Early	597
Late	13
Ill health	20
<b>Total deferred</b>	<b>1,031</b>

## Pension Overpayments

Occasionally, pensions are paid in error. When this happens, processes are in place to recover the overpayments. The table below shows a summary of the value of the overpayments involved. Every effort is made to recover these, whilst managing the financial impact on the overpaid pensioners.

Overpayments	2018/19 £'000
Annual payroll	75,503
Overpayments value	25
Overpayments written off	2
Overpayments recovered	12

The table below shows a summary of transactions processed during the year:

Analysis of overpayments	2018/19 Number of payments
Pensions paid during period	258,792
Cases overpaid	48
Cases written off	2
Cases recovered	31

## Fraud Prevention – National Fraud Initiative

Lincolnshire Pension Fund, West Yorkshire Pension Fund and Hounslow Pension Fund with fourteen Fire authorities are in shared service arrangement hosted by West Yorkshire Pension Fund. The Funds participate twice a year in the National Fraud Initiative (NFI). The data that is submitted includes pensioners, beneficiaries and deferred member information for Local Government Pension Scheme and Fire Services Pension members managed by the Fund.

A summary of the latest NFI results for the whole shared service is shown below:

Pensioners, beneficiaries and deferred members	No. of records sent	No. and percentage of mismatches	Over payments identified	Possible frauds	Mismatches carried forward at 31 March
2018/19	260,387	3,339 1.3%	3	2	2
2017/18	229,994	518 0.2%	35	2	10
2016/17	224,122	1,425 0.6%	5	4	5
2015/16	219,313	868 0.4%	61	3	10

## Value for money - Cost per member

The latest published data (2017/18) for all LGPS funds administration costs shows that LPF pensions administration cost per member is £13.50, the 5th lowest cost amongst 88 LGPS funds and well below the national average of £20.85

LPF has a below average total cost per members (administration, investment and oversight & governance) at £154.48, the national average for LGPS in 2017/18 is £205.24.

The 2018/19 annual cost of administering the Lincolnshire Pension Fund per member is £15.50, investment management cost per member is £129.60, oversight and governance cost per member £6.33 and the total management cost per member is £151.42. These figures compare favourably with the average cost for authorities in the MHCLG –SF3 results for 2017/18 as shown in the table below.

Cost per member 2017/18	Position	Lincolnshire Pension Fund	LGPS Lowest	LGPS Highest	LGPS Average
Administration	5 <sup>th</sup>	£13.50	£8.83	£60.98	£20.85
Investment	27 <sup>th</sup>	£135.11	£20.48	£566.69	£175.44
Oversight and governance	25 <sup>th</sup>	£5.87	£0.00	£42.19	£8.96
Total Cost per member	22 <sup>nd</sup>	£154.48	£36.45	£634.93	£205.24

## Staffing

The table below identifies the numbers of staff across the areas of the shared service providing the administration service.

Share service staff full time equivalent (FTE)	2015/16	2016/17	2017/18	2018/19
Service Centre	53.2	54.7	58.1	59.5
Payroll	17.6	16.6	19.0	17.6
ICT	12.6	12.6	13.7	14.4
Finance	14.0	14.0	16.0	14.5
Business support	24.1	26.0	27.4	28.8
Technical	4.6	4.5	3.9	4.9
Total	126.1	128.4	138.1	139.7

## Key activities undertaken during the year

### Employer workshops

The free one-day and half-day workshop sessions for employers are a regular part of the training and support offered. Four different types of workshops were provided for employers over the year:

- Complete guide to administration (half day)
- Secure administration (half day)
- Employer Responsibilities (half day)
- Ill Health Retirement
- Pensionable Pay

The workshops were delivered by the shared service WYPF staff and were designed to give employers a good understanding of the pension scheme. Feedback from participants on these events has been very positive again.

### Workshop on ‘Planning for a positive retirement’

The workshops run by Affinity connect, to support and guide members who are considering what retirement might mean to them, continue to be well attended.

The workshops raise awareness of key issues to consider and the decisions that members need to make as they approach this new stage in their life. It is especially useful for members thinking of retiring in the next couple of years, but valuable even if they’re not yet sure when they want to retire.

### Pension Increase

Each year, LPF pensioners receive an annual increase in accordance with pension increase legislation. The increase is linked to movements in the Consumer Price Index (CPI). Deferred members benefits are also increased by CPI. For the 2018/19 year an increase of 3.0% was applied on 9 April 2018.

### Accreditation

The shared service delivery continues to be underpinned by accreditation to the International Organisation for Standardisation - ISO 9001:2000. The quality management systems ensure that the Fund is committed to providing the best possible service to customers, and will continue to ensure that best value is delivered to all stakeholders.

## **Communications**

The contact centre hosted in Lincoln and in Bradford continues to be a popular way for members to communicate with the Fund about their pensions.

100% of annual pension benefit statements for active and deferred members were produced on time giving members information on their benefits accrued to date and what their potential benefits will be at retirement age, as well as other useful information.

Regular newsletters continue to be issued to members to keep them informed of important pensions news.

The shared service has Facebook and Twitter accounts to encourage members of all ages to engage more with the Fund through social media.

## **MyPension**

With the shared services 'MyPension' service members can view their pension record and statements, update personal details, tell us they've moved house and more. Members are being encouraged to sign up as the service moves to more online communications. Enhancements to be introduced shortly include the facility for members to run their own estimate of retirement benefits calculations.

## **General Data Protection Regulation (GDPR)**

The General Data Protection Regulations came into effect on 25 May 2018. This is EU legislation intended to strengthen and unify data protection for all individuals within the EU. These impose new requirements for organisations relating to the protection and management of personal data. It is no longer just about organisations storing and securing data, it is about capturing the context of data and being able to prove everything is being done to protect the member's data and the rights of the member. These new regulations impact almost every area of the business – hardcopy, electronic, website data, images, recordings and written records. Over the year much work was undertaken to ensure to ensure compliance with these regulations.

## Data quality

This year LGPS Funds were required to report on their data quality to the Pensions Regulator as part of the annual scheme returns. The Pensions Regulator has set a target of 100% accuracy for new common data received after June 2010.

Current data quality figures for LPF are shown below:

Common data field	Data score %
Forename	100
Surname	100
Membership status	99.88
Date of birth	99.99
NI number	99.89
Address	95.93
Postcode	99.96

Much work is being undertaken to improve address data and this work will continue over the next twelve months and beyond.

## Disaster recovery and risk management monitoring

The shared service partnership systems are hosted by WYPF administered by Bradford Council. Bradford Council use a pair of geographically separated data centres, which are 3.2km apart. Both purpose-built data centres are protected by redundant power, UPS, a backup generator and cooling. The data centres are connected by point-to-point council-owned fibre runs. Datacentres have secure access systems and are monitored 24/7 by Bradford's CCTV Unit. Both sites are permanently live and accessible to the internal end users who are networked to the sites via diverse fibre cable routes. Where possible, servers are virtualised, using Microsoft Hyper-V. The servers and data are replicated between the Hyper-V hosts at both sites to ensure a short recovery time.

Data is backed up to disk medium in a 24-hour cycle and written to tape archive on robotic tape libraries at both sites. An encrypted archive copy is sent to a dedicated offsite storage facility every week. WYPF's server, disk and core network infrastructure is monitored for errors and warnings, and these generate a ticket on the WYPF IT ITIL system for investigation and resolution. Critical data stores are also replicated at disk level between sites. In the event of serious system failures WYPF would re-provision testing hardware and infrastructure environment for live running.

In the event of WYPF office accommodation becoming unavailable, staff will be relocated to other council offices or work remotely, one of these remote offices is in Lincoln. WYPF is covered by Bradford Council's comprehensive disaster recovery plan for all services they deliver for the shared service.

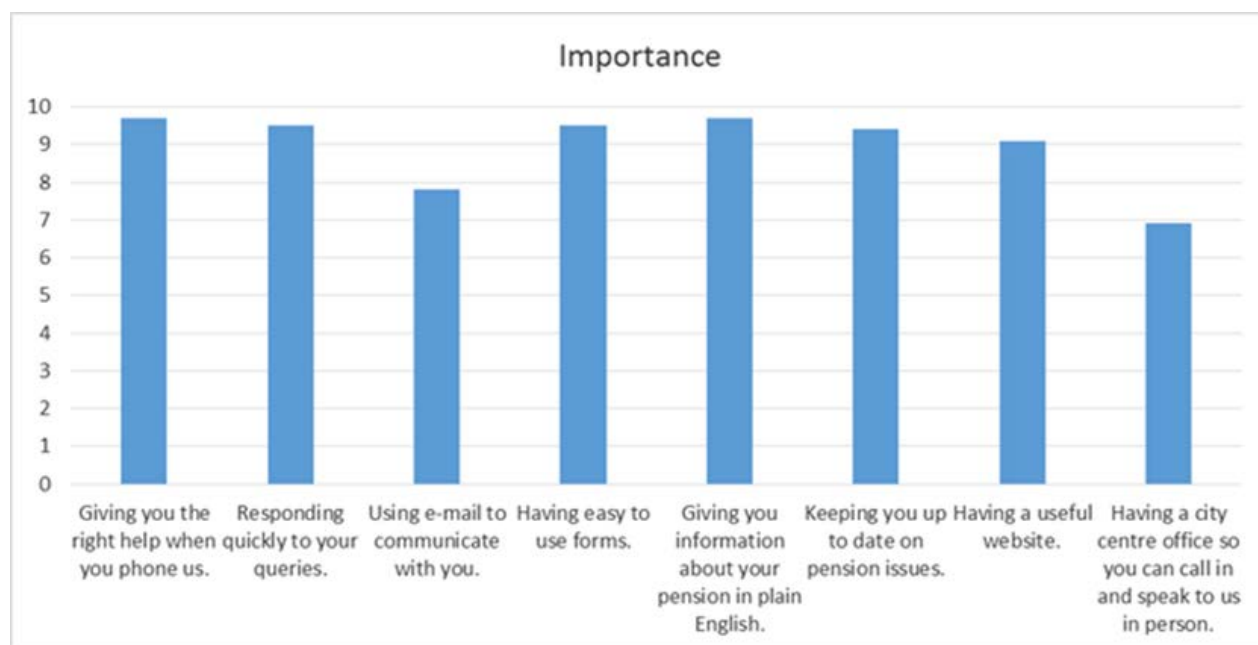

## Customer satisfaction

Customer surveys are regularly sent to a sample of scheme members that have contacted the service centre or been involved in an event (e.g. retirement). In addition, the website has an online form for completion to obtain feedback.

The quarterly scores are presented to the Pensions Committee and Pension Board, in order to monitor satisfaction with the shared service by the end users. The table below shows the scores for the year.

April – June 2018	July - Sept 2018	Oct - Dec 2018	Jan - March 2019
72.1%	81.6%	81.0%	81.3%

This chart shows how members rate the importance of the various services described below:

## Summary of LGPS Contributions and Benefits

The LGPS is a defined benefit scheme, however there are three different benefit tranches, based on when scheme changes were brought in with new regulations. The three tranches are Pre 2008, April 2008 to March 2014 and Post April 2014. The benefits scheme members will be entitled to will depend upon when they joined and left the LGPS – and scheme members may have benefits across all three tranches.

### Membership from 1 April 2014

Membership of the LGPS is available to all contracted employees of participating employers whether whole time or part time. Casual employees may also be members providing their contract of employment is for a minimum of three months. Whilst membership of the Scheme is not compulsory, employees of Scheme employers who are eligible are deemed to have joined unless they specifically opt out, whilst employees of transferred Admission Bodies are eligible only if they are employed in connection with the service transferred.

National legislation and regulation cover the LGPS including the benefit entitlements of Scheme participants and their families. Such benefits are not linked to the investment performance of the Fund. Key features of the contributions payable and the benefits available are outlined below.

### Contributions

Employee's contribution rates from 1 April 2014 are based on actual pensionable pay using the pay band table below. The bands are increased each April in line with inflation by the Ministry of Housing, Communities and Local Government. The bands, as they stood at 31 March 2019, are shown below.

Full Time Equivalent Pay	Contribution Rate
Up to £14,100	5.5%
More than £14,100 and up to £22,000	5.8%
More than £22,000 and up to £35,700	6.5%
More than £35,700 and up to £45,200	6.8%
More than £45,200 and up to £63,100	8.5%
More than £63,100 and up to £89,400	9.9%
More than £89,400 and up to £105,200	10.5%
More than £105,200 and up to £157,800	11.4%
Over £157,800	12.5%

## Benefits

The retirement age for scheme members is their Normal Pension Age which is the same as their State Pension Age (but with a minimum of age 65). However, employees may retire and draw their pension at any time between age 55 and 75. If an employee chooses to retire before their Normal Pension Age it will normally be reduced, as it is being paid earlier, and if taken later than Normal Pension Age then it will be increased, as it is being paid later. Retirement before age 55, other than on ill-health grounds, is not possible.

## Annual Pensions

Pensions are calculated at a rate of 1/49 of the employee's pensionable pay in each scheme year. Inflation increases will be added to ensure that pension accounts keep up with the cost of living.

## Lump Sum Payments

A member receives a tax free lump of three times their pension on service accrued prior to 1 April 2008. On service from 1 April 2008 there is no automatic lump sum, but members have the option to commute pension at the rate of £12 cash lump sum for every £1 pension given up, subject to maximum tax free lump sum of 25% of the capital value of accrued benefits at retirement.

## Ill Health Retirement

There are three tiers of benefits. The benefits are calculated as for normal retirement with additional service under tiers one and two. The three tiers are explained below:

**Tier 1** – The member is unlikely to be capable of gainful employment before Normal Pension Age. Benefits are based on the pension already built up at the date of leaving the scheme, plus the pension that would have built up, calculated on assumed pensionable pay, had they been in the main section of the scheme until reaching Normal Pension Age.

**Tier 2** – The member is unlikely to be capable of gainful employment within three years of leaving, but is likely to be capable of undertaking such employment before Normal Pension Age. Benefits are based on the pension already built up at the date of leaving the scheme, plus 25% of the pension that would have built up calculated on assumed pensionable pay, had they been in the main section of the scheme until reaching Normal Pension Age.

**Tier 3** – The member is likely to be capable of gainful employment within three years of leaving, or before Normal Pension Age if earlier. Benefits are based on the pension already built up at leaving. Payment of these benefits will be stopped after three years, or earlier if the member is in gainful employment or becomes capable of such employment, provided Normal Pension Age has not been reached by then.

## Death-benefits

Death in service attracts a tax free lump sum of three times final pensionable pay. An annual pension is payable to a spouse/civil partner/co-habiting partner (when meeting certain criteria) and eligible children, however civil partners and co-habiting partners pensions are based on post 5

April 1988 membership only. If a member dies within ten years of their retirement (or up to age 75), a single lump sum payment is made of ten times the member's annual pension, less any pension paid since retirement. For a member who retired prior to 1 April 2008 and dies within five years of their retirement, a single lump sum payment is made of five times the member's annual pension less any pension paid since retirement. The surviving spouse is entitled to an annual pension based on 1/160 accrual of the member's membership.

## Supplementary Pensions

Scheme members may purchase additional pension of up to a maximum of £6,822 per annum, in blocks of £250, through Additional Pension Contributions (APCs.). As an alternative, Scheme members may increase their benefits by paying Additional Voluntary Contributions (AVCs). The AVC provider, appointed by the County Council as the administering authority, is Prudential.

## Membership from 1 April 2008 to 31 March 2014

Membership of the LGPS was available to all contracted employees of participating employers whether whole time or part time. Casual employees may also have been members, providing their contract of employment was for a minimum of three months. Whilst membership of the Scheme was not compulsory, employees of Scheme employers who were eligible were deemed to have joined unless they specifically opted out, whilst employees of transferred Admission Bodies were eligible only if they were employed in connection with the service transferred.

National legislation and regulation covered the LGPS, including the benefit entitlements of Scheme participants and their families. Such benefits were not linked to the investment performance of the Fund. Key features of the contributions payable and the benefits under this tranche are outlined below:

### Contributions

Employees contributed between 5.5% and 7.5% of their pensionable pay towards their pension.

### Benefits

The retirement age for scheme members was 65. However, employees could retire between 60 and 65 but would suffer a reduction to their benefits (unless protected under the 85 year rule). Retirement before age 60\*, other than on ill-health grounds, was not possible without the permission of the employer (\*superseded by LGPS (Amendment) Regulations 2018, with effect from 14 May 2018, to enable deferred members to take their pension from age 55 (with reductions) without employer consent).

### Annual Pensions

Pensions were calculated at a rate of 1/60 of the employee's average 'final' pay in their last twelve months of employment for each year of pensionable service. Pensions for persons aged 55 and over (no age restriction for ill-health) were increased each April in line with inflation.

### Lump Sum Payments

On service from 1 April 2008 there was no automatic lump sum, but members had the option to commute pension at the rate of £12 cash lump sum for every £1 pension given up, subject to maximum tax free lump sum of 25% of capital value of accrued benefits at retirement.

### Ill Health Retirement

There are three tiers of benefits. The benefits are calculated as for normal retirement with additional service under tiers one and two. The three tiers are explained below:

**Tier 1** – The member is unlikely to be capable of gainful employment before Normal Pension Age. Benefits are based on the pension already built up at the date of leaving the scheme, plus the pension that would have built up, calculated on assumed pensionable pay, had they been in the main section of the scheme until reaching Normal Pension Age.

**Tier 2** – The member is unlikely to be capable of gainful employment within three years of leaving, but is likely to be capable of undertaking such employment before Normal Pension Age. Benefits are based on the pension already built up at the date of leaving the scheme, plus 25% of the pension that would have built up calculated on assumed pensionable pay, had they been in the main section of the scheme until reaching Normal Pension Age.

**Tier 3** – The member is likely to be capable of gainful employment within three years of leaving, or before Normal Pension Age if earlier. Benefits are based on the pension already built up at leaving. Payment of these benefits will be stopped after three years, or earlier if the member is in gainful employment or becomes capable of such employment, provided Normal Pension Age has not been reached by then.

### Death-benefits

Death in service attracted a tax free lump sum of three times final pensionable pay. An annual pension was payable to a spouse/civil partner/co-habiting partner (when meeting certain criteria) and eligible children, however civil partners and ‘nominated’ dependent partners pensions are based on post 5 April 1988 membership only (now superseded to allow payment without a nomination form). If a member died within ten years of their retirement (or up to age 75), a single lump sum payment was made of ten times the member’s annual pension, less any pension paid since retirement. The surviving spouse was entitled to an annual pension based on 1/160 accrual of the member’s membership.

### Supplementary Pensions

Scheme members could purchase additional pension of up to a maximum of £6,755 per annum, in blocks of £250, through Additional Pension Contributions (APCs). As an alternative, Scheme members could increase their benefits by paying Additional Voluntary Contributions (AVCs). The AVC provider, appointed by the County Council as the administering authority, was Prudential.

## Membership up to 31 March 2008

Membership of the LGPS was available to all contracted employees of participating employers whether whole time, part time or casual.

National legislation and regulation covered the LGPS including the benefit entitlements of Scheme participants and their families. Such benefits were not linked to the investment performance of the Fund. Key features of the contributions payable and the benefits of this tranche are outlined below:

### Contributions

Employees contributed 6% of their pensionable pay towards their pension, the exception being manual workers who were Fund members before 1 April 1998 who paid 5%.

### Benefits

The normal retirement age for Scheme members was 65 but employees in the Scheme prior to 1 April 1998 could retire at 60\* provided they had 25 years' service. Retirement before these ages, other than on ill-health grounds, was not possible without the permission of the employer (\*superseded by LGPS (Amendment) Regulations 2018, with effect from 14 May 2018, to enable deferred members to take their pension from age 55 (with reductions) without employer consent).

### Annual Pensions

Pensions were calculated at a rate of 1/80 of the employee's average 'final' pay in their last twelve months of employment for each year of pensionable service. Pensions for persons aged 55 and over were linked to the movement in inflation.

### Lump Sum Payments

A member received a tax free lump sum payment in retirement of three times their pension, with an option to take a bigger lump sum by exchanging part of their pension. Up to 25% of the capital value of a member's pension could be taken as tax free cash.

### Ill Health Retirement

Benefits were as for normal retirement but with additional years added dependent on the length of pensionable membership.

### Death-benefits

Death in service attracted a lump sum grant equivalent to up to twice final pensionable pay. An annual pension was payable to the surviving spouse and any eligible children. For death after retirement a single payment was made of five times the member's annual pension (less any pension paid since retirement). The surviving spouse was entitled to an annual pension of up to 50% of the member's pension for the rest of their life.

## Supplementary Pensions

Scheme members could purchase additional membership within the Scheme up to a maximum of 6 2/3rd years. As an alternative, Scheme members could increase their benefits by paying Additional Voluntary Contributions, up to limits prescribed in scheme rules, to an AVC provider appointed by the County Council as the administering authority. The Lincolnshire AVC provider was Prudential plc.

## Pension Fund Knowledge and Skills Policy and Report

As an administering authority of the Local Government Pension Scheme, Lincolnshire County Council recognises the importance of ensuring all staff and individuals charged with the financial management and decision making with regard to the Pension Fund, are fully equipped with the knowledge and skills to discharge the duties and responsibilities allocated to them. Within the management of the Pension Fund, LCC seeks to appoint individuals who are both capable and experienced, and will provide and arrange training for staff and individuals involved to enable them to acquire and maintain an appropriate level of expertise, knowledge and skills.

An annual training plan is agreed by the Pensions Committee each year, setting out what training will be covered over the coming year and linking it back to the CIPFA Knowledge and Skills Framework. Knowledge and skills are acquired and maintained through the regular Pensions Committees, as well as through additional training sessions targeting specific areas, and attendance at seminars and conferences. In addition, all members are offered the opportunity to attend the three-day fundamentals training arranged by the Local Government Association (or an equivalent course) and all new members are offered a one-to-one training session with the Head of Pensions.

The County Finance Officer is the delegated officer responsible for ensuring that policies and strategies are implemented.

### Activity in 2018/19

A full training plan was taken to Pensions Committee in July 2018 to identify training requirements over the coming year. The training plan was linked to specific areas within the CIPFA Knowledge and Skills Framework.

The 6 areas within the Knowledge and Skills Framework are:

1. Pensions Legislative and Governance Context
2. Pensions Auditing and Accounting Standards
3. Financial Services Procurement and Relationship Management
4. Investment Performance and Risk Management
5. Financial Markets and Products Knowledge
6. Actuarial Methods, Standards and Practices

The table below details the various areas covered in training and Committee presentations during the year, and the areas within the Knowledge and Skills Framework that they relate to.

# Notes to the Pension Fund Account

## Note 1. Description of the Pension Fund

The Lincolnshire Pension Fund (the Fund) is part of the Local Government Pension Scheme and Lincolnshire County Council is the Administering Authority. Benefits are administered by West Yorkshire Pension Fund (WYPF) in a shared service arrangement.

### General

The scheme is governed by the Public Service Pensions Act 2013. The Fund is administered in accordance with the following secondary legislation:

- the LGPS Regulations 2013 (as amended)
- the LGPS (Transitional Provisions, Savings and Amendment) Regulations 2014 (as amended)
- the LGPS (Management and Investment of Funds) Regulations 2016

It is a contributory defined benefit pension scheme to provide pensions and other benefits for pensionable employees of Lincolnshire County Council, the district councils in Lincolnshire and a range of other scheduled and admitted bodies within the county. Teachers, police officers and firefighters are not included as they come within other national pension schemes.

The Fund is overseen by the Lincolnshire County Council Pensions Committee and Local Pension Board.

### Membership

Membership of the LGPS is automatic for eligible employees, but they are free to choose whether to remain in the scheme or make their own personal arrangements outside of the scheme.

Organisations participating in the Fund include:

- Scheduled bodies, which are local authorities and similar bodies whose staff are automatically entitled to be members of the Fund; and
- Admitted bodies, which are other organisations that participate in the Fund under an admission agreement between the Fund and the relevant employer. Admitted bodies include charitable organisations and similar not-for-profit bodies or private contractors undertaking a local authority function following outsourcing to the private sector.

There are 234 contributing employer organisations in the Fund including the County Council and over 72,500 members, as detailed below (information reported based on March processed data):

	31 March 2018	31 March 2019
<b>Number of Employers with Active Members</b>	<b>219</b>	<b>234</b>
<b>Number of Employees in the Fund</b>		
Lincolnshire County Council	12,193	9,879
Other Employers	13,960	12,941
<b>Total Active Members</b>	<b>26,153</b>	<b>22,820</b>
<b>Number of Pensioners</b>		
Lincolnshire County Council	13,768	14,398
Other Employers	6,775	7,317
<b>Total Pensioner Members</b>	<b>20,453</b>	<b>21,715</b>
<b>Number of Deferred Pensioners</b>		
Lincolnshire County Council	19,540	19,753
Other Employers	7,816	8,468
<b>Total Deferred Pensioners</b>	<b>27,356</b>	<b>28,221</b>

## Funding

Benefits are funded by contributions and investment earnings. Contributions are made by active members of the Fund in accordance with LGPS Regulations 2013 and range from 5.5% to 12.5% of pensionable pay. Employer contributions are set based on triennial actuarial funding valuations. The last valuation was 31 March 2016, and employer primary contribution rates were set ranging from 15.9% to 29.1% of pensionable pay. In addition, the majority of employers are paying secondary deficit contributions as cash payments.

## Benefits

From 1 April 2014, the scheme became a career average scheme, whereby members accrue benefits based on their pensionable pay in that year at an accrual rate of 1/49th. Accrued pension is up-rated annually in line with the Consumer Price Index.

Prior to 1 April 2014, pension benefits under the LGPS were based on final pensionable pay and length of pensionable service, summarised below:

	Service pre April 2008	Service post April 2008
<b>Pension</b>	Each year is worth 1/80 x final pensionable salary	Each year is worth 1/60 x final pensionable salary
<b>Lump Sum</b>	Automatic lump sum of 3/80 x salary In addition, part of the annual pension can be exchanged for a one-off tax free cash payment. A lump sum of £12 is paid for each £1 of pension given up.	No automatic lump sum. Part of the annual pension can be exchanged for a one-off tax free cash payment. A lump sum of £12 is paid for each £1 of pension given up.

There are a range of other benefits provided under the scheme including early retirement, ill-health pensions and death benefits. For more details, please refer to the shared pensions website at [www.wypf.org.uk](http://www.wypf.org.uk).

## Note 2. Basis of Preparation

The Statement of Accounts summarises the Fund's transactions for the 2018/19 financial year and its position at year end as at 31 March 2019.

The accounts have been prepared in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom 2018/19, which is based on International Financial Reporting Standards (IFRS), as amended for the UK public sector.

The accounts summarise the transactions of the Fund and report on the net assets available to pay pension benefits due. The accounts do not take into account liabilities to pay pensions and other benefits after the end of the financial year, nor do they take into account the actuarial present value of promised retirement benefits. These liabilities are dealt with through the periodic actuarial valuations of the Fund and are reflected in the levels of employers' contributions determined by these valuations. The Pension Fund has opted to disclose this information in note 18.

The accounts have been prepared on a going concern basis.

The accounting policies set out below have been applied consistently to all periods presented within these financial statements.

### Accounting standards that have been issued but have not yet been adopted

On an annual basis the Pension Fund is required to consider the impact of accounting standards that have been issued but have not yet been adopted. For 2019/20 there are a number of new accounting standards:

- Annual improvements to IFRS Standards 2014 to 2016 cycle;
- IFRIC22 Foreign Currency Transactions and Advance Considerations;
- IFRIC23 Uncertainty over Income Tax Treatments; and
- Amendments to IFRS9 Financial Instruments: Prepayment Features with Negative Compensation.

It is not thought that any of these standards will have a significant impact on the Pension Fund Accounts for 2019/20.

## Note 3. Significant Accounting Policies

### Fund account - revenue recognition

#### a) Contributions income

Normal contributions are accounted for on an accruals basis as follows:

- Employee contribution rates are set in accordance with LGPS regulations using common percentage rates for all Funds which rise according to pensionable pay; and
- Employer contributions are set at the percentage rate recommended by the fund actuary for the period to which they relate.

Employer deficit funding contributions are accounted for on the day on which they are payable under the schedule of contributions set by the Fund actuary or on receipt if earlier than due date.

Additional employers' contributions, for example in respect of early retirements, are accounted for in the year the event arose.

Any amount due in year but unpaid will be classed as a current financial asset.

#### b) Transfers to and from other schemes

Transfer values represent the amounts received and paid during the year for members who have either joined or left the Fund and are calculated in accordance with the LGPS Regulations 2013. Transfers in/out are accounted for when received/paid, which is normally when the member liability is accepted or discharged.

#### c) Investment Income

##### i) Interest income

Interest income is recognised in the Fund account as it accrues, using the effective interest rate of the financial instrument as at the date of acquisition or origination.

##### ii) Dividend income

Dividend income is recognised on the date the shares are quoted ex-dividend. Any amount not received by the end of the reporting period is disclosed in the net assets statement as a current financial asset.

##### iii) Distributions from pooled funds

Distributions from pooled funds are recognised at the date of issue. Any amount not received by the end of the reporting period is disclosed in the net assets statement as a current financial asset.

##### iv) Movement in the net market value of investments

Changes in the net market value of investments (including investment properties) are recognised as income and comprise all realised and unrealised profits/losses during the year.

## Fund account - expense items

### d) Benefits payable

Pensions and lump sum benefits payable are included in the accounts at the time of payment.

### e) Taxation

The Fund is a registered public service scheme under section 1(1) of Schedule 36 of the Finance Act 2004 and as such is exempt from UK income tax on interest received and from capital gains tax on the proceeds of investments sold. Income from overseas investments suffers withholding tax in the country of origin, unless exemption is permitted. Irrecoverable tax is accounted for as a Fund expense as it arises.

### f) Management expenses

The fund discloses its pension fund management expenses in accordance with the CIPFA guidance: Accounting for Local Government Pension Scheme Management Expenses (2016), using the headings shown below. All items of expenditure are charged to the fund on an accruals basis.

#### i) Administrative expenses

All staff costs of the pensions administration team are charged to the Fund. Associated management, accommodation and other overheads are apportioned to this activity and charged as expenses to the Fund.

#### ii) Oversight and Governance

All staff costs associated with the governance and oversight are charged directly to the Fund. Associated management, accommodation and other overheads are apportioned to this activity and charged as expenses to the Fund.

#### iii) Investment expenses

Investment management expenses are charged directly to the fund as part of management expenses and are not included in, or netted off from, the reported return on investments.

Fees for the external investment managers and custodian are agreed in the respective mandates governing their appointments. Broadly, these are based on the market value of the investments under their management and therefore increase and decrease as the value of the investments change.

In addition, the Fund has negotiated with the following managers that an element of their fee be performance related:

- Invesco Asset Management - Global Equities (ex UK)
- Schroder Investment Management - Global Equities
- Threadneedle Asset Management - Global Equities
- Morgan Stanley Investment Management Ltd - Alternative Investments

Where an investment manager's fee invoice has not been received by the financial year end, an estimate based upon the market value of their mandate is used for inclusion in the Fund accounts.

Fees on investments where the cost is deducted at source have been included within investment expenses and an adjustment made to the change in market value of investments.

## Net assets statement

### g) Financial assets

The investment in the LGPS asset pool, Border to Coast Pensions Partnership, is valued at transaction price i.e. cost. The pool's main trading company only became licensed to trade in July 2018 and they do not have any reliable trading results or profit forecasts available yet. Consequently, the Pension Fund's view is that the market value of this investment at 31 March 2019 cannot be reasonably assessed and that cost is therefore an appropriate estimate of fair value.

All other investment assets are included in the net assets statement on a fair value basis as at the reporting date. A financial asset is recognised in the net asset statement on the date the Fund becomes party to the contractual acquisition of the asset. From this date, any gains or losses arising from changes in the fair value of the asset are recognised by the Fund.

The values of investments as shown in the net assets statement have been determined at fair value in accordance with the requirements of the Code and IFRS13 (see Note 14). For the purposes of disclosing levels of fair value hierarchy, the Fund has adopted the classification guidelines recommended in *Practical Guidance on Investment Disclosures* (PRAG/Investment Association, 2016).

### h) Foreign currency transactions

Dividend, interest, purchases and sales of investments in foreign currencies have been accounted for at the spot rates at the date of the transaction. End of year spot market exchange rates are used to value cash balances held in foreign currency bank accounts, market values of overseas investments and purchases and sales outstanding at the end of the reporting period. The exchange rates used at 31 March 2019 are shown in Note 28.

### i) Derivatives

The Fund uses derivative financial instruments to manage its exposure to certain risks arising from its investment activities. The Fund does not hold derivatives for speculative purposes.

## **j) Cash and cash equivalents**

Cash comprises of cash in hand, deposits and includes amounts held by external managers. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and are subject to minimum risk of changes in value.

## **k) Financial liabilities**

A financial liability is recognised in the net assets statement on the date the fund becomes party to the liability. The fund recognises financial liabilities relating to investment trading at fair value as at the reporting date, and any gains or losses arising from changes in the fair value of the liability between contract date, the year-end date and the eventual settlement date are recognised in the fund account as part of the Change in Value of Investments.

Other financial liabilities classed as amortised cost are carried at amortised cost i.e. the amount carried in the net asset statement is the outstanding principal repayable plus accrued interest.

## **l) Actuarial present value of promised retirement benefits**

The actuarial present value of promised retirement benefits is assessed on a triennial basis by the scheme actuary in accordance with the requirements of IAS 19 and relevant actuarial standards.

As permitted under the Code, the Fund has opted to disclose the actuarial present value of promised retirement benefits by way of a note to the net assets statement (Note 18).

## **m) Additional voluntary contributions**

The Fund provides an additional voluntary contribution (AVC) scheme for its members, the assets of which are invested separately from those of the Pension Fund. The Fund has appointed Prudential as its AVC provider. AVCs are paid to the AVC provider by employers and are specifically for providing additional benefits for individual contributors. Each AVC contributor receives an annual statement showing the amount held in their account and the movements in the year.

AVCs are not included in the accounts in accordance with Regulation 4(1)(b) of the Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016 but are disclosed as a note only (Note 22).

## **n) Contingent assets and contingent liabilities**

A contingent asset arises where an event has taken place giving rise to a possible asset whose existence will only be confirmed or otherwise by the occurrence of future events.

A contingent liability arises where an event has taken place prior to the year-end giving rise to a possible financial obligation whose existence will only be confirmed or otherwise by the occurrence of future events. Contingent liabilities can also arise in circumstances where a

provision would be made, except that it is not possible at the balance sheet date to measure the value of the financial obligation reliably.

Contingent assets and liabilities are not recognised in the net assets statement but are disclosed by way of narrative in the notes (see Note 25 and 26).

## Note 4. Critical Judgements in Applying Accounting Policies

### **Pension Fund liability**

The net Pension Fund liability is recalculated every three years by the appointed actuary, with annual updates in the intervening years. The methodology used is in line with accepted guidelines.

This estimate is subject to significant variances based on changes to the underlying assumptions which are agreed with the actuary and have been summarised in Note 17.

These actuarial revaluations are used to set future contribution rates and underpin the Fund's most significant investment management policies, for example in terms of the balance struck between longer term investment growth and short-term yield/return.

### **Investment in Border to Coast Pensions Partnership**

This investment has been valued at cost on the basis that fair value as at 31 March 2019 cannot be reliably estimated. Management have made this judgement because:

- Border to Coast Pensions Partnership only became licenced to trade in July 2018; and
- No published trading results are available which would allow a fair value to be calculated on a net asset basis or enable the accuracy of profit and cash flow projections contained in the company's business plan to be assessed with confidence.

## Note 5. Assumptions Made About the Future and Major Sources of Estimation Uncertainty

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the amounts reported for assets and liabilities at the balance sheet date and the amounts reported for the revenues and expenses during the year. Estimates and assumptions are made taking into account historical experience, current trends and other relevant factors. However, the nature of estimation means that the actual outcomes could differ from the assumptions and estimates.

The items in the accounts for the year ended 31 March 2019 for which there is a significant risk of material adjustment in the forthcoming financial year are as follows:

Item	Uncertainties	Effect if actual results differ from assumptions
Actual present value of promised retirement benefits (Note 18)	Estimation of the net liability to pay pensions depends on a number of complex judgements relating to the discount rate used, the rate at which salaries are projected to increase, changes in retirement ages, mortality rates and expected returns on investments. A firm of consulting actuaries are engaged to provide expert advice about the assumptions to be applied.	The effects of changes in the individual assumptions can be measured. For example: <ul style="list-style-type: none"> <li>1) a 0.5% increase in the discount rate assumption would result in a decrease of the pension liability of £359m.</li> <li>2) a 0.25% increase in assumed earnings inflation would increase the value of liabilities by approximately £28m.</li> <li>3) a 0.5% increase in the pension increase rate would increase the value of liabilities by approximately £320m.</li> <li>4) a one-year increase in assumed life expectancy would increase the liability by approximately £151m.</li> </ul>
Private Equity (Note 14)	<p>Private Equity investments are valued at fair value in accordance with British Venture Capital Association guidelines (2012). These investments are not publicly listed and as such there is a degree of estimation involved in the valuation.</p> <p>Private Equity valuations within the Pension Fund accounts are all based on the reported information held by the Council on 31 March each year.</p>	The total private equity investments in the Fund are £23m. There is a risk that these may be over or understated in the accounts by £5.5m.

## Note 6. Contributions Receivable

Contributions receivable are analysed below:

	2017-18 £000	2018-19 £000
<b>Employers</b>		
Normal	55,197	58,966
Deficit Recovery Funding	21,334	17,138
Additional – Augmentation	1,519	1,632
<b>Members</b>		
Normal	19,341	20,466
Additional Years	80	76
<b>Total Contributions Receivable</b>	<b>97,471</b>	<b>98,278</b>

These contributions are analysed by type of Member Body as follows:

	2017-18 £000	2018-19 £000
Lincolnshire County Council	37,659	40,061
Scheduled Bodies	48,461	53,239
Admission Bodies	11,351	4,978
<b>Total Contributions Receivable</b>	<b>97,471</b>	<b>98,278</b>

## Note 7. Transfers In From Other Pension Funds

	2017-18 £000	2018-19 £000
Individual Transfers from Other Schemes	6,861	7,312
Group Transfers from Other Schemes	-	-
<b>Total Transfers In from Other Pension Funds</b>	<b>6,861</b>	<b>7,312</b>

There were no material outstanding transfers due to the Pension Fund as at 31 March 2019.

## Note 8. Benefits Payable

	2017-18 £000	2018-19 £000
Pensions	68,800	73,016
Commutations and Lump Sum Retirement Benefits	14,482	17,791
Lump Sum Death Benefits	3,302	2,097
<b>Total Benefits Payable</b>	<b>86,584</b>	<b>92,904</b>

These benefits are analysed by type of Member Body as follows:

	2017-18 £000	2018-19 £000
Lincolnshire County Council	45,951	49,350
Scheduled Bodies	36,214	39,423
Admission Bodies	4,419	4,131
<b>Total Benefits Payable</b>	<b>86,584</b>	<b>92,904</b>

## Note 9. Payments To and On Account of Leavers

	2017-18	2018-19
	£000	£000
Individual Transfers to Other Schemes	4,390	6,990
Group Transfers from Other Schemes	-	419
Refunds to Members Leaving Service	215	394
<b>Total Payments To and On Account of Leavers</b>	<b>4,605</b>	<b>7,803</b>

There were no material outstanding transfers due from the Pension Fund as at 31 March 2019.

## Note 10. Management Expenses

	2017-18	2018-19
	£000	£000
Administrative Costs	1,047	1,128
Investment Management Expenses	10,476	9,429
Oversight and Governance Costs	455	461
<b>Total Management Expenses</b>	<b>11,978</b>	<b>11,018</b>

The external Audit fee for the year was £0.019m (£0.024m in 2017/18):

A further breakdown of the investment management expenses is shown below.

	2017-18	2018-19
	£000	£000
Transaction Costs	690	738
Management Fees	6,982	7,999
Performance Related Fees	2,146	609
Custody Fees	658	83
<b>Total Investment Management Expenses</b>	<b>10,476</b>	<b>9,429</b>

## Note 11. Investment Income

UK Equity	334	-	344	-
Unallocated Cash	3,322	0.2	3,039	0.1
<b>Total</b>	<b>2,167,883</b>	<b>100.0</b>	<b>2,343,688</b>	<b>100.0</b>

It is required to disclose where there is a concentration of investment (other than in UK Government Securities) which exceeds 5% of the total value of the net assets of the scheme. The investments that fall into this category are as follows:

Investment	31 March 2018		31 March 2019	
	£000	%	£000	%
Legal & General UK Equity Fund	403,793	18.4	429,762	18.2
Morgan Stanley Alternative Investments	268,167	12.2	290,056	12.3
Morgan Stanley Global Brands	178,715	8.2	219,728	9.3
Blackrock 1-5yr Corporate Bond Fund	126,293	5.8	139,253	5.9

## Note 12D. Stock Lending

The Fund lends stock to third parties under a stock lending agreement with the Fund's custodian, JPMorgan. The total amount of stock on loan at the year-end was £0.001m (£37.464m at 31 March 2018) and this value is included in the net assets statement to reflect the Fund's continuing economic interest in the securities on loan. As security for the stocks on loan, the Fund was in receipt of collateral at the year-end valued at £0.001m (£40.314m at 31 March 2018), which represented 107.2% of the value of securities on loan.

Stock-lending commissions are remitted to the Fund via the custodian. During the period the stock is on loan, the voting rights of the loaned stock pass to the borrower. Income received from stock lending activities, before costs, was £0.437m for the year ending 31 March 2019 (£0.123m at 31 March 2018) and is included within the 'Investment Income' figure detailed on the Pension Fund Account. There are no liabilities associated with the loaned assets.

## Note 13. Analysis of Derivatives

The holding in derivatives is used to hedge exposures to reduce risk in the fund. The use of any derivatives is managed in line with the investment management agreements in place between the Fund and the various investment managers.

The only direct derivative exposure that the Fund has is in forward foreign currency contracts. In order to maintain appropriate diversification and to take advantage of overseas investment returns, a significant proportion of the Fund's quoted equity portfolio is in overseas stock markets.

### Open forward Currency Contracts

Settlement	Currency Brought	Local Value 000	Currency Sold	Local Value 000	Asset Value £000	Liability Value £000
<b>Up to one month</b>	None					
<b>Over one month</b>	AUD	1,829	GBP	993		(7)
	CAD	7,754	GBP	4,448		(33)
	EUR	8,672	GBP	7,483	6	
	USD	303,513	GBP	231,967		(1,242)
<b>Total</b>					<b>6</b>	<b>(1,282)</b>
<b>Net Forward Currency Contracts at 31 March 2019</b>						<b>(1,276)</b>
<b>Prior Year Comparative</b>						
					77	(27)
<b>Net Forward Currency Contracts at 31 March 2018</b>						<b>50</b>

### Profit (Loss) of Forward Currency Deals and Currency Exchange

The profit or loss from any forward deals and from currency exchange is a result of normal trading of the Fund's managers who manage multi-currency portfolios. For 2018/19 this was a loss of £21.050m (£19.943m gain in 2017/18).

## Note 14. Fair Value – Basis of Valuation

The Fund's unquoted equities holding in Border to Coast Pensions Partnership is valued at cost (i.e. transaction price), as an appropriate estimate of fair value. A fair value cannot be otherwise established for these assets as at 31 March 2019 because the main trading vehicle of Border to Coast Pensions Partnership only became licenced to trade in July 2018 and the reliability of any observable or unobservable inputs used to calculate fair value cannot as yet be assessed with certainty.

All other investments are held at fair value in accordance with the requirements of the Code and IFRS13. The basis of the valuation of each class of investment asset is set out below. There has been no change in the valuation techniques used during the year. All assets have been valued using fair value techniques based on the characteristics of each instrument, with the overall objective of maximising the use of market-based information.

Description of asset	Valuation hierarchy	Basis of valuation	Observable and unobservable inputs	Key sensitivities affecting the valuations provided
Market quoted investments	Level 1	Published bid market price ruling on the final day of the accounting period	Not required	Not required
Exchange traded pooled investments	Level 1	Closing bid value on published exchanges	Not required	Not required
Forward foreign exchange derivatives	Level 2	Market forward exchange rates at the year-end	Exchange rate risk	Not required
Pooled investments	Level 2	Closing bid price where bid and offer prices are published Closing single price where single price published	NAV-based pricing set on a forward pricing basis	Not required
Unquoted Equities and Alternatives	Level 3	Comparable valuation of similar companies in accordance with <i>International Private Equity and Venture Capital Valuation Guidelines (2012)</i>	EBITDA multiple Revenue multiple Discount for lack of marketability Control premium	Valuations could be affected by post balance sheet events, changes to expected cashflows, or by any differences between audited and unaudited accounts

### Sensitivity of assets valued at level 3

Having analysed historical data and current market trends, and consulted with independent investment advisors and investment managers, the Fund has determined that the valuation methods described above are likely to be accurate to within the following ranges, and has set out below the consequent potential impact on the closing value of investments held at 31 March 2019.

	Assessed valuation range (+/-)	Value at 31 March 2019 £000	Value on increase £000	Value on decrease £000
Private Equity	24%	22,962	28,473	17,451
Alternatives	10%	290,056	319,062	261,050

All movements in the assessed valuation range derive from changes in the underlying profitability of component companies, the range in the potential movement of 24% for Private Equity and 10% for Alternatives is caused by how this profitability is measured since different methods (listed in the first table of Note 14 above) produce different price results.

### Note 14A. Fair Value Hierarchy

Asset and liability valuations have been classified into three levels, according to the quality and reliability of information used to determine fair values. Transfers between levels are recognised in the year in which they occur.

#### Level 1

Assets and liabilities at level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 comprise quoted equities, quoted fixed securities, quoted index linked securities and unit trusts.

#### Level 2

Assets and liabilities at level 2 are those where quoted market prices are not available; for example, where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value.

#### Level 3

Assets and liabilities at level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data.

The following table provides an analysis of the financial assets and liabilities of the Pension Fund grouped into levels 1 to 3, based on the level at which the fair value is observable.

	Quoted market price	Using observable inputs	With significant unobservable inputs	
Values at 31 March 2019	Level 1	Level 2	Level 3	Total
Observable Fair Value	£000	£000	£000	£000
Financial assets at fair value through profit and loss	1,755,869	239,658	313,024	2,308,551
Financial liabilities at fair value through profit and loss	-	-	(1,276)	(1,276)
<b>Net Investment Assets</b>	<b>1,755,869</b>	<b>239,658</b>	<b>311,748</b>	<b>2,307,275</b>

	Quoted market price	Using observable inputs	With significant unobservable inputs	
Values at 31 March 2018	Level 1	Level 2	Level 3	Total
Observable Fair Value	£000	£000	£000	£000
Financial assets at fair value through profit and loss	1,603,710	229,931	297,512	2,131,153
Financial liabilities at fair value through profit and loss	-	(2,016)	-	(2,016)
<b>Net Investment Assets</b>	<b>1,603,710</b>	<b>229,931</b>	<b>297,512</b>	<b>2,129,137</b>

The following assets have been carried at cost (no investment assets were carried at cost in 2017/18):

	Quoted market price	Using observable inputs	With significant unobservable inputs	
Values at 31 March 2019	Level 1	Level 2	Level 3	Total
Carried at Cost	£000	£000	£000	£000
Investment in Border to Coast Pensions Partnership	-	-	833	833
<b>Investments held at cost</b>	<b>-</b>	<b>-</b>	<b>833</b>	<b>833</b>

## I4B Reconciliation of Fair Value Measurements within Level 3

Period 2018/19						
	Market value at 31 March 2018	Purchases during the year and derivative payments	Sales during the year and derivative receipts	Unrealised gains/(losses)	Realised gains/(losses)	Market value at 31 March 2019
	£000	£000	£000	£000	£000	£000
Private Equity	29,345	423	(13,271)	(5,350)	11,815	22,962
Alternatives	268,167	78,966	(89,183)	52,093	(21,257)	288,786
<b>Total</b>	<b>297,512</b>	<b>79,389</b>	<b>(102,454)</b>	<b>46,743</b>	<b>(9,442)</b>	<b>311,748</b>

Period 2017/18						
	Market value at 31 March 2018	Purchases during the year and derivative payments	Sales during the year and derivative receipts	Unrealised gains/(losses)	Realised gains/(losses)	Market value at 31 March 2019
	£000	£000	£000	£000	£000	£000
Private Equity	43,334	663	(3,300)	(26,693)	15,341	29,345
Alternatives	245,375	53,814	(28,576)	(24,408)	21,962	268,167
<b>Total</b>	<b>288,709</b>	<b>54,477</b>	<b>(31,876)</b>	<b>(51,101)</b>	<b>37,303</b>	<b>297,512</b>

Unrealised and realised gains and losses are recognised in the profit and losses on disposal and change in market values line of the Fund account.

## Note 15. Financial Instruments

### Note 15A. Classification of Financial Instruments

The following table analyses the carrying amounts of financial instruments by category and net assets statement heading. No financial assets were reclassified during the accounting period.

31 March 2019				
	Fair value through profit and loss	Assets at amortised cost	Liabilities at amortised cost	Fair value through comprehensive income
	£000	£000	£000	£000
<b>Financial Assets</b>				
Unquoted Equity Holding in Border to Coast Pensions Partnership				833
Equities	818,260			
Pooled investments				
Property	194,973			
Infrastructure	44,437			
Private Equity	22,962			
Bonds	283,158			
Equities	649,490			
Alternatives	290,056			
Cash		47,123		
Other Investment Balances	5,215			
Debtors		9,092		
	<b>2,308,551</b>	<b>56,215</b>	<b>-</b>	<b>833</b>
<b>Financial Liabilities</b>				
Other Investment Balances	(1,276)			
Creditors			(3,129)	
	<b>(1,276)</b>	<b>-</b>	<b>(3,129)</b>	<b>-</b>
<b>Grand Total</b>	<b>2,307,275</b>	<b>56,215</b>	<b>(3,129)</b>	<b>833</b>

31 March 2018				
	Fair value through profit and loss	Assets at amortised cost	Liabilities at amortised cost	Fair value through comprehensive income
	£000	£000	£000	£000
<b>Financial Assets</b>				
Unquoted Equity Holding in Border to Coast Pensions Partnership				
Equities	751,286			
Pooled investments				
Property	194,461			
Infrastructure	35,420			
Private Equity	29,345			
Bonds	264,097			
Equities	582,508			
Alternatives	268,167			
Cash		54,894		
Other Investment Balances	5,869			
Debtors		7,705		
	<b>2,131,153</b>	<b>62,599</b>	-	-
<b>Financial Liabilities</b>				
Other Investment Balances	(2,016)			
Creditors			(2,379)	
	<b>(2,016)</b>	-	<b>(2,379)</b>	-
<b>Grand Total</b>	<b>2,129,137</b>	<b>62,599</b>	<b>(2,379)</b>	-

## 15B Net Gains and Losses on Financial Instruments

	2017/18 £000	2018/19 £000
<b>Financial Assets</b>		
Fair Value through Profit and Loss	35,084	178,619
<b>Total</b>	<b>35,084</b>	<b>178,619</b>

The authority has not entered into any financial guarantees that are required to be accounted for as financial instruments.

## Note 16. Nature and Extent of Risks Arising from Financial Instruments

### **Risk and Risk Management**

The Fund's primary long-term risk is that its assets will fall short of its liabilities (i.e. the promised benefits payable to members). Therefore, the aim of investment risk management is to minimise the risk of an overall reduction in the value of the Fund and to maximise the opportunity for gains across the Fund. This is achieved through asset diversification to reduce exposure to market risk (price risk, currency risk and interest rate risk) and credit risk to an acceptable level. In addition, the Fund manages its liquidity risk to ensure there is sufficient liquidity to meet the Fund's forecast cash flows. The Council manages these investment risks as part of its overall Pension Fund risk management programme.

#### **a) Market Risk**

Market risk is the loss from fluctuations in equity and commodity prices, interest and foreign exchange rates and credit spreads. The Fund is exposed to market risk from its investment activities, particularly through its equity holdings. The level of risk exposure depends on market conditions, expectations of future prices and yield movements and the asset mix.

To mitigate market risk, the Pension Fund invests in a diversified pool of assets to ensure a reasonable balance between different categories, having taken advice from the Fund's Investment Consultant. The management of the assets is split between a number of managers with different performance targets and investment strategies. Risks associated with the strategy and investment returns are included as part of the quarterly reporting to the Pensions Committee where they are monitored and reviewed.

#### Other Price Risk

Price risk represents the risk that the value of a financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or foreign exchange risk), whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all such instruments in the market.

The Fund is exposed to share and derivative price risk. This arises from investments held by the Fund for which the future price is uncertain. All securities investments present a risk of loss of capital. The maximum risk resulting from financial instruments is determined by the fair value of the financial instrument.

The Fund's investment managers mitigate this price risk through diversification, and the selection of securities and other financial instruments is monitored by the Council to ensure it is within limits specified in the Fund investment strategy.

## Other Price Risk - Sensitivity Analysis

Following analysis of historical data and expected investment return during the financial year, the Fund, in consultation with a fund manager, has determined that the following movements in market price are reasonably possible for 2019/20, assuming that all other variables, in particular foreign exchange rates and interest rates, remain the same:

Asset Type	Potential Market Movements (+/-)
UK Bonds	5.0%
UK Equities	13.0%
Overseas Equities	13.0%
Property	15.0%
Infrastructure	17.0%
Private Equity	24.0%
Alternatives	10.0%

Had the market price of the Fund's investments increased/decreased in line with the above, the change in net assets available to pay benefits would have been as follows (the prior year comparative is shown below):

Asset Type	Value at 31 March 2019 £000	Percentage Change %	Value on Increase £000	Value on Decrease £000
UK Bonds	283,158	5.0%	297,316	269,000
UK Equities	429,765	13.0%	485,634	373,896
Overseas Equities	1,037,956	13.0%	1,172,923	903,047
Property	194,973	15.0%	224,219	165,727
Infrastructure	44,437	17.0%	51,991	36,883
Private Equity	22,962	24.0%	28,473	17,451
Alternatives	290,056	10.0%	319,062	261,050
<b>Total</b>	<b>2,303,336</b>		<b>2,579,618</b>	<b>2,027,054</b>

Asset Type	Value at 31 March 2018 £000	Percentage Change %	Value on Increase £000	Value on Decrease £000
UK Bonds	264,097	6.0%	279,943	248,251
UK Equities	403,796	10.0%	444,176	363,416
Overseas Equities	929,997	10.0%	1,022,997	836,997
Property	194,461	16.0%	225,575	163,347
Infrastructure	35,420	18.0%	41,796	29,044
Private Equity	29,345	26.0%	36,795	21,715
Alternatives	268,167	10.0%	294,984	241,350
<b>Total</b>	<b>2,125,283</b>		<b>2,346,446</b>	<b>1,904,120</b>

## Interest rate risk

The Fund invests in financial assets for the primary purpose of obtaining a return on investments. These investments are subject to interest rate risk, which represent the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes to market interest rates.

The Fund's direct exposure to interest rate movements as at 31 March 2019 and 31 March 2018 is set out below. These disclosures present interest rate risk based on the underlying financial assets at fair values.

#### Interest rate risk - sensitivity analysis

The Fund recognises that interest rates can vary and can affect both income to the Fund and carrying value of Fund assets, both of which affect the value of the net assets available to pay benefits. The analysis that follows assumes that all other variables, in particular exchange rates, remain constant, and shows the effect in the year on the net assets available to pay benefits of a +/- 1% change in interest rates.

Assets Exposed to Interest Rate Risk	Value at 31 March 2019	Percentage Movement on 1% change in interest Rates	Value on Increase	Value on Decrease
	£000		£000	£000
Cash and cash equivalents	36,413	-	36,413	36,413
Cash balances	10,710	-	10,710	10,710
Bonds	283,158	2,832	285,990	280,326
<b>Total</b>	<b>330,281</b>	<b>2,832</b>	<b>333,113</b>	<b>327,449</b>

Assets Exposed to Interest Rate Risk	Value at 31 March 2018	Percentage Movement on 1% change in interest Rates	Value on Increase	Value on Decrease
	£000		£000	£000
Cash and cash equivalents	38,746	0	38,746	38,746
Cash balances	16,148	0	16,148	16,148
Bonds	264,097	2,641	266,738	261,456
<b>Total</b>	<b>318,991</b>	<b>2,641</b>	<b>321,632</b>	<b>316,350</b>

Income Exposed to Interest Rate Risk	Value at 31 March 2019	Percentage Movement on 1% change in interest Rates	Value on Increase	Value on Decrease
	£000	%	£000	£000
Cash deposits, cash and cash equivalents	97	1	98	96
Bonds	-	-	-	-
<b>Total</b>	<b>97</b>	<b>-</b>	<b>98</b>	<b>96</b>

Income Exposed to Interest Rate Risk	Value at 31 March 2018	Percentage Movement on 1% change in interest Rates	Value on Increase	Value on Decrease
	£000	%	£000	£000
Cash deposits, cash and cash equivalents	61	1	62	60
Bonds	0	0	0	0
<b>Total</b>	<b>61</b>	<b>1</b>	<b>62</b>	<b>60</b>

This analysis demonstrates that a 1% increase in interest rates will not affect the interest received on fixed interest assets but will reduce their fair value, and vice versa. Changes in interest rates do not impact on the value of cash and cash equivalent balances but they will affect the interest income received on those balances.

### Currency risk

Currency risk represents the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Fund is exposed to currency risk on financial instruments that are denominated in any currency other than sterling. The Fund holds both monetary and non-monetary assets denominated in currencies other than UK sterling.

Following analysis of historical data and in consultation with an investment manager, the Fund considers the likely volatility associated with foreign exchange rate movements to be not more than 8%, as measured by one standard deviation (8% in 2017/18). An 8% strengthening/weakening of the pound against various currencies in which the Fund holds investments would increase/decrease the net asset available to pay benefits as follows:

Assets Exposed to Currency Risk	Value at 31 March 2019	Percentage Market Movement	Value on Increase	Value on Decrease
	£000	£000	£000	£000
Overseas/Global Equities	818,256	65,460	883,716	752,796
<b>Pooled Investments:</b>				
Overseas/Global Equities	219,728	17,578	237,306	202,150
Overseas/Global Property	14,792	1,183	15,975	13,609
Overseas/Global Infrastructure	3,979	318	4,297	3,661
Overseas/Global Private Equity	22,962	1,837	24,799	21,125
Overseas/Global Alternatives	290,056	23,204	313,260	266,852
<b>Total</b>	<b>1,369,773</b>	<b>109,580</b>	<b>1,479,353</b>	<b>1,260,193</b>

Assets Exposed to Currency Risk	Value at 31 March 2018	Percentage Market Movement	Value on Increase	Value on Decrease
	£000	£000	£000	£000
Overseas/Global Equities	751,282	60,103	811,385	691,179
<b>Pooled Investments:</b>				
Overseas/Global Equities	178,715	14,297	193,012	164,418
Overseas/Global Property	15,918	1,273	17,191	14,645
Overseas/Global Infrastructure	1,498	120	1,618	1,378
Overseas/Global Private Equity	29,345	2,348	31,693	26,997
Overseas/Global Alternatives	268,167	21,453	289,620	246,715
<b>Total</b>	<b>1,244,925</b>	<b>99,594</b>	<b>1,344,519</b>	<b>1,145,331</b>

## **b) Credit Risk**

Credit risk represents the risk that the counterparty to a transaction or a financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss. The market values of investments generally reflect an assessment of credit in their pricing and consequently the risk of loss is implicitly provided for in the carrying value of the fund's financial assets and liabilities.

The Fund is additionally exposed to credit risk through securities lending and its daily treasury activities.

The securities lending programme is run by the Fund's custodian, JPMorgan, who manage and monitor the counterparty risk, collateral risk and the overall lending programme. The minimum level of collateral for securities on loan is 102%, however more collateral may be required depending upon type of transaction. This level is assessed daily to ensure it takes account of market movements. To further mitigate risk, JPMorgan provide an indemnity to cover borrower default, overnight market risks, fails on return of loaned securities and entitlements to securities on loan. Securities lending is capped by investment regulations and statutory limits are in place to ensure that no more than 25% of eligible assets can be on loan at any one time.

The Pension Fund's bank account is held at Barclays, which holds an 'A' long term credit rating (Fitch Credit Rating Agency) and it maintains its status as a well-capitalised and strong financial organisation. The management of the cash held in this account is carried out by the Council's Treasury Manager, in accordance with an agreement signed by the Pensions Committee and the Council. The agreement stipulates that the cash is pooled with the Council's cash and managed in line with the policies and practices followed by the Council, as outlined in the CIPFA Code of Practice for Treasury Management in the Public Services and detailed in its Treasury Management Practices.

## **c) Liquidity risk**

Liquidity risk represents the risk that the Fund will not be able to meet its financial obligations as they fall due. The Council takes steps to ensure that the Fund has adequate cash resources to meet its commitments.

The Fund holds a working cash balance in its own bank account to cover the payment of benefits and other lump sum payments. At an investment level, the Fund holds a large proportion of assets in listed equities - instruments that can be liquidated at short notice, normally three working days. As at 31 March 2019, these assets totalled £1,751.908m (£1,598.890m as at 31 March 2018), with a further £47.123m held in cash (£54.893m as at 31 March 2018). Currently, the Fund is cash flow positive each month (i.e. the contributions received exceed the pensions paid). This position is monitored regularly and reviewed at least every three years alongside the Triennial Valuation.

#### **d) Outsourcing risk**

An additional area of risk is in the outsourcing of services to third party service organisations. The main service areas that the Pension Fund outsources, and the controls in place to monitor them, are:

##### Pensions Administration

This service is undertaken by West Yorkshire Pension Fund (WYPF), through a shared service agreement. WYPF present to the Pensions Committee on a quarterly basis and both the County Finance Officer and the Head of Pensions sit on the Collaboration Board which meets quarterly.

##### Custody, Accounting and Performance Measurement

JPMorgan are the Pension Fund's appointed Custodian, with responsibility for safeguarding the assets of the Fund. JPMorgan are a global industry leader, with more than \$21 trillion in assets under custody. They have been the Fund's Custodian since 2004, and were reappointed at the end of their seven year contract in March 2011. Monthly reconciliations of holdings are performed to ensure that the Custodian's records match those of the managers. Regular meetings and conference calls are held to discuss performance, and quarterly key performance indicators are produced.

##### Fund Management

The Fund appoints a number of segregated and pooled fund managers to manage portions of the Pension Fund. All appointments meet the requirements set out in the LGPS (Management and Investment of Funds) Regulations 2016. Managers report performance on a monthly basis to officers and performance is reported to the Pensions Committee on a quarterly basis. All segregated managers present in person to the Committee at least once a year. Regular meetings and discussions are held between officers and managers.

## Note 17. Funding Arrangements

In line with the Local Government Pension Scheme Regulations 2013, the Fund's actuary undertakes a funding valuation every three years for the purpose of setting employer contribution rates for the forthcoming triennial period. The last such valuation took place as at 31 March 2016 and the next valuation will take place as at 31 March 2019.

The key elements of the funding policy are:

- 1) to ensure the long-term solvency of the fund, i.e. that sufficient funds are available to meet all pension liabilities as they fall due for payment;
- 2) to ensure that employer contribution rates are as stable as possible;

- 3) to minimise the long-term cost of the scheme by recognising the link between assets and adopting an investment strategy that balances risk and return;
- 4) to reflect the different characteristics of employing bodies in determining contribution rates where reasonable to do so; and
- 5) to use reasonable measures to reduce the risk to other employers and ultimately to the council tax payer from an employer defaulting on its pension obligations.

The aim is to achieve 100% solvency over a period of 20 years and to provide stability in employer contribution rates, where possible. Solvency is achieved when the funds held, plus future expected investment returns and future contributions, are sufficient to meet expected future pension benefits payable. When an employer's funding level is less than the 100% funding target, then a deficit recovery plan will be put in place requiring additional employer contributions.

At the 2016 actuarial valuation, the Fund was assessed as 76.9% funded (71.5% at the March 2013 valuation). This corresponded to a deficit of £529m (2013 valuation: £597m) at that time.

The table below summarises the whole Fund Primary and Secondary Contribution rates at this triennial valuation. The Primary rate is the payroll weighted average of the underlying individual employer primary rates and the Secondary rate is the total of the underlying individual employer secondary rates (before any pre-payment or capitalisation of future contributions), calculated in accordance with the Regulations and CIPFA guidance.

Primary Rate (% of pay)		Secondary Rate (£000)	
1 April 2017-31 March 2020	2017/18	2018/19	2019/20
17.4%	18,004	20,539	23,222

At the previous formal valuation at 31 March 2013, a different regulatory regime was in force. Therefore a contribution rate that is directly comparative to the rates above is not provided.

Individual employers' rates will vary from the common contribution rate depending on the demographic and actuarial factors particular to each employer. Full details of the contribution rates payable can be found in the 2016 Actuarial Valuation report on the Fund's website.

The market value of the Fund's assets as at the valuation date are compared against the value placed on the Fund's liabilities in today's terms (calculated using a market-based approach). By maintaining a link to the market in both cases, this helps ensure that the assets and liabilities are valued in a consistent manner. The calculation of the Fund's liabilities also explicitly allows for expected future pay and pension increases.

The principal assumptions were as follows:

### Financial Assumptions

<b>Future Assumed Returns at 2016</b>	<b>%</b>
UK Equities	5.9
Overseas Equities	5.5
Fixed Interest GILTS	2.2
Index Linked GILTS	2.2
Corporate Bonds	3.4
Property	3.8
Cash	2.5

<b>Other Financial Assumptions</b>	<b>31 March 2013</b>	<b>31 March 2016</b>
	<b>% p.a.</b>	<b>% p.a.</b>
Discount rate	4.6	4.0
Price inflation (RPI)	3.3	3.2
Pay increases*	3.8	2.6
Pension increases	2.5	2.1
Revaluation of deferred pension	2.5	2.1
Revaluation of accrued CARE pension	2.5	2.1
Expenses	0.4	0.5

\*An allowance is also made for promotional pay increases

### Demographic Assumptions

The baseline longevity assumptions are a bespoke set specifically tailored to fit the membership profile of the Fund. These base tables are then projected using the CMI 2013 Model, allowing for a long-term rate of improvement of 1.25% per year. The assumed life expectancy from age 65 is as follows:

	<b>31 March 2013</b>	<b>31 March 2016</b>
<b>Male</b>		
Current Pensioners	22.2 years	22.1 years
Future Pensioners	24.5 years	24.1 years
<b>Female</b>		
Current Pensioners	24.4 years	24.4 years
Future Pensioners	26.8 years	26.6 years

### Commutation assumption

It is assumed that future retirees will take 50% of the maximum additional tax-free lump sum up to HMRC limits for pre-April 2008 service and 75% of the maximum for post-April 2008 service.

### 50:50 option

It is assumed that 2% of active members (evenly distributed across age, service length and salary range) will take up the 50:50 option in the LGPS 2014 scheme.

## Note 18. Actuarial Present Value of Promised Retirement Benefits

Below is the note provided by the Fund's Actuary, Hymans Robertson; to provide the Actuarial present value of the promised retirement benefits as required under the Code. The report titled 'Actuarial Valuation as at 31 March 2019 for IAS19 purposes' referred to in the note can be obtained from the Pensions section at the County Council.

### Pension Fund Accounts Reporting Requirement

#### Introduction

CIPFA's Code of Practice on Local Authority Accounting 2018/19 requires Administering Authorities of LGPS funds that prepare pension fund accounts to disclose what IAS26 refers to as the actuarial present value of promised retirement benefits. I have been instructed by the Administering Authority to provide the necessary information for the Lincolnshire Pension Fund ("the Fund").

The actuarial present value of promised retirement benefits is to be calculated similarly to the Defined Benefit Obligation under IAS19. There are three options for its disclosure in the pension fund accounts:

- showing the figure in the Net Assets Statement, in which case it requires the statement to disclose the resulting surplus or deficit;
- as a note to the accounts; or
- by reference to this information in an accompanying actuarial report.

If an actuarial valuation has not been prepared at the date of the financial statements, IAS26 requires the most recent valuation to be used as a base and the date of the valuation disclosed. The valuation should be carried out using assumptions in line with IAS19 and not the Fund's funding assumptions.

#### Present value of promised retirement benefits

Year ended	31 March 2019	31 March 2018
Active members (£m)	1,793	1,465
Deferred members (£m)	843	750
Pensioners (£m)	1,131	1,128
<b>Total (£m)</b>	<b>3,767</b>	<b>3,343</b>

The promised retirement benefits at 31 March 2019 have been projected using a roll forward approximation from the latest formal funding valuation as at 31 March 2016. The approximation involved in the roll forward model means that the split of benefits between the three classes of member may not be reliable. However, I am satisfied that the total figure is a reasonable estimate of the actuarial present value of benefit promises.

The above figures include both vested and non-vested benefits, although the latter is assumed to have a negligible value. Further, I have not made any allowance for unfunded benefits.

It should be noted the above figures are appropriate for the Administering Authority only for preparation of the pension fund accounts. They should not be used for any other purpose (i.e. comparing against liability measures on a funding basis or a cessation basis).

#### Assumptions

The assumptions used are those adopted for the Administering Authority's IAS19 report and are different as at 31 March 2019 and 31 March 2018. I estimate that the impact of the change in financial assumptions

to 31 March 2019 is to increase the actuarial present value by £289m. There is no impact from any change in the demographic and longevity assumptions because they are identical to the previous period.

### Financial assumptions

Year ended (% p.a.)	31 March 2019	31 March 2018
Pension Increase Rate	2.5%	2.4%
Salary Increase Rate	2.9%	2.8%
Discount Rate	2.4%	2.7%

### Longevity assumptions

Life expectancy is based on the Fund's VitaCurves with improvements in line with the CMI 2013 model, assuming the current rate of improvements has reached a peak and will converge to long term rate of 1.25% p.a. Based on these assumptions, the average future life expectancies at age 65 are summarised below:

	Males	Females
Current pensioners	22.1 years	24.4 years
Future pensioners (assumed to be aged 45 at the latest formal valuation)	24.1 years	26.6 years

Please note that the longevity assumptions have not changed since the previous IAS26 disclosure for the Fund.

### Commutation assumptions

An allowance is included for future retirements to elect to take 50% of the maximum additional tax-free cash up to HMRC limits for pre-April 2008 service and 75% of the maximum tax-free cash for post-April 2008 service.

### Sensitivity Analysis

CIPFA guidance requires the disclosure of the sensitivity of the results to the methods and assumptions used. The sensitivities regarding the principal assumptions used to measure the liabilities are set out below:

Sensitivity to the assumptions for the year ended 31 March 2019	Approximate % increase to liabilities	Approximate monetary amount (£m)
0.5% p.a. increase in the Pension Increase Rate	8%	320
0.5% p.a. increase in the Salary Increase Rate	1%	56
0.5% p.a. decrease in the Real Discount Rate	11%	400

The principal demographic assumption is the longevity assumption. For sensitivity purposes, I estimate that a 1 year increase in life expectancy would approximately increase the liabilities by around 3-5%.

### Professional notes

This paper accompanies my covering report titled 'Actuarial Valuation as at 31 March 2019 for accounting purposes'. The covering report identifies the appropriate reliances and limitations for the use of the figures in this paper, together with further details regarding the professional requirements and assumptions.

Prepared on 17 April 2019 by:

Anne Cranston AFA

For and on behalf of Hymans Robertson LLP

## Note 19. Long Term Debtors

	31 March 2018 £000	31 March 19 £000
Magistrates Court – deferred member liabilities	426	-
<b>Total</b>	<b>426</b>	<b>-</b>

## Note 20. Current Assets

	31 March 2018 £000	31 March 19 £000
<b>Short Term Debtors</b>		
Contributions due - Employers	4,561	5,238
Contributions due - Employees	1,288	1,375
Sundry Debtors	1,430	2,479
<b>Total Short Term Debtors</b>	<b>7,279</b>	<b>9,092</b>
Cash Balances	16,148	10,710
<b>Cash Balances</b>	<b>16,148</b>	<b>10,710</b>
<b>Total Current Assets</b>	<b>23,427</b>	<b>19,802</b>

## Note 21. Current Liabilities

	31 March 2018 £000	31 March 19 £000
<b>Creditors</b>		
Contributions – paid in advance	(19)	(34)
Sundry Debtors	(2,360)	(3,095)
<b>Total</b>	<b>(2,379)</b>	<b>(3,129)</b>

## Note 22. Additional Voluntary Contributions

Scheme members may make additional contributions to enhance their pension benefits. All Additional Voluntary Contributions (AVC) are invested in a range of investment funds managed by the Prudential plc. At the year end, the value of AVC investments (excluding any final bonus) amounted to £8.683m (£8.651m in 2017/18). Member contributions of £0.998m (£1.021m in 2017/18) were received by the Prudential in the year to 31 March and £1.700m (£1.814m in 2017/18) was paid out to members.

The value of AVC funds and contributions received in the year are not included in the Fund Account and Net Assets Statement.

## Note 23. Related Party Transactions

The Lincolnshire Pension Fund is administered by Lincolnshire County Council. During the reporting period, the Council incurred costs of £0.236m in relation to the administration of the Fund and was subsequently reimbursed by the Fund for these expenses. The Council is also the single largest employer of members of the Pension Fund and contributed £31.312m to the Fund in 2018/19. All monies owing to and due from the Fund were paid in year.

The Treasury Management section of the County Council acts on behalf of the Pension Fund to manage the cash position held in the Pension Fund bank account. This is amalgamated with the County Council's cash and lent out in accordance with the Council's Treasury Management policies. During the year, the average balance in the Pension Fund bank account was £10.804m and interest of £0.088m was earned over the year.

Each member of the Pensions Committee is required to declare their interests at each meeting, and asked to sign an annual declaration disclosing any related party transactions. One Committee member, A Antcliff (employee representative), is a contributing member of the Pension Fund as at 31 March 2019.

## Note 24. Key Management Personnel

Paragraph 3.9.4.4 of the Code exempts local authorities from the key management personnel disclosure requirements of IAS24, on the basis that the disclosure requirements for officer remuneration and members' allowances detailed in section 3.4 of the Code (which are derived from the requirements of Schedule 1 of the Accounts and Audit (England) Regulations 2015) satisfy the key management and personnel disclosure requirements of paragraph 16 of IAS24. This applies in equal measure to the accounts of Lincolnshire Pension Fund.

The Fund does not employ any staff directly. Lincolnshire County Council employs the staff involved in providing the duties as Administering Authority for the Fund (the pensions administration service is provided by West Yorkshire Pension Fund in partnership with the Lincolnshire Pension Fund). Disclosure of the remuneration awarded to key management personnel is included in the officers' remuneration disclosure in the notes to the Lincolnshire County Council Statement of Accounts for 2018/19 (at note 34), which is available on the Council's website at [www.lincolnshire.gov.uk/finances](http://www.lincolnshire.gov.uk/finances).

## Note 25. Contingent Liabilities and Contractual Commitments

At 31 March 2019 the fund had outstanding capital commitments (investments) to twenty investment vehicles, amounting to £37.346m. These commitments relate to outstanding call payments due on unquoted limited partnerships making investments in private equity, property or infrastructure funds. The amounts 'called' by these funds are irregular in both size and timing over the lifetime of the funds.

## Note 26. Contingent Assets

Six admitted body employers in the Fund hold insurance bonds or equivalent cover to guard against the possibility of being unable to meet their pension obligations. These arrangements are drawn in favour of the Pension Fund and payment will only be triggered in the event of employer default.

No such defaults have occurred in 2018/19 (also none for 2017/18).

## Note 27. Impairment Losses

The Fund has no recognised impairment losses.

## Note 28. Exchange Rates Applied

The exchange rates used at 31 March 2019 per £1 sterling were:

Australian Dollar	1.8344	Japanese Yen	144.2281
Brazilian Real	5.0711	Korean Won	1,479.0921
Canadian Dollar	1.7408	Norwegian Krone	11.2213
Swiss Franc	1.2977	Swedish Krona	12.0861
Danish Krone	8.6635	Singapore Dollar	1.7650
Euro	1.1605	Taiwan Dollar	40.1606
Hong Kong Dollar	10.2289	US Dollar	1.3030
Indonesian Rupiah	18,555.4328		

## Glossary of Terms

**Actuary** – An independent consultant who advises the Fund and every three years formally reviews the assets and liabilities of the Fund and produces a report on the Fund's financial position, known as the Actuarial Valuation.

**Admitted Body** – Private contractors that are admitted to the LGPS to protect member pension rights following a TUPE transfer, or a body which provides a public service which operates otherwise than for the purposes of gain.

**Alternatives** – Investment products other than traditional investments of stocks, bonds, cash or property. The term is used for tangible assets such as infrastructure and property, and financial assets such as private equity and derivatives.

**Asset Allocation** – Distribution of investments across asset categories, such as cash, equities and bonds. Asset allocation affects both risk and return, and is a central concept in financial planning and investment management.

**Asset Pooling** – In the context of the LGPS, this is the collaboration of several LGPS Funds to pool their investment assets in order to generate savings from economies of scale, as requested by MHCLG: 'significantly reducing costs whilst maintaining investment performance'.

**Auto Enrolment** – UK employers have to automatically enrol their staff into a workplace pension if they meet certain criteria, and repeat this process every three years to re-enrol any employees that have opted out of the pension scheme.

**Bonds** – Certificate of debt issued by a government or company, promising regular payments on a specified date or range of dates, usually with final capital payment at redemption.

**Career Average Revalued Earnings (CARE) Scheme** – The pension at retirement will relate to your average salary over your career (while paying into the pension scheme). More precisely for the LGPS, it is based on pensionable earnings, increased in line with inflation as measured by the Consumer Price Index (CPI).

**CIPFA** – Chartered Institute of Public Finance & Accountancy.

**Consumer Price Index (CPI)** – The rate of increase in prices for goods and services. CPI is the official measure of inflation of consumer prices of the United Kingdom.

**Counterparty** – The other party that participates in a financial transaction. Every transaction must have a counterparty in order for the transaction to complete. More specifically, every buyer of an asset must be paired up with a seller that is willing to sell and vice versa.

**Custodian** – Organisation which is responsible for the safekeeping of assets, income collection and settlement of trades for a portfolio, independent from the asset management function.

**Defined Benefit** – An employer-sponsored retirement plan where employee benefits are assessed based on a formula using factors such as salary history and duration of employment. Public sector pension schemes are defined benefit schemes.

**Derivative** – Financial instrument whose value is dependent on the value of an underlying index, currency, commodity or other asset.

**Diversification** – Risk management technique which involves spreading investments across a range of different investment opportunities, thus helping to reduce overall risk. Risk reduction arises from the different investments not being perfectly correlated. Diversification can apply at various levels, such as diversification between countries, asset classes, sectors and individual securities.

**Equities** – Ordinary shares in UK and overseas companies traded on a stock exchange. Shareholders have an interest in the profits of the company and are entitled to vote at shareholders' meetings.

**Fiduciary Duty** – A legal obligation of one party to act in the best interest of another. The obligated party is typically a fiduciary, that is, someone entrusted with the care of money or property.

**Final Salary** – One type of defined benefit pension scheme where employee benefits are based on the person's final salary when they retire. The LGPS Scheme has moved from this to a CARE (career average revalued earnings) scheme in 2014.

**Funding Level** – The ratio of a pension fund's assets to its liabilities. Normally relates to defined benefit pension funds and used as a measure of the fund's ability to meet its future liabilities.

**IFRS** – International Financial Reporting Standards. Aim to standardise the reporting and information disclosed in the financial accounts of companies and other organisations globally.

**Infrastructure** – The public facilities and services needed to support residential development, including highways, bridges, schools, and sewer and water systems. A term usually associated with investment in transport, power and utilities projects.

**Investment Strategy** – The investor's long-term distribution of assets across various asset classes taking into consideration their objectives, their attitude to risk and timescale.

**Liabilities** – Financial liabilities are debts owed to creditors for outstanding payments due to be paid. Pension liabilities are the pensions benefits and payments that are due to be paid when someone retires.

**Market Value** – The price at which an investment can be bought or sold at a given date.

**Pooled Investment Fund** – A fund managed by an external Fund Manager in which a number of investors buy units. The total fund is then invested in a particular market or region. The underlying assets the funds hold on behalf of clients are quoted assets such as fixed interest bonds and equity shares. They are used as an efficient low-risk method of investing in the asset classes.

**Portfolio** – Block of assets generally managed under a single mandate.

**Private Equity** – Shares in unquoted companies. Usually high risk, high return in nature.

**Return** – Increase in value of an investment over a period of time, expressed as a percentage of the value of the investment at the start of the period.

**Risk** – Likelihood of a return different from that expected and the possible extent of the difference. Also used to indicate the volatility of different assets.

**Scheduled Body** – Public sector employers or designating bodies that have an automatic right and requirement to be an employer within the LGPS.

**Settlement** – Payment or collection of proceeds after trading a security. Settlement usually takes place sometime after the deal and price are agreed.

**Stock Lending** – Lending of stock from one investor to another that entitles the lender to continue to receive income generated by the stock plus an additional payment by the borrower.

**Target** – Managers are set a target for investment performance, such as 1% above benchmark per year over three year rolling periods.

**Triennial Actuarial Valuation** – Every three years the actuary formally reviews the assets and liabilities of the Lincolnshire Fund and produces a report on the Fund's financial position.

# Audit Opinion

## Additional Information Available

Additional information regarding the Pension Fund and the scheme is available by going to the shared service website **[www.wypf.org.uk](http://www.wypf.org.uk)**

The following documents are included in this report, and can also be found by selecting Policy Statements on the home page, and then Lincolnshire Policies, on the WYPF shared website.

### Funding Strategy Statement

This document is prepared in collaboration with the Fund's actuary, Hymans Robertson, and sets out the Fund's approach to funding its liabilities. It is reviewed in detail every three years.

### Investment Strategy Statement

This document describes the key issues that govern the investment of the Pension Fund, including the approach to risk, the approach to pooling and the approach to environmental, social and governance (ESG) factors.

### Communications Policy

This document details the methods of communication that the Pension Fund uses to comply with relevant legislation and to ensure that individuals and employers receive accurate and timely information about their pension arrangements.

### Governance Compliance Statement

This document details how the Pension Fund is governed, and sets out where it complies with best practice guidance as published by the Ministry of Housing, Communities and Local Government.

### Pensions Administration Strategy

This document details how the Pension Fund is administered within the shared service. It outlines the processes and procedures to allow the Funds and employers to work together in a cost-effective way to administer the LGPS, whilst maintaining an excellent level of service to members.

Funding strategy and links to investment strategy

Statutory reporting and comparison to other LGPS Funds

Appendices

# 1 Introduction

## 1.1 What is this document?

This is the Funding Strategy Statement (FSS) of the Lincolnshire Pension Fund (“the Fund”), which is administered by Lincolnshire County Council, (“the Administering Authority”).

It has been prepared by the Administering Authority in collaboration with the Fund’s actuary, Hymans Robertson LLP, and after consultation with the Fund’s employers, investment adviser and approval by the Pensions Committee. It is effective from 31 March 2017.

## 1.2 What is the Lincolnshire Pension Fund?

The Fund is part of the national Local Government Pension Scheme (LGPS). The LGPS was set up by the UK Government to provide retirement and death benefits for local government employees, and those employed in similar or related bodies, across the whole of the UK. The Administering Authority runs the Lincolnshire Pension Fund, in effect the LGPS for the Lincolnshire area, to make sure it:

- receives the proper amount of contributions from employees and employers, and any transfer payments;
- invests the contributions appropriately, with the aim that the Fund’s assets grow over time with investment income and capital growth; and
- uses the assets to pay Fund benefits to the members (as and when they retire, for the rest of their lives), and to their dependants (as and when members die), as defined in the LGPS Regulations. Assets are also used to pay transfer values and administration costs.

The roles and responsibilities of the key parties involved in the management of the Fund are summarised in [Appendix B](#).

## 1.3 Why does the Fund need a Funding Strategy Statement?

Employees’ benefits are guaranteed by the LGPS Regulations, and do not change with market values or employer contributions. Investment returns will help pay for some of the benefits, but probably not all, and certainly with no guarantee. Employees’ contributions are fixed in those Regulations also, at a level which covers only part of the cost of the benefits.

Therefore, employers need to pay the balance of the cost of delivering the benefits to members and their dependants.

The FSS focuses on how employer liabilities are measured, the pace at which these liabilities are funded, and how employers or pools of employers pay for their own liabilities. This statement sets out how the Administering Authority has balanced the conflicting aims of:

- affordability of employer contributions,
- transparency of processes,
- stability of employers’ contributions, and
- prudence in the funding basis.

There are also regulatory requirements for an FSS, as given in [Appendix A](#).

The FSS is a summary of the Fund's approach to funding its liabilities, and this includes reference to the Fund's other policies; it is not an exhaustive statement of policy on all issues. The FSS forms part of a framework which includes:

- the LGPS Regulations;
- the Rates and Adjustments Certificate (confirming employer contribution rates for the next three years) which can be found in an appendix to the formal valuation report;
- the Fund's discretionary policies on admissions, cessations and bulk transfers;
- actuarial factors for valuing individual transfers, early retirement costs and the costs of buying added service; and
- the Fund's Statement of Investment Principles / Investment Strategy Statement (see [Section 4](#))

#### 1.4 How does the Fund and this FSS affect me?

This depends on who you are:

- a member of the Fund, i.e. a current or former employee, or a dependant: the Fund needs to be sure it is collecting and holding enough money so that your benefits are always paid in full;
- an employer in the Fund (or which is considering joining the Fund): you will want to know how your contributions are calculated from time to time, that these are fair by comparison to other employers in the Fund, and in what circumstances you might need to pay more. Note that the FSS applies to all employers participating in the Fund;
- an Elected Member whose council participates in the Fund: you will want to be sure that the council balances the need to hold prudent reserves for members' retirement and death benefits, with the other competing demands for council money;
- a Council Tax payer: your council seeks to strike the balance above, and also to minimise cross-subsidies between different generations of taxpayers.

#### 1.5 What does the FSS aim to do?

The FSS sets out the objectives of the Fund's funding strategy, such as:

- to ensure the long-term solvency of the Fund, using a prudent long term view. This will ensure that sufficient funds are available to meet all members'/dependants' benefits as they fall due for payment;
- to ensure that employer contribution rates are reasonably stable where appropriate;
- to minimise the long-term cash contributions which employers need to pay to the Fund, by recognising the link between assets and liabilities and adopting an investment strategy which balances risk and return (**NB** this will also minimise the costs to be borne by Council Tax payers);
- to reflect the different characteristics of different employers in determining contribution rates. This involves the Fund having a clear and transparent funding strategy to demonstrate how each employer can best meet its own liabilities over future years; and
- to use reasonable measures to reduce the risk to other employers and ultimately to the Council Tax payer from an employer defaulting on its pension obligations.

## 1.6 How do I find my way around this document?

In [Section 2](#) there is a brief introduction to some of the main principles behind funding, i.e. deciding how much an employer should contribute to the Fund from time to time.

In [Section 3](#) we outline how the Fund calculates the contributions payable by different employers in different situations.

In [Section 4](#) we show how the funding strategy is linked with the Fund's investment strategy.

In the [Appendices](#) we cover various issues in more detail if you are interested:

- A. the regulatory background, including how and when the FSS is reviewed,
- B. who is responsible for what,
- C. what issues the Fund needs to monitor, and how it manages its risks,
- D. some more details about the actuarial calculations required,
- E. the assumptions which the Fund actuary currently makes about the future,
- F. a [glossary](#) explaining the technical terms occasionally used here.

If you have any other queries please contact Jo Ray, Head of Pensions in the first instance at e-mail address [jo.ray@lincolnshire.gov.uk](mailto:jo.ray@lincolnshire.gov.uk) or on telephone number 01522 553656.

## 2 Basic Funding issues

(More detailed and extensive descriptions are given in [Appendix D](#)).

### 2.1 How does the actuary measure the required contribution rate?

In essence this is a three-step process:

- Calculate the ultimate funding target for that employer, i.e. the ideal amount of assets it should hold in order to be able to pay all its members' benefits. See [Appendix E](#) for more details of what assumptions we make to determine that funding target;
- Determine the time horizon over which the employer should aim to achieve that funding target. See the table in [3.3](#) and [Note \(c\)](#) for more details;
- Calculate the employer contribution rate such that it has at least a given probability of achieving that funding target over that time horizon, allowing for different likelihoods of various possible economic outcomes over that time horizon. See [2.3](#) below, and the table in [3.3 Note \(e\)](#) for more details.

### 2.2 What is each employer's contribution rate?

This is described in more detail in [Appendix D](#). Employer contributions are normally made up of two elements:

- a) the estimated cost of benefits being built up each year, after deducting the members' own contributions and including administration expenses. This is referred to as the "*Primary rate*", and is expressed as a percentage of members' pensionable pay; plus
- b) an adjustment for the difference between the Primary rate above, and the actual contribution the employer needs to pay, referred to as the "*Secondary rate*". In broad terms, payment of the Secondary rate will aim to return the employer to full funding over an appropriate period (the "time horizon"). The Secondary rate may be expressed as a percentage of pay or a monetary amount in each year.

The rates for all employers are shown in the Fund's Rates and Adjustments Certificate, which forms part of the formal Actuarial Valuation Report. Employers' contributions are expressed as minima, with employers able to pay contributions at a higher rate. Account of any higher rate will be taken by the Fund actuary at subsequent valuations, i.e. will be reflected as a credit when next calculating the employer's contributions.

### 2.3 What different types of employer participate in the Fund?

Historically the LGPS was intended for local authority employees only. However over the years, with the diversification and changes to delivery of local services, many more types and numbers of employers now participate. There are currently more employers in the Fund than ever before, a significant part of this being due to new academies.

In essence, participation in the LGPS is open to public sector employers providing some form of service to the local community. Whilst the majority of members will be local authority employees (and ex-employees), the majority of participating employers are those providing services in place of (or alongside) local authority services: academy schools, contractors, housing associations, charities, etc.

The LGPS Regulations define various types of employer as follows:

**Scheduled bodies** - councils, and other specified employers such as academies and further education establishments. These must provide access to the LGPS in respect of their employees who are not eligible to join another public sector scheme (such as the Teachers Scheme). These employers are so-called because they are specified in a schedule to the LGPS Regulations.

It is now possible for Local Education Authority schools to convert to academy status, and for other forms of school (such as Free Schools) to be established under the academies legislation. All such **academies (or Multi Academy Trusts)**, as employers of non-teaching staff, become separate new employers in the Fund. As academies are defined in the LGPS Regulations as “Scheduled Bodies”, the Administering Authority has no discretion over whether to admit them to the Fund, and the academy has no discretion whether to continue to allow its non-teaching staff to join the Fund. There has also been guidance issued by the MHCLG regarding the terms of academies’ membership in LGPS Funds.

**Designating employers** - employers such as town and parish councils are able to participate in the LGPS via resolution (and the Fund cannot refuse them entry where the resolution is passed). These employers can designate which of their employees are eligible to join the scheme.

Other employers are able to participate in the Fund via an admission agreement, and are referred to as ‘admission bodies’. These employers are generally those with a “community of interest” with another scheme employer – **community admission bodies** (“CAB”) or those providing a service on behalf of a scheme employer – **transferee admission bodies** (“TAB”). CABs will include housing associations and charities, TABs will generally be contractors. The Fund is able to set its criteria for participation by these employers and can refuse entry if the requirements as set out in the Fund’s admissions policy are not met. (NB The terminology CAB and TAB has been dropped from recent LGPS Regulations, which instead combine both under the single term ‘admission bodies’; however, we have retained the old terminology here as we consider it to be helpful in setting funding strategies for these different employers).

## 2.4 How does the measured contribution rate vary for different employers?

All three steps above are considered when setting contributions (more details are given in [Section 3](#) and [Appendix D](#)).

1. The **funding target** is based on a set of assumptions about the future, (e.g. investment returns, inflation, pensioners’ life expectancies). However, if an employer is approaching the end of its participation in the Fund then its funding target may be set on a more prudent basis, so that its liabilities are less likely to be spread among other employers after its cessation;
2. The **time horizon** required is, in broad terms, the period over which any deficit is to be recovered. A shorter period will lead to higher contributions, and vice versa (all other things being equal). Employers may be given a lower time horizon if they have a less permanent anticipated membership, or do not have tax-raising powers to increase contributions if investment returns under-perform; and
3. The **probability of achieving** the funding target over that time horizon will be dependent on the Fund’s view of the strength of employer covenant and its funding profile. Where an employer is considered to be weaker, or potentially ceasing from the Fund, then the required probability will be set higher, which in turn will increase the required contributions (and vice versa).

For some employers it may be agreed to pool contributions, see [3.4](#).

Any costs of non ill-health early retirements must be paid by the employer, see [3.6](#).

Costs of ill-health early retirements are covered in [3.7](#) and [3.8](#).

## 2.5 How is a deficit (or surplus) calculated?

An employer's "funding level" is defined as the ratio of:

- the market value of the employer's share of assets (see [Appendix D](#), section [D5](#), for further details of how this is calculated), to
- the value placed by the actuary on the benefits built up to date for the employer's employees and ex-employees (the "liabilities"). The Fund actuary agrees with the Administering Authority the assumptions to be used in calculating this value.

If this is less than 100% then it means the employer has a shortfall, which is the employer's deficit; if it is more than 100% then the employer is said to be in surplus. The amount of deficit or shortfall is the difference between the asset value and the liabilities value.

It is important to note that the deficit/surplus and funding level are only measurements at a particular point in time, on a particular set of assumptions about the future. Whilst we recognise that various parties will take an interest in these measures, for most employers the key issue is how likely it is that their contributions will be sufficient to pay for their members' benefits (when added to their existing asset share and anticipated investment returns).

In short, deficits and funding levels are short term measures, whereas contribution-setting is a longer term issue.

## 2.6 How does the Fund recognise that contribution levels can affect council and employer service provision, and council tax?

The Administering Authority and the Fund actuary are acutely aware that, all other things being equal, a higher contribution required to be paid to the Fund will mean less cash available for the employer to spend on the provision of services. For instance:

- Higher Pension Fund contributions may result in reduced council spending, which in turn could affect the resources available for council services, and/or greater pressure on council tax levels;
- Contributions which Academies pay to the Fund will therefore not be available to pay for providing education; and
- Other employers will provide various services to the local community, perhaps through housing associations, charitable work, or contracting council services. If they are required to pay more in pension contributions to the LGPS then this may affect their ability to provide the local services at a reasonable cost.

Whilst all this is true, it should also be borne in mind that:

- The Fund provides invaluable financial security to local families, whether to those who formerly worked in the service of the local community who have now retired, or to their families after their death;
- The Fund must have the assets available to meet these retirement and death benefits, which in turn means that the various employers must each pay their own way. Lower contributions today will mean higher contributions tomorrow: deferring payments does not alter the employer's ultimate obligation to the Fund in respect of its current and former employees;
- Each employer will generally only pay for its own employees and ex-employees (and their dependants), not for those of other employers in the Fund;
- The Fund strives to maintain reasonably stable employer contribution rates where appropriate and possible. However, a recent shift in regulatory focus means that solvency within each generation is considered by the Government to be a higher priority than stability of contribution rates;

- The Fund wishes to avoid the situation where an employer falls so far behind in managing its funding shortfall that its deficit becomes unmanageable in practice: such a situation may lead to employer insolvency and the resulting deficit falling on the other Fund employers. In that situation, those employers' services would in turn suffer as a result;
- Council contributions to the Fund should be at a suitable level, to protect the interests of different generations of council tax payers. For instance, underpayment of contributions for some years will need to be balanced by overpayment in other years; the council will wish to minimise the extent to which council tax payers in one period are in effect benefitting at the expense of those paying in a different period.

Overall, therefore, there is clearly a balance to be struck between the Fund's need for maintaining prudent funding levels, and the employers' need to allocate their resources appropriately. The Fund achieves this through various techniques which affect contribution increases to various degrees (see [3.1](#)). In deciding which of these techniques to apply to any given employer, the Administering Authority takes a view on the financial standing of the employer, i.e. its ability to meet its funding commitments and the relevant time horizon.

The Administering Authority will consider a risk assessment of that employer using a knowledge base which is regularly monitored and kept up-to-date. This will include such information as the type of employer, its membership profile and funding position, any guarantors or security provision, material changes anticipated, etc.

For instance, where the Administering Authority has reasonable confidence that an employer will be able to meet its funding commitments, then the Fund will permit options such as stabilisation ([see 3.3 Note \(b\)](#)), a longer time horizon relative to other employers, and/or a lower probability of achieving their funding target. Such options will temporarily produce lower contribution levels than would otherwise have applied. This is permitted in the expectation that the employer will still be able to meet its obligations for many years to come.

On the other hand, where there is doubt that an employer will be able to meet its funding commitments or withstand a significant change in its commitments, then a higher funding target, and/or a shorter deficit recovery period relative to other employers, and/or a higher probability of achieving the target may be required.

The Fund actively seeks employer input, including to its funding arrangements, through various means: see [Appendix A](#).

## 3 Calculating contributions for individual Employers

### 3.1 General comments

A key challenge for the Administering Authority is to balance the need for stable, affordable employer contributions with the requirement to take a prudent, longer-term view of funding and ensure the solvency of the Fund. With this in mind, the Fund's three-step process identifies the key issues:

1. What is a suitably (but not overly) prudent funding target?
2. How long should the employer be permitted to reach that target? This should be realistic but not so long that the funding target is in danger of never actually being achieved.
3. What probability is required to reach that funding target? This will always be less than 100% as we cannot be certain of future market movements. Higher probability "bars" can be used for employers where the Fund wishes to reduce the risk that the employer ceases leaving a deficit to be picked up by other employers.

These and associated issues are covered in this Section.

The Administering Authority recognises that there may occasionally be particular circumstances affecting individual employers that are not easily managed within the rules and policies set out in the Funding Strategy Statement. Therefore the Administering Authority may, at its sole discretion, direct the actuary to adopt alternative funding approaches on a case by case basis for specific employers.

### 3.2 The effect of paying lower contributions

In limited circumstances the Administering Authority may permit employers to pay contributions at a lower level than is assessed for the employer using the three step process above. At their absolute discretion the Administering Authority may:

- extend the time horizon for targeting full funding;
- adjust the required probability of meeting the funding target;
- permit an employer to participate in the Fund's stabilisation mechanisms;
- permit extended phasing in of contribution rises or reductions;
- pool contributions amongst employers with similar characteristics; and/or
- accept some form of security or guarantee in lieu of a higher contribution rate than would otherwise be the case.

Employers which are permitted to use one or more of the above methods will often be paying, for a time, contributions less than required to meet their funding target, over the appropriate time horizon with the required likelihood of success. Such employers should appreciate that:

- their true long term liability (i.e. the actual eventual cost of benefits payable to their employees and ex-employees) is not affected by the pace of paying contributions;
- lower contributions in the short term will be assumed to incur a greater loss of investment returns on the deficit. Thus, deferring a certain amount of contribution may lead to higher contributions in the long-term; and
- it may take longer to reach their funding target, all other things being equal.

Overleaf ([3.3](#)) is a summary of how the main funding policies differ for different types of employer, followed by more detailed notes where necessary.

[Section 3.4](#) onwards deals with various other funding issues which apply to all employers.

Type of employer	Scheduled Bodies				Community Admission Bodies and Designating Employers		Transferee Admission Bodies	Designating Bodies
							Administering Authority to reduce the surplus over the remaining contract term	permitted by the Administering Authority
Probability of achieving target – <a href="#">Note (e)</a>	66%	70%	75%	75%	75%	75%	75%	70%

Cessation of participation: cessation debt payable	Cessation is assumed not to be generally possible, as Scheduled Bodies are legally obliged to participate in the LGPS. In the rare event of cessation occurring (machinery of Government changes for example), the cessation debt principles applied would be as per <a href="#">Note (j)</a> .				Can be ceased subject to terms of admission agreement. Cessation debt will be calculated on a basis appropriate to the circumstances of cessation – see <a href="#">Note (j)</a> .		Participation is assumed to expire at the end of the contract. Cessation debt (if any) calculated on ongoing basis. Awarding Authority will be liable for	Can be ceased subject to passing of resolution. Cessation debt will be calculated on a basis appropriate to the circumstances of cessation - see

Type of employer	Scheduled Bodies	Community Admission Bodies and Designating Employers	Transferee Admission Bodies	Designating Bodies
			future deficits and contributions arising.	<a href="#">Note (i)</a>

#### Note (a) (Basis for CABs and Designating Employers closed to new entrants)

In the circumstances where:

- the employer is a Designating Employer, or an Admission Body but not a Transferee Admission Body, and
- the employer has no guarantor, and
- the admission agreement is likely to terminate, or the employer is likely to lose its last active member, within a timeframe considered appropriate by the Administering Authority to prompt a change in funding,

the Administering Authority may set a higher funding target (e.g. using a discount rate set equal to gilt yields) by the time the agreement terminates or the last active member leaves, in order to protect other employers in the Fund. This policy will increase regular contributions and reduce, but not entirely eliminate, the possibility of a final deficit payment being required from the employer when a cessation valuation is carried out.

The Administering Authority also reserves the right to adopt the above approach in respect of those Designating Employers and Admission Bodies with no guarantor, where the strength of covenant is considered to be weak but there is no immediate expectation that the admission agreement will cease or the Designating Employer alters its designation.

#### Note (b) (Stabilisation)

Stabilisation is a mechanism where employer contribution rate variations from year to year are kept within a pre-determined range, thus allowing those employers' rates to be relatively stable. In the interests of stability and affordability of employer contributions, the Administering Authority, on the advice of the Fund Actuary, believes that stabilising contributions can still be viewed as a prudent longer-term approach. However, employers whose contribution rates have been "stabilised" (and may therefore be paying less than their theoretical contribution rate) should be aware of the risks of this approach and should consider making additional payments to the Fund if possible.

This stabilisation mechanism allows short term investment market volatility to be managed so as not to cause volatility in employer contribution rates, on the basis that a long term view can be taken on net cash inflow, investment returns and strength of employer covenant.

The current stabilisation mechanism applies if:

- the employer satisfies the eligibility criteria set by the Administering Authority (see below) and;
- there are no material events which cause the employer to become ineligible, e.g. significant reductions in active membership (due to outsourcing or redundancies), or changes in the nature of the employer (perhaps due to Government restructuring), or changes in the security of the employer.

On the basis of extensive modelling carried out for the 2016 valuation exercise (see [Section 4](#)), the standard stabilisation arrangements that will apply for employers are as follows. Other stabilisation arrangements may, on occasion, be allowed if the actuary considers them to be prudent.

Type of employer	Local Authority Council	Police and Crime Commissioner Pool
<b>Stabilisation Mechanism</b>	Fixed % of pay plus increasing monetary amount	Fixed % of pay plus increasing monetary amount
<b>Maximum contribution increase per year</b>	+1% of pay	+1% of pay
<b>Maximum contribution decrease per year</b>	-1% of pay	-1% of pay

The stabilisation criteria and limits will be reviewed at the 31 March 2019 valuation, to take effect from 1 April 2020. However the Administering Authority reserves the right to review the stabilisation criteria and limits at any time before then, on the basis of membership and/or employer changes as described above.

#### Note (c) (Maximum time horizon)

The maximum time horizon starts at the commencement of the revised contribution rate (1 April 2017 for the 2016 valuation). The Administering Authority would normally expect the same period to be used at successive triennial valuations, but would reserve the right to propose alternative time horizons, for example where there were no new entrants.

#### Note (d) (Secondary rate)

The Secondary contribution rate for each employer, covering the three year period until the next valuation, will normally be set as a monetary amount. However, the Administering Authority reserves the right to amend these rates between valuations.

#### Note (e) (Probability of achieving funding target)

Each employer has its funding target calculated, and a relevant time horizon over which to reach that target. Contributions are set such that, combined with the employer's current asset share and anticipated market movements over the time horizon, the funding target is achieved with a given minimum probability. A higher required probability bar will give rise to higher required contributions, and vice versa.

The way in which contributions are set using these three steps, and relevant economic projections, is described in further detail in [Appendix D](#).

Different probabilities are set for different employers depending on their nature and circumstances: in broad terms, a higher probability will apply due to one or more of the following:

- the Fund believes the employer poses a greater funding risk than other employers,
- the employer does not have tax-raising powers;
- the employer does not have a guarantor or other sufficient security backing its funding position; and/or
- the employer is likely to cease participation in the Fund in the short or medium term.

#### Note (f) (Regular Reviews)

Such reviews may be triggered by significant events including but not limited to: significant reductions in payroll, altered employer circumstances, Government restructuring affecting the employer's business, or failure to pay contributions or arrange appropriate security as required by the Administering Authority.

The result of a review may be to require increased contributions (by strengthening the actuarial assumptions adopted and/or moving to monetary levels of deficit recovery contributions), and/or an increased level of security or guarantee.

#### **Note (g) (New Academy conversions)**

At the time of writing, the Fund's policies on academies' funding issues are as follows:

- i. The new academy will be regarded as a separate employer in its own right and will not be pooled with other employers in the Fund. The only exception is where the academy is part of a Multi Academy Trust (MAT) in which case the academy's figures will be calculated as below but can be combined with those of the other academies in the MAT;
- ii. The new academy's past service liabilities on conversion will be calculated based on its active Fund members on the day before conversion. For the avoidance of doubt, these liabilities will include all past service of those members, but will exclude the liabilities relating to any ex-employees of the school who have deferred or pensioner status;
- iii. The new academy will be allocated an initial asset share from the ceding council's assets in the Fund. This asset share will be calculated using the estimated funding position of the ceding council at the date of academy conversion. The share will be based on the active members' funding level, having first allocated assets in the council's share to fully fund deferred and pensioner members. The asset allocation will be based on market conditions and the academy's active Fund membership on the day prior to conversion;
- iv. The new academy's initial contribution rate will be calculated using market conditions, the council funding position and membership data, all as at the day prior to conversion;

The Fund's policies on academies are subject to change in the light of any amendments to MHCLG guidance. Any changes will be notified to academies, and will be reflected in a subsequent version of this FSS.

#### **Note (h) (New Admission Bodies)**

With effect from 1 October 2012, the LGPS 2012 Miscellaneous Regulations introduced mandatory new requirements for all Admission Bodies brought into the Fund from that date. Under these Regulations, all new Admission Bodies will be required to provide some form of security, such as a guarantee from the letting employer, an indemnity or a bond. The security is required to cover some or all of the following:

- the strain cost of any redundancy early retirements resulting from the premature termination of the contract;
- allowance for the risk of asset underperformance;
- allowance for the risk of a fall in gilt yields;
- allowance for the possible non-payment of employer and member contributions to the Fund; and/or
- the current deficit.

Transferee Admission Bodies: For all TABs, the security must be to the satisfaction of the Administering Authority as well as the letting employer, and will be reassessed on an annual basis. See also [Note \(i\)](#) below.

Community Admission Bodies: The Administering Authority will only consider requests from CABs (or other similar bodies, such as section 75 NHS partnerships) to join the Fund if they are sponsored by a Scheduled Body with tax raising powers, guaranteeing their liabilities and also providing a form of security as above.

The above approaches reduce the risk to other employers in the Fund of potentially having to pick up any shortfall in respect of Admission Bodies ceasing with an unpaid deficit.

#### Note (i) (New Transferee Admission Bodies)

A new TAB usually joins the Fund as a result of the letting/outsourcing of some services from an existing employer (normally a Scheduled Body such as a council or academy) to another organisation (a “contractor”). This involves the TUPE transfer of some staff from the letting employer to the contractor. Consequently, for the duration of the contract, the contractor is a new participating employer in the Fund so that the transferring employees maintain their eligibility for LGPS membership. At the end of the contract the employees revert to the letting employer or to a replacement contractor.

Ordinarily, the TAB would be set up in the Fund as a new employer with responsibility for all the accrued benefits of the transferring employees; in this case, the contractor would usually be assigned an initial asset allocation equal to the past service liability value of the employees’ Fund benefits. The quid pro quo is that the contractor is then expected to ensure that its share of the Fund is also fully funded at the end of the contract: see [Note \(j\)](#).

Employers which “outsource” have flexibility in the way that they can deal with the pension risk potentially taken on by the contractor. In particular there are three different routes that such employers may wish to adopt. Clearly as the risk ultimately resides with the employer letting the contract, it is for them to agree the appropriate route with the contractor:

i) Pooling

Under this option the contractor is pooled with the letting employer. In this case, the contractor may pay the same rate as the letting employer, which may be under a stabilisation approach.

ii) Letting employer retains pre-contract risks

Under this option the letting employer would retain responsibility for assets and liabilities in respect of service accrued prior to the contract commencement date. The contractor would be responsible for the future liabilities that accrue in respect of transferred staff. The contractor’s contribution rate could vary from one valuation to the next. It would be liable for any deficit at the end of the contract term in respect of assets and liabilities attributable to service accrued during the contract term.

iii) Fixed contribution rate agreed

Under this option the contractor pays a fixed contribution rate and does not pay any cessation deficit.

The Administering Authority is willing to administer any of the above options as long as the approach is documented in the Admission Agreement as well as the transfer agreement. The Admission Agreement should ensure that some element of risk transfers to the contractor where it relates to their decisions and it is unfair to burden the letting employer with that risk. For example the contractor should typically be responsible for pension costs that arise from:

- above average pay increases, including the effect in respect of service prior to contract commencement even if the letting employer takes on responsibility for the latter under (ii) above; and
- redundancy and early retirement decisions.

#### **Note (j) (Admission Bodies Ceasing)**

Notwithstanding the provisions of the Admission Agreement, the Administering Authority may consider any of the following as triggers for the cessation of an admission agreement with any type of body:

- Last active member ceasing participation in the Fund (NB recent LGPS Regulation changes mean that the Administering Authority has the discretion to defer taking action for up to three years, so that if the employer acquires one or more active Fund members during that period then cessation is not triggered. The current Fund policy is that this is left as a discretion and may or may not be applied in any given case);
- The insolvency, winding up or liquidation of the Admission Body;
- Any breach by the Admission Body of any of its obligations under the Agreement that they have failed to remedy to the satisfaction of the Fund;
- A failure by the Admission Body to pay any sums due to the Fund within the period required by the Fund; or
- The failure by the Admission Body to renew or adjust the level of the bond or indemnity, or to confirm an appropriate alternative guarantor, as required by the Fund.

On cessation, the Administering Authority will instruct the Fund actuary to carry out a cessation valuation to determine whether there is any deficit or surplus. Where there is a deficit, payment of this amount in full would normally be sought from the Admission Body; where there is a surplus it should be noted that current legislation does not permit a refund payment to the Admission Body.

For non-Transferee Admission Bodies whose participation is voluntarily ended either by themselves or the Fund, or where a cessation event has been triggered, the Administering Authority must look to protect the interests of other ongoing employers. The actuary will therefore adopt an approach which, to the extent reasonably practicable, protects the other employers from the likelihood of any material loss emerging in future:

- (a) Where a guarantor does not exist then, in order to protect other employers in the Fund, the cessation liabilities and final deficit will normally be calculated using a “gilts cessation basis”, which is more prudent than the ongoing basis. This has no allowance for potential future investment outperformance above gilt yields, and has added allowance for future improvements in life expectancy. This could give rise to significant cessation debts being required.
- (b) Where there is a guarantor for future deficits and contributions, the details of the guarantee will be considered prior to the cessation valuation being carried out. In some cases the guarantor is simply guarantor of last resort and therefore the cessation valuation will be carried out consistently with the approach taken had there been no guarantor in place. Alternatively, where the guarantor is not simply guarantor of last resort, the cessation may be calculated using the ongoing basis as described in [Appendix E](#);
- (c) Again, depending on the nature of the guarantee, it may be possible to simply transfer the former Admission Body’s liabilities and assets to the guarantor, without needing to crystallise any deficit. This

approach may be adopted where the employer cannot pay the contributions due, and this is within the terms of the guarantee.

Under (a) and (b), any shortfall would usually be levied on the departing Admission Body as a single lump sum payment. If this is not possible then the Fund would spread the payment subject to there being some security in place for the employer such as a bond indemnity or guarantee.

In the event that the Fund is not able to recover the required payment in full, then the unpaid amounts fall to be shared amongst all of the other employers in the Fund. This may require an immediate revision to the Rates and Adjustments Certificate affecting other employers in the Fund, or instead be reflected in the contribution rates set at the next formal valuation following the cessation date.

As an alternative, where the ceasing Admission Body is continuing in business, the Fund at its absolute discretion reserves the right to enter into an agreement with the ceasing Admission Body. Under this agreement the Fund would accept an appropriate alternative security to be held against any deficit, and would carry out the cessation valuation on an ongoing basis: deficit recovery payments would be derived from this cessation debt. This approach would be monitored as part of each triennial valuation: the Fund reserves the right to revert to a "gilts cessation basis" and seek immediate payment of any funding shortfall identified. The Administering Authority may need to seek legal advice in such cases, as the Body would have no contributing members.

### 3.4 Pooled contributions

From time to time, with the advice of the Actuary, the Administering Authority may set up pools for employers with similar or complementary characteristics. This will always be in line with its broader funding strategy. Currently the pools in place within the Fund are as follows:

- Small scheduled bodies e.g. Town and Parish Councils (as a way of sharing experience and smoothing out the effects of costly but relatively rare events such as ill-health retirements or deaths in service).
- Schools generally are also pooled with their funding Council. However there may be exceptions for specialist or independent schools.
- Academies will be regarded as separate employers in their own right and will not be pooled with other employers in the Fund, the only exception being when the Academy is part of a Multi Academy Trust (MAT).

Employers who are permitted to enter (or remain in) a pool at the 2016 valuation will not normally be advised of their individual contribution rate unless agreed by the Administering Authority.

Community Admission Bodies that are deemed by the Administering Authority to have closed to new entrants are not usually permitted to participate in a pool.

Those employers which have been pooled are identified in the Rates and Adjustments Certificate. As at the 2016 valuation, separate pools were operated for:-

- Lincolnshire County Council;
- Police and Crime Commissioner for Lincolnshire;
- East Lindsey District Council;
- Lindsey Marsh Internal Drainage Board
- Small Scheduled Bodies;
- The following Multi Academy Trusts:-
  - David Ross Education Trust
  - Boston Witham Academies Trust

- Phoenix Family of Schools
- Priory Federation of Academies
- Tall Oaks Academy Trust
- West Grantham Federation.

### 3.5 Additional flexibility in return for added security

The Administering Authority may permit greater flexibility to the employer's contributions if the employer provides added security to the satisfaction of the Administering Authority.

Such flexibility includes a reduced rate of contribution, an extended time horizon, or permission to join a pool with another body (e.g. the Local Authority).

Such security may include, but is not limited to, a suitable bond, a legally-binding guarantee from an appropriate third party, or security over an employer asset of sufficient value.

The degree of flexibility given may take into account factors such as:

- the extent of the employer's deficit;
- the amount and quality of the security offered;
- the employer's financial security and business plan; and
- whether the admission agreement is likely to be open or closed to new entrants.

### 3.6 Non ill health early retirement costs

It is assumed that members' benefits are payable from the earliest age that the employee could retire without incurring a reduction to their benefit (and without requiring their employer's consent to retire). **(NB** the relevant age may be different for different periods of service, following the benefit changes from April 2008 and April 2014). Employers are required to pay additional contributions ('strain') wherever an employee retires before attaining this age. The actuary's funding basis makes no allowance for premature retirement except on grounds of ill-health.

It is generally expected that such strain costs are paid immediately, however, in exceptional circumstances and with the agreement of the Administering Authority the payment may be spread.

### 3.7 Ill health early retirement costs

In the event of a member's early retirement on the grounds of ill-health, a funding strain will usually arise, which can be very large. Such strains are currently met by each employer, although individual employers may elect to take external insurance (see [3.8](#) below).

Admitted Bodies will usually have an 'ill health allowance'; Scheduled Bodies may have this also, depending on their agreement terms with the Administering Authority. The Fund monitors each employer's ill health experience on an ongoing basis. If the cumulative cost of ill health retirement in any financial year exceeds the allowance at the previous valuation, the employer will be charged additional contributions on the same basis as apply for non ill-health cases. **Details will be included in each separate Admission Agreement.**

### 3.7 External ill health insurance

If an employer provides satisfactory evidence to the Administering Authority of a current external insurance policy covering ill health early retirement strains, then:

- the employer's contribution to the Fund each year is reduced by the amount of that year's insurance premium, so that the total contribution is unchanged, and

- there is no need for monitoring of allowances.

The employer must keep the Administering Authority notified of any changes in the insurance policy's coverage or premium terms, or if the policy is ceased.

### 3.8 Employers with no remaining active members

In general, an employer ceasing in the Fund due to the departure of the last active member will pay a cessation debt on an appropriate basis (see [3.3](#), [Note \(j\)](#)) and consequently have no further obligation to the Fund.

Thereafter it is expected that one of two situations will eventually arise:

- a) The employer's asset share runs out before all its ex-employees' benefits have been paid. In this situation the other Fund employers will be required to contribute to pay all remaining benefits: this will be done by the Fund actuary apportioning the remaining liabilities on a pro-rata basis at successive formal valuations;
- b) The last ex-employee or dependant dies before the employer's asset share has been fully utilised. In this situation the remaining assets would be apportioned pro-rata by the Fund's actuary to the other Fund employers.
- c) In exceptional circumstances the Fund may permit an employer with no remaining active members to continue contributing to the Fund. This would require the provision of a suitable security or guarantee, as well as a written ongoing commitment to fund the remainder of the employer's obligations over an appropriate period. The Fund would reserve the right to invoke the cessation requirements in the future, however. The Administering Authority may need to seek legal advice in such cases, as the employer would have no contributing members.

### 3.9 Policies on bulk transfers

Each case will be treated on its own merits, but in general:

- The Fund will not pay bulk transfers greater than the lesser of (a) the asset share of the transferring employer in the Fund, and (b) the value of the past service liabilities of the transferring members;
- The Fund will not grant added benefits to members bringing in entitlements from another Fund unless the asset transfer is sufficient to meet the added liabilities; and
- The Fund may permit shortfalls to arise on bulk transfers if the Fund employer has suitable strength of covenant and commits to meeting that shortfall in an appropriate period. This may require the employer's Fund contributions to increase between valuations.

## 4 Funding strategy and links to investment strategy

### 4.1 What is the Fund's investment strategy?

The Fund has built up assets over the years, and continues to receive contribution and other income. All of this must be invested in a suitable manner, which is the investment strategy.

Investment strategy is set by the administering authority, after consultation with the employers and after taking investment advice. The precise mix, manager make up and target returns are set out in the Statement of Investment Principles (being replaced by an Investment Strategy Statement under new LGPS Regulations), which is available to members and employers.

The investment strategy is set for the long-term, but is reviewed from time to time. Normally a full review is carried out as part of each actuarial valuation, and is kept under review annually between actuarial valuations to ensure that it remains appropriate to the Fund's liability profile.

The same investment strategy is currently followed for all employers.

### 4.2 What is the link between funding strategy and investment strategy?

The Fund must be able to meet all benefit payments as and when they fall due. These payments will be met by contributions (resulting from the funding strategy) or asset returns and income (resulting from the investment strategy). To the extent that investment returns or income fall short, then higher cash contributions are required from employers, and vice versa

Therefore, the funding and investment strategies are inextricably linked.

### 4.3 How does the funding strategy reflect the Fund's investment strategy?

In the opinion of the Fund actuary, the current funding policy is consistent with the current investment strategy of the Fund. The asset outperformance assumption contained in the discount rate (see Appendix [E3](#)) is within a range that would be considered acceptable for funding purposes; it is also considered to be consistent with the requirement to take a "prudent longer-term view" of the funding of liabilities as required by the UK Government (see Appendix [A1](#)).

However, in the short term – such as the three yearly assessments at formal valuations – there is the scope for considerable volatility and there is a material chance that in the short-term and even medium term, asset returns will fall short of this target. The stability measures described in [Section 3](#) will damp down, but not remove, the effect on employers' contributions.

The Fund does not hold a contingency reserve to protect it against the volatility of equity investments.

### 4.4 How does this differ for a large stable employer?

The Actuary has developed four key measures which capture the essence of the Fund's strategies, both funding and investment:

Prudence - the Fund should have a reasonable expectation of being fully funded in the long term;

Affordability – how much can employers afford;

Stewardship – the assumptions used should be sustainable in the long term, without having to resort to overly optimistic assumptions about the future to maintain an apparently healthy funding position; and

Stability – employers should not see significant moves in their contribution rates from one year to the next, to help provide a more stable budgeting environment.

The key problem is that the key objectives often conflict. For example, minimising the long term cost of the scheme (i.e. keeping employer rates affordable) is best achieved by investing in higher returning assets e.g. equities. However, equities are also very volatile (i.e. go up and down fairly frequently in fairly large moves), which conflicts with the objective to have stable contribution rates.

Therefore, a balance needs to be maintained between risk and reward, which has been considered by the use of Asset Liability Modelling: this is a set of calculation techniques applied by the Fund's actuary to model the range of potential future solvency levels and contribution rates.

The Actuary was able to model the impact of these four key areas, for the purpose of setting a stabilisation approach ([see 3.3 Note \(b\)](#)). The modelling demonstrated that retaining the present investment strategy, coupled with constraining employer contribution rate changes as described in [3.3 Note \(b\)](#), struck an appropriate balance between the above objectives. In particular the stabilisation approach currently adopted meets the need for stability of contributions without jeopardising the Administering Authority's aims of prudent stewardship of the Fund.

Whilst the current stabilisation mechanism is to remain in place until 2020, it should be noted that this will need to be reviewed following the 2019 valuation.

#### **4.5 Does the Fund monitor its overall funding position?**

The Administering Authority monitors the relative funding position, i.e. changes in the relationship between asset values and the liabilities value, quarterly. It reports this to the regular Pensions Committee meetings, and also to employers through newsletters and Employers Forums.

## 5 Statutory reporting and comparison to other LGPS Funds

### 5.1 Purpose

Under Section 13(4)(c) of the Public Service Pensions Act 2013 ("Section 13"), the Government Actuary's Department must, following each triennial actuarial valuation, report to the Ministry of Housing, Communities & Local Government (MHCLG) on each of the LGPS Funds in England & Wales. This report will cover whether, for each Fund, the rate of employer contributions are set at an appropriate level to ensure both the solvency and the long term cost efficiency of the Fund.

This additional MHCLG oversight may have an impact on the strategy for setting contribution rates at future valuations.

### 5.2 Solvency

For the purposes of Section 13, the rate of employer contributions shall be deemed to have been set at an appropriate level to ensure solvency if:

- (a) the rate of employer contributions is set to target a funding level for the Fund of 100%, over an appropriate time period and using appropriate actuarial assumptions (where appropriateness is considered in both absolute and relative terms in comparison with other funds); and either
- (b) employers collectively have the financial capacity to increase employer contributions, and/or the Fund is able to realise contingent assets should future circumstances require, in order to continue to target a funding level of 100%; or
- (c) there is an appropriate plan in place should there be, or if there is expected in future to be, a material reduction in the capacity of fund employers to increase contributions as might be needed.

### 5.3 Long Term Cost Efficiency

The rate of employer contributions shall be deemed to have been set at an appropriate level to ensure long term cost efficiency if:

- i. the rate of employer contributions is sufficient to make provision for the cost of current benefit accrual,
- ii. with an appropriate adjustment to that rate for any surplus or deficit in the Fund.

In assessing whether the above condition is met, MHCLG may have regard to various absolute and relative considerations. A relative consideration is primarily concerned with comparing LGPS pension funds with other LGPS pension funds. An absolute consideration is primarily concerned with comparing Funds with a given objective benchmark.

Relative considerations include:

- 1. the implied deficit recovery period; and
- 2. the investment return required to achieve full funding after 20 years.

Absolute considerations include:

1. the extent to which the contributions payable are sufficient to cover the cost of current benefit accrual and the interest cost on any deficit;
2. how the required investment return under “relative considerations” above compares to the estimated future return being targeted by the Fund’s current investment strategy;
3. the extent to which contributions actually paid have been in line with the expected contributions based on the extant rates and adjustment certificate; and
4. the extent to which any new deficit recovery plan can be directly reconciled with, and can be demonstrated to be a continuation of, any previous deficit recovery plan, after allowing for actual Fund experience.

MHCLG may assess and compare these metrics on a suitable standardised market-related basis, for example where the local funds’ actuarial bases do not make comparisons straightforward.

## Appendix A – Regulatory framework

### A1 Why does the Fund need an FSS?

The Ministry of Housing, Communities and Local Government (MHCLG) has stated that the purpose of the FSS is:

*“to establish a **clear and transparent fund-specific strategy** which will identify how employers’ pension liabilities are best met going forward;*

*to support the regulatory framework to maintain **as nearly constant employer contribution rates as possible**; and*

*to take a **prudent longer-term view** of funding those liabilities.”*

These objectives are desirable individually, but may be mutually conflicting.

The requirement to maintain and publish a FSS is contained in LGPS Regulations which are updated from time to time. In publishing the FSS the Administering Authority has to have regard to any guidance published by Chartered Institute of Public Finance and Accountancy (CIPFA) (most recently in 2016) and to its Statement of Investment Principles / Investment Strategy Statement.

This is the framework within which the Fund’s actuary carries out triennial valuations to set employers’ contributions and provides recommendations to the Administering Authority when other funding decisions are required, such as when employers join or leave the Fund. The FSS applies to all employers participating in the Fund.

### A2 Does the Administering Authority consult anyone on the FSS?

Yes. This is required by LGPS Regulations. It is covered in more detail by the most recent CIPFA guidance, which states that the FSS must first be subject to “consultation with such persons as the authority considers appropriate”, and should include “a meaningful dialogue at officer and elected member level with council tax raising authorities and with corresponding representatives of other participating employers”.

In practice, for the Fund, the consultation process for this FSS was as follows:

- a) A draft version of the FSS was issued to all participating employers in February 2017 for comment;
- b) Comments were requested within 4 weeks, and answers provided;
- c) There was an Employers Forum on 23 March 2017 at which questions regarding the FSS could be raised and answered;
- d) Following the end of the consultation period the FSS was updated where required and approved at the Pensions Committee meeting on 8 March 2017, then published before the month end.

### A3 How is the FSS published?

The FSS is made available through the following routes:

Published on the website, at [www.wypf.org.uk](http://www.wypf.org.uk);

A copy sent by e-mail to each participating employer in the Fund;

A copy sent to the Pension Board;

A full copy included in the annual report and accounts of the Fund;

Copies made available on request.

**A4 How often is the FSS reviewed?**

The FSS is reviewed in detail at least every three years as part of the triennial valuation. This version is expected to remain unaltered until it is consulted upon as part of the formal process for the next valuation in 2019.

It is possible that (usually slight) amendments may be needed within the three year period. These would be needed to reflect any regulatory changes, or alterations to the way the Fund operates (e.g. to accommodate a new class of employer). Any such amendments would be consulted upon as appropriate:

- trivial amendments would be simply notified at the next round of employer communications,
- amendments affecting only one class of employer would be consulted with those employers,
- other more significant amendments would be subject to full consultation.

In any event, changes to the FSS would need agreement by the Pensions Committee and would be included in the relevant Committee Meeting minutes.

**A5 How does the FSS fit into other Fund documents?**

The FSS is a summary of the Fund's approach to funding liabilities. It is not an exhaustive statement of policy on all issues, for example there are a number of separate statements published by the Fund including the Statement of Investment Principles/Investment Strategy Statement, Governance Strategy and Communications Strategy. In addition, the Fund publishes an Annual Report and Accounts with up to date information on the Fund.

These documents can be found on the web at [www.wypf.org.uk](http://www.wypf.org.uk).

## Appendix B – Responsibilities of key parties

The efficient and effective operation of the Fund needs various parties to each play their part.

### **B1 The Administering Authority should:-**

- operate the Fund as per the LGPS Regulations;
- effectively manage any potential conflicts of interest arising from its dual role as Administering Authority and a Fund employer;
- collect employer and employee contributions, and investment income and other amounts due to the Fund;
- ensure that cash is available to meet benefit payments as and when they fall due;
- pay from the Fund the relevant benefits and entitlements that are due;
- invest surplus monies (i.e. contributions and other income which are not immediately needed to pay benefits) in accordance with the Fund's Statement of Investment Principles/Investment Strategy Statement (SIP/ISS) and LGPS Regulations;
- communicate appropriately with employers so that they fully understand their obligations to the Fund;
- take appropriate measures to safeguard the Fund against the consequences of employer default;
- manage the valuation process in consultation with the Fund's actuary;
- provide data and information as required by the Government Actuary's Department to carry out their statutory obligations (see [Section 5](#));
- prepare and maintain a FSS and a SIP/ISS, after consultation;
- notify the Fund's actuary of material changes which could affect funding (this is covered in a separate agreement with the actuary); and
- monitor all aspects of the fund's performance and funding and amend the FSS and SIP/ISS as necessary and appropriate.

### **B2 The Individual Employer should:-**

- deduct contributions from employees' pay correctly;
- pay all contributions, including their own as determined by the actuary, promptly by the due date;
- have a policy and exercise discretions within the regulatory framework;
- make additional contributions in accordance with agreed arrangements in respect of, for example, augmentation of scheme benefits, early retirement strain; and
- notify the Administering Authority promptly of all changes to its circumstances, prospects or membership, which could affect future funding.

### **B3 The Fund Actuary should:-**

- prepare valuations, including the setting of employers' contribution rates. This will involve agreeing assumptions with the Administering Authority, having regard to the FSS and LGPS Regulations, and targeting each employer's solvency appropriately;
- provide data and information as required by the Government Actuary's Department to carry out their statutory obligations (see [Section 5](#));

- provide advice relating to new employers in the Fund, including the level and type of bonds or other forms of security (and the monitoring of these);
- prepare advice and calculations in connection with bulk transfers and individual benefit-related matters;
- assist the Administering Authority in considering possible changes to employer contributions between formal valuations, where circumstances suggest this may be necessary;
- advise on the termination of employers' participation in the Fund; and
- fully reflect actuarial professional guidance and requirements in the advice given to the Administering Authority.

**B4 Other parties:-**

- investment advisers (either internal or external) should ensure the Fund's SIP/ISS remains appropriate, and consistent with this FSS;
- investment managers, custodians and bankers should all play their part in the effective investment (and dis-investment) of Fund assets, in line with the SIP/ISS;
- auditors should comply with their auditing standards, ensure Fund compliance with all requirements, monitor and advise on fraud detection, and sign off annual reports and financial statements as required;
- governance advisers may be appointed to advise the Administering Authority on efficient processes and working methods in managing the Fund;
- legal advisers (either internal or external) should ensure the Fund's operation and management remains fully compliant with all regulations and broader local government requirements, including the Administering Authority's own procedures;
- the Ministry of Housing, Communities and Local Government (assisted by the Government Actuary's Department) and the Scheme Advisory Board, should work with LGPS Funds to meet Section 13 requirements.

## Appendix C – Key risks and controls

### C1 Types of risk

The Administering Authority has an active risk management programme in place. The measures that it has in place to control key risks are summarised below under the following headings:

- financial;
- demographic;
- regulatory; and
- governance.

### C2 Financial risks

Risk	Summary of Control Mechanisms
Fund assets fail to deliver returns in line with the anticipated returns underpinning the valuation of liabilities over the long-term.	<p>Only anticipate long-term returns on a relatively prudent basis to reduce risk of under-performing.</p> <p>Assets invested on the basis of specialist advice, in a suitably diversified manner across asset classes, geographies, managers, etc.</p> <p>Analyse progress at three yearly valuations for all employers.</p> <p>Inter-valuation roll-forward of liabilities between valuations at whole Fund level.</p>
Inappropriate long-term investment strategy.	<p>Overall investment strategy options considered as an integral part of the funding strategy. Used asset liability modelling to measure 4 key outcomes.</p> <p>Chosen option considered to provide the best balance.</p>
Fall in risk-free returns on Government bonds, leading to rise in value placed on liabilities.	<p>Stabilisation modelling at whole Fund level allows for the probability of this within a longer term context.</p> <p>Inter-valuation monitoring, as above.</p> <p>Some investment in bonds helps to mitigate this risk.</p>
Active investment manager under-performance relative to benchmark.	<p>Quarterly investment monitoring analyses market performance and active managers relative to their index benchmark.</p>
Pay and price inflation significantly more than anticipated.	<p>The focus of the actuarial valuation process is on real returns on assets, net of price and pay increases.</p> <p>Inter-valuation monitoring, as above, gives early warning.</p>

Risk	Summary of Control Mechanisms
	<p>Some investment in bonds also helps to mitigate this risk.</p> <p>Employers pay for their own salary awards and should be mindful of the geared effect on pension liabilities of any bias in pensionable pay rises towards longer-serving employees.</p>
Effect of possible increase in employer's contribution rate on service delivery and admission/scheduled bodies	An explicit stabilisation mechanism has been agreed as part of the funding strategy. Other measures are also in place to limit sudden increases in contributions.
Orphaned employers give rise to added costs for the Fund	<p>The Fund seeks a cessation debt (or security/guarantor) to minimise the risk of this happening in the future.</p> <p>If it occurs, the Actuary calculates the added cost spread pro-rata among all employers – (see <a href="#">3.9</a>).</p>

### C3 Demographic risks

Risk	Summary of Control Mechanisms
Pensioners living longer, thus increasing cost to Fund.	<p>Set mortality assumptions with some allowance for future increases in life expectancy.</p> <p>The Fund Actuary has direct access to the experience of over 50 LGPS funds which allows early identification of changes in life expectancy that might in turn affect the assumptions underpinning the valuation.</p>
Maturing Fund – i.e. proportion of actively contributing employees declines relative to retired employees.	Continue to monitor at each valuation, monetary amounts to be continued to be paid rather than % of pay and consider alternative investment strategies.
Deteriorating patterns of early retirements	<p>Employers are charged the extra cost of non ill-health retirements following each individual decision.</p> <p>Employer ill health retirement experience is monitored, and insurance is an option.</p>
Reductions in payroll causing insufficient deficit recovery payments	<p>In many cases this may not be sufficient cause for concern, and will in effect be caught at the next formal valuation. However, there are protections where there is concern, as follows:</p> <p>Employers in the stabilisation mechanism may be</p>

Risk	Summary of Control Mechanisms
	<p>brought out of that mechanism to permit appropriate contribution increases (see <a href="#">Note (b)</a> to <a href="#">3.3</a>).</p> <p>For other employers, review of contributions is permitted in general between valuations (see <a href="#">Note (f)</a> to <a href="#">3.3</a>) and may require a move in deficit contributions from a percentage of payroll to fixed monetary amounts.</p>

#### C4 Regulatory risks

Risk	Summary of Control Mechanisms
<p>Changes to national pension requirements and/or HMRC rules e.g. changes arising from public sector pensions reform.</p>	<p>The Administering Authority considers all consultation papers issued by the Government and comments where appropriate.</p> <p>The results of the most recent reforms were built into the 2013 valuation. Any changes to member contribution rates or benefit levels will be carefully communicated with members to minimise possible opt-outs or adverse actions.</p>
<p>Time, cost and/or reputational risks associated with any MHCLG intervention triggered by the Section 13 analysis (see <a href="#">Section 5</a>).</p>	<p>Take advice from Fund Actuary on position of Fund as at prior valuation, and consideration of proposed valuation approach relative to anticipated Section 13 analysis.</p>
<p>Changes by Government to particular employer participation in LGPS Funds, leading to impacts on funding and/or investment strategies.</p>	<p>The Administering Authority considers all consultation papers issued by the Government and comments where appropriate.</p> <p>Take advice from Fund Actuary on impact of changes on the Fund and amend strategy as appropriate.</p>

**C5 Governance risks**

Risk	Summary of Control Mechanisms
Administering Authority unaware of structural changes in an employer's membership (e.g. large fall in employee members, large number of retirements) or not advised of an employer closing to new entrants.	<p>The Administering Authority has a close relationship with employing bodies and communicates required standards e.g. for submission of data.</p> <p>The Actuary may revise the rates and Adjustments certificate to increase an employer's contributions between triennial valuations</p> <p>Deficit contributions may be expressed as monetary amounts.</p>
Actuarial or investment advice is not sought, or is not heeded, or proves to be insufficient in some way	<p>The Administering Authority maintains close contact with its specialist advisers.</p> <p>Advice is delivered via formal meetings involving Elected Members, and recorded appropriately.</p> <p>Actuarial advice is subject to professional requirements such as peer review.</p>
Administering Authority failing to commission the Fund Actuary to carry out a termination valuation for a departing Admission Body.	<p>The Administering Authority requires employers with Best Value contractors to inform it of forthcoming changes.</p> <p>Community Admission Bodies' memberships are monitored and, if active membership decreases, steps will be taken.</p>
An employer ceasing to exist with insufficient funding or adequacy of a bond.	<p>The Administering Authority believes that it would normally be too late to address the position if it was left to the time of departure.</p> <p>The risk is mitigated by:</p> <p>Seeking a funding guarantee from another scheme employer, or external body, where-ever possible (see <a href="#">Notes (h)</a> and <a href="#">(j)</a> to <a href="#">3.3</a>).</p> <p>Alerting the prospective employer to its obligations and encouraging it to take independent actuarial advice.</p> <p>Vetting prospective employers before admission.</p> <p>Where permitted under the regulations requiring a bond to protect the Fund from various risks.</p> <p>Requiring new Community Admission Bodies to have a guarantor.</p> <p>Reviewing bond or guarantor arrangements at regular</p>

Risk	Summary of Control Mechanisms
	<p>intervals (see <a href="#">Note (f)</a> to <a href="#">3.3</a>).</p> <p>Reviewing contributions well ahead of cessation if thought appropriate (see <a href="#">Note (a)</a> to <a href="#">3.3</a>).</p>

## Appendix D – The calculation of Employer contributions

In [Section 2](#) there was a broad description of the way in which contribution rates are calculated. This Appendix considers these calculations in much more detail.

All three steps above are considered when setting contributions (more details are given in [Section 3](#) and [Appendix D](#):

1. The **funding target** is based on a set of assumptions about the future, eg investment returns, inflation, pensioners' life expectancies. However, if an employer is approaching the end of its participation in the Fund then its funding target may be set on a more prudent basis, so that its liabilities are less likely to be spread among other employers after its cessation of participation;
2. The **time horizon** required is, in broad terms, the period over which any deficit is to be recovered. A shorter period will lead to higher contributions, and vice versa (all other things being equal). Employers may be given a lower time horizon if they have a less permanent anticipated membership, or do not have tax-raising powers to increase contributions if investment returns under-perform;
3. The required **probability of achieving** the funding target over that time horizon will be dependent on the Fund's view of the strength of employer covenant and its funding profile. Where an employer is considered to be weaker, or potentially ceasing from the Fund, then the required probability will be set higher, which in turn will increase the required contributions (and vice versa).

The calculations involve actuarial assumptions about future experience, and these are described in detail in [Appendix E](#).

### D1 What is the difference between calculations across the whole Fund and calculations for an individual employer?

Employer contributions are normally made up of two elements:

- a) the estimated cost of ongoing benefits being accrued, referred to as the "Primary contribution rate" (see [D2](#) below); plus
- b) an adjustment for the difference between the Primary rate above, and the actual contribution the employer needs to pay, referred to as the "Secondary contribution rate" (see [D3](#) below).

The contribution rate for each employer is measured as above, appropriate for each employer's funding position and membership. The whole Fund position, including that used in reporting to MHCLG (see section 5), is calculated in effect as the sum of all the individual employer rates. MHCLG currently only regulates at whole Fund level, without monitoring individual employer positions.

### D2 How is the Primary contribution rate calculated?

The Primary element of the employer contribution rate is calculated with the aim that these contributions will meet benefit payments in respect of members' **future** service in the Fund. This is based upon the cost (in excess of members' contributions) of the benefits which employee members earn from their service each year.

The Primary rate is calculated separately for all the employers, although employers within a pool will pay the contribution rate applicable to the pool as a whole. The Primary rate is calculated such that it is projected to:

1. meet the required funding target for all future years' accrual of benefits\*, excluding any accrued assets,
2. within the determined time horizon (see [note 3.3 Note \(c\)](#) for further details),
3. with a sufficiently high probability, as set by the Fund's strategy for the category of employer (see [3.3 Note \(e\)](#) for further details).

\* The projection is for the current active membership where the employer no longer admits new entrants, or additionally allows for new entrants where this is appropriate.

The projections are carried out using an economic modeller developed by the Fund's actuary Hymans Robertson: this allows for a wide range of outcomes as regards key factors such as asset returns (based on the Fund's investment strategy), inflation, and bond yields. The measured contributions are calculated such that the proportion of outcomes meeting the employer's funding target (by the end of the time horizon) is equal to the required probability.

The approach includes expenses of administration to the extent that they are borne by the Fund, and includes allowances for benefits payable on death in service and on ill health retirement.

### **D3 How is the Secondary contribution rate calculated?**

The combined Primary and Secondary rates aim to achieve the employer's funding target, within the appropriate time horizon, with the relevant degree of probability.

For the funding target, the Fund actuary agrees the assumptions to be used with the Administering Authority – see [Appendix E](#). These assumptions are used to calculate the present value of all benefit payments expected in the future, relating to that employer's current and former employees, based on pensionable service to the valuation date only (i.e. ignoring further benefits to be built up in the future).

The Fund operates the same target funding level for all employers of 100% of its accrued liabilities valued on the ongoing basis, unless otherwise determined (see [Section 3](#)).

The Secondary rate is calculated as the balance over and above the Primary rate, such that the total is projected to:

- meet the required funding target relating to combined past and future service benefit accrual, including accrued asset share (see [D5](#) below)
- within the determined time horizon (see [3.3 Note \(c\)](#) for further details)
- with a sufficiently high probability, as set by the Fund's strategy for the category of employer (see [3.3 Note \(e\)](#) for further details).

The projections are carried out using an economic modeller developed by the Fund Actuary Hymans Robertson: this allows for a wide range of outcomes as regards key factors such as asset returns (based on the Fund's investment strategy), inflation, and bond yields. The measured contributions are calculated such that the proportion of outcomes with at least 100% solvency (by the end of the time horizon) is equal to the required probability.

### **D4 What affects a given employer's valuation results?**

The results of these calculations for a given individual employer will be affected by:

1. past contributions relative to the cost of accruals of benefits;
2. different liability profiles of employers (e.g. mix of members by age, gender, service vs. salary);
3. the effect of any differences in the funding target, i.e. the valuation basis used to value the employer's liabilities;
4. any different time horizons;
5. the difference between actual and assumed rises in pensionable pay;

6. the difference between actual and assumed increases to pensions in payment and deferred pensions;
7. the difference between actual and assumed retirements on grounds of ill-health from active status;
8. the difference between actual and assumed amounts of pension ceasing on death;
9. the additional costs of any non ill-health retirements relative to any extra payments made; and/or
10. differences in the required probability of achieving the funding target.

#### **D5 How is each employer's asset share calculated?**

**Until 31 March 2016** the Administering Authority did not account for each employer's assets separately. Instead, the Fund's actuary apportioned the assets of the whole Fund between the employers, at each triennial valuation.

This apportionment uses the income and expenditure figures provided for certain cash flows for each employer. This process adjusts for transfers of liabilities between employers participating in the Fund, but does make a number of simplifying assumptions. The split is calculated using an actuarial technique known as "analysis of surplus".

Actual investment returns achieved on the Fund between each valuation are applied proportionately across all employers, to the extent that employers in effect share the same investment strategy. Transfers of liabilities between employers within the Fund occur automatically within this process, with a sum broadly equivalent to the reserve required on the ongoing basis being exchanged between the two employers.

The Fund actuary does not allow for certain relatively minor events, including but not limited to:

- the actual timing of employer contributions within any financial year;
- the effect of the premature payment of any deferred pensions on grounds of incapacity.

These effects are swept up within a miscellaneous item in the analysis of surplus, which is split between employers in proportion to their liabilities.

The methodology adopted until 31 March 2016 meant that there were inevitably some difference between the asset shares calculated for individual employers and those that would have resulted had they participated in their own ring-fenced section of the Fund.

The asset apportionment was capable of verification but not to audit standard. The Administering Authority recognised the limitations in the process, and while it considered that the Fund actuary's approach addressed the risks of employer cross-subsidisation to an acceptable degree, it decided to adopt a different apportionment approach going forward.

**With effect from 1 April 2016**, the Fund uses the Hymans Robertson Employer Asset Tracking model ("HEAT"), which apportions assets at individual employer level allowing for monthly cashflows per employer (e.g. contributions received, benefits paid out, investment returns, transfers in and out, etc). This revised approach gives a greater degree of accuracy, for employers' benefit.

## Appendix E – Actuarial assumptions

### E1 What are the actuarial assumptions?

These are expectations of future experience used to place a value on future benefit payments (“the liabilities”). Assumptions are made about the amount of benefit payable to members (the financial assumptions) and the likelihood or timing of payments (the demographic assumptions). For example, financial assumptions include investment returns, salary growth and pension increases; demographic assumptions include life expectancy, probabilities of ill-health early retirement, and proportions of member deaths giving rise to dependants’ benefits.

Changes in assumptions will affect the measured funding target. However, different assumptions will not of course affect the actual benefits payable by the Fund in future.

The combination of all assumptions is described as the “basis”. A more optimistic basis might involve higher assumed investment returns (discount rate), or lower assumed salary growth, pension increases or life expectancy; a more optimistic basis will give lower funding targets and lower employer costs. A more prudent basis will give higher funding targets and higher employer costs.

### E2 What basis is used by the Fund?

The Fund’s standard funding basis is described as the “ongoing basis”, which applies to most employers in most circumstances. This is described in more detail below. It anticipates employers remaining in the Fund in the long term.

However, in certain circumstances, typically where the employer is not expected to remain in the Fund long term, a more prudent basis applies: see [Note \(a\)](#) to [3.3](#).

### E3 What assumptions are made in the ongoing basis?

#### a) Investment return / discount rate

The key financial assumption is the anticipated return on the Fund’s investments. This “discount rate” assumption makes allowance for an anticipated out-performance of Fund returns relative to long term yields on UK Government bonds (“gilts”). There is, however, no guarantee that Fund returns will out-perform gilts. The risk is greater when measured over short periods such as the three years between formal actuarial valuations, when the actual returns and assumed returns can deviate sharply.

Given the very long-term nature of the liabilities, a long term view of prospective asset returns is taken. The long term in this context would be 20 to 30 years or more.

For the purpose of the triennial funding valuation at 31 March 2016 and setting contribution rates effective from 1 April 2017, the Fund actuary has assumed that future investment returns earned by the Fund over the long term will be 1.8% per annum greater than gilt yields at the time of the valuation (this is higher than that used at the 2013 valuation, which therefore gives a lower funding target, all other things being equal). In the opinion of the Fund actuary, based on the current investment strategy of the Fund, this asset out-performance assumption is within a range that would be considered acceptable for the purposes of the funding valuation.

### **b) Salary growth**

Pay for public sector employees is currently subject to restriction by the UK Government until 2020. Although this “pay freeze” does not officially apply to local government and associated employers, it has been suggested that they are likely to show similar restraint in respect of pay awards. Based on long term historical analysis of the membership in LGPS funds, and continued austerity measures, the salary increase assumption at the 2016 valuation has been set to be a blended rate combined of:

1. 1% p.a. until 31 March 2020, followed by
2. retail prices index (RPI) p.a. thereafter.

This gives a single “blended” assumption of RPI less 0.6% p.a. This is a change from the previous valuation, which assumed a flat assumption of RPI plus 0.5% per annum. The change has led to a reduction in the funding target (all other things being equal).

### **c) Pension increases**

Since 2011 the consumer prices index (CPI), rather than RPI, has been the basis for increases to public sector pensions in deferment and in payment. Note that the basis of such increases is set by the Government, and is not under the control of the Fund or any employers.

As at the previous valuation, we derive our assumption for RPI from market data as the difference between the yield on long-dated fixed interest and index-linked government bonds. This is then reduced to arrive at the CPI assumption, to allow for the “formula effect” of the difference between RPI and CPI. At this valuation, we have used a reduction of 1.0% per annum. This is a larger reduction than at 2013 (which was 0.8% p.a.), which will serve to reduce the funding target (all other things being equal). (Note that the reduction is applied in a geometric, not arithmetic, basis).

### **d) Life expectancy**

The demographic assumptions are intended to be best estimates of future experience in the Fund based on past experience of LGPS funds which participate in Club Vita, the longevity analytics service used by the Fund, and endorsed by the actuary.

The longevity assumptions that have been adopted at this valuation are a bespoke set of “VitaCurves”, produced by the Club Vita’s detailed analysis, which are specifically tailored to fit the membership profile of the Fund. These curves are based on the data provided by the Fund for the purposes of this valuation.

It is acknowledged that future life expectancy and, in particular, the allowance for future improvements in life expectancy, is uncertain. There is a consensus amongst actuaries, demographers and medical experts that life expectancy is likely to improve in the future. Allowance has been made in the ongoing valuation basis for future improvements in line with the 2013 version of the Continuous Mortality Investigation model published by the Actuarial Profession and a 1.25% per annum minimum underpin to future reductions in mortality rates. This is a similar allowance for future improvements than was made in 2013.

The combined effect of the above changes from the 2013 valuation approach, is to reduce life expectancy by around 0.2 years on average, which reduces the funding target all other things being equal. The approach taken is considered reasonable in light of the long term nature of the Fund and the assumed level of security underpinning members’ benefits.

**e) General**

The same financial assumptions are adopted for most employers, in deriving the funding target underpinning the Primary and Secondary rates: as described in [\(3.3\)](#), these calculated figures are translated in different ways into employer contributions, depending on the employer's circumstances.

The demographic assumptions, in particular the life expectancy assumption, in effect vary by type of member and so reflect the different membership profiles of employers.

## Appendix F – Glossary

<b>Actuarial assumptions/basis</b>	The combined set of assumptions made by the actuary, regarding the future, to calculate the value of <b>the funding target</b> . The main assumptions will relate to the <b>discount rate</b> , salary growth, pension increases and longevity. More prudent assumptions will give a higher target value, whereas more optimistic assumptions will give a lower value.
<b>Administering Authority</b>	The council with statutory responsibility for running the Fund, in effect the Fund's "trustees".
<b>Admission Bodies</b>	Employers where there is an Admission Agreement setting out the employer's obligations. These can be Community Admission Bodies or Transferee Admission Bodies. For more details (see <a href="#">2.3</a> ).
<b>Covenant</b>	The assessed financial strength of the employer. A strong covenant indicates a greater ability (and willingness) to pay for pension obligations in the long run. A weaker covenant means that it appears that the employer may have difficulties meeting its pension obligations in full over the longer term.
<b>Designating Employer</b>	Employers such as town and parish councils that are able to participate in the LGPS via resolution. These employers can designate which of their employees are eligible to join the Fund.
<b>Discount rate</b>	The annual rate at which future assumed cashflows (in and out of the Fund) are discounted to the present day. This is necessary to provide a <b>funding target</b> which is consistent with the present day value of the assets. A lower discount rate gives a higher target value, and vice versa. It is used in the calculation of the <b>Primary and Secondary rates</b> .
<b>Employer</b>	An individual participating body in the Fund, which employs (or used to employ) <b>members</b> of the Fund. Normally the assets and <b>funding target</b> values for each employer are individually tracked, together with its <b>Primary rate</b> at each <b>valuation</b> .
<b>Funding target</b>	The actuarially calculated present value of all pension entitlements of all <b>members</b> of the Fund, built up to date. This is compared with the present market value of Fund assets to derive the <b>deficit</b> . It is calculated on a chosen set of <b>actuarial assumptions</b> .
<b>Gilt</b>	A UK Government bond, ie a promise by the Government to pay interest and capital as per the terms of that particular gilt, in return for an initial payment of capital by the purchaser. Gilts can be "fixed interest", where the interest payments are level throughout the gilt's term, or "index-linked" where the interest payments vary each year in line with a specified index (usually RPI). Gilts can be bought as assets by the Fund, but their main use in funding is as an objective measure of solvency.
<b>Guarantee / guarantor</b>	A formal promise by a third party (the guarantor) that it will meet any pension obligations not met by a specified employer. The presence of a guarantor will mean, for instance, that the Fund can consider the employer's <b>covenant</b> to be as strong

as its guarantor's.

<b>Letting employer</b>	An employer which outsources or transfers a part of its services and workforce to another employer (usually a contractor). The contractor will pay towards the LGPS benefits accrued by the transferring members, but ultimately the obligation to pay for these benefits will revert to the letting employer. A letting employer will usually be a local authority, but can sometimes be another type of employer such as an Academy.
<b>LGPS</b>	The Local Government Pension Scheme, a public sector pension arrangement put in place via Government Regulations, for workers in local government. These Regulations also dictate eligibility (particularly for Scheduled Bodies), members' contribution rates, benefit calculations and certain governance requirements. The LGPS is divided into 101 Funds which map the UK. Each LGPS Fund is autonomous to the extent not dictated by Regulations, e.g. regarding investment strategy, employer contributions and choice of advisers.
<b>Maturity</b>	A general term to describe a Fund (or an employer's position within a Fund) where the members are closer to retirement (or more of them already retired) and the investment time horizon is shorter. This has implications for investment strategy and, consequently, funding strategy.
<b>Members</b>	The individuals who have built up (and may still be building up) entitlement in the Fund. They are divided into actives (current employee members), deferreds (ex-employees who have not yet retired) and pensioners (ex-employees who have now retired, and dependants of deceased ex-employees).
<b>Primary contribution rate</b>	The employer contribution rate required to pay for ongoing accrual of active members' benefits (including an allowance for administrative expenses). See Appendix D for further details.
<b>Profile</b>	The profile of an employer's membership or liability reflects various measurements of that employer's <b>members</b> , ie current and former employees. This includes: the proportions which are active, deferred or pensioner; the average ages of each category; the varying salary or pension levels; the lengths of service of active members vs their salary levels, etc. A membership (or liability) profile might be measured for its <b>maturity</b> also.
<b>Rates and Adjustments Certificate</b>	A formal document required by the LGPS Regulations, which must be updated at least every three years at the conclusion of the formal <b>valuation</b> . This is completed by the actuary and confirms the contributions to be paid by each employer (or pool of employers) in the Fund for the three year period until the next valuation is completed.
<b>Scheduled Bodies</b>	Types of employer explicitly defined in the LGPS Regulations, whose employers must be offered membership of their local LGPS Fund. These include Councils, colleges, universities, academies, police and fire authorities etc, other than employees who have entitlement to a different public sector pension scheme (e.g. teachers, police and fire officers, university lecturers).

<b>Secondary contribution rate</b>	The difference between the employer's actual and <b>Primary contribution rates</b> . In broad terms, this relates to the shortfall of its asset share to its <b>funding target</b> . See <a href="#">Appendix D</a> for further details.
<b>Stabilisation</b>	Any method used to smooth out changes in employer contributions from one year to the next. This is very broadly required by the LGPS Regulations, but in practice is particularly employed for large stable employers in the Fund. Different methods may involve: probability-based modelling of future market movements; longer deficit recovery periods; higher discount rates; or some combination of these.
<b>Valuation</b>	An actuarial investigation to calculate the liabilities, future service contribution rate and common contribution rate for a Fund, and usually individual employers too. This is normally carried out in full every three years (last done as at 31 March 2016), but can be approximately updated at other times. The assets value is based on market values at the valuation date, and the liabilities value and contribution rates are based on long term bond market yields at that date also.

## **INVESTMENT STRATEGY STATEMENT**

### **INTRODUCTION**

The Lincolnshire Pension Fund (“the Fund”), which is administered by Lincolnshire County Council (“the Administering Authority”), is required to maintain an Investment Strategy Statement (“ISS”) in accordance with Regulation 7 of the Local Government Pension Fund (Management and Investment of Funds) Regulations 2016.

The Administering Authority has delegated all its functions as administering authority to the Pensions Committee (“the Committee”). The ISS has been agreed by the Committee having taken advice from the Investment Consultant and Head of Pensions.

The ISS, which was last approved by the Committee on 19<sup>th</sup> July 2018, is subject to periodic review at least every three years and without delay after any significant change in investment policy. The Committee has consulted on the contents of the Fund’s investment strategy with such persons it considers appropriate.

The Fund is also required to maintain a Funding Strategy Statements (“FSS”) in accordance with Regulation 58 of the Local Government Pension Scheme Regulations 2013 (as amended). The FSS, which was last approved by the Pensions Committee on 19<sup>th</sup> July 2018, complies with these Regulations.

### **INVESTMENT STRATEGY**

The primary objective of the Fund is to provide pension benefits for members on their retirement and/or benefits on death, before or after retirement, for their dependents, on a defined benefits basis.

The Committee aims to fund the benefits in such a manner that, in normal market conditions, all accrued benefits are fully covered by the value of the Fund’s assets and that an appropriate level of contributions is agreed by the employers to meet the cost of future benefits accruing. For employee members, benefits will be based on service completed and final salary (pre 1 April 2014) and/or the accumulation of individual years built up through the career average pension scheme (post 1 April 2014) and will take account of future inflation increases. This funding position will be reviewed at each triennial actuarial valuation, or more frequently as required.

#### **Investment of money in a wide variety of investments**

It is the Pensions Committee’s policy to invest the assets of the Lincolnshire Pension Fund to spread the risk by ensuring a reasonable balance between different categories of investments. The Pensions Committee takes a long term approach to investment and invests in asset classes and individual investments that are expected to generate an attractive risk-adjusted return for the Pension Fund.

The Fund may invest in a wide range of investments including quoted and unquoted assets in Equities, Fixed Income, Property and Alternatives, either directly or through pooled

investments. The Fund may also make use of derivatives, either directly or in pooled investments, for the purpose of efficient portfolio management or to hedge specific risks.

The Fund's strategic asset allocation is set out below. The table also includes the ranges within which the asset allocation may vary without reference to the Pensions Committee, and the maximum percentage of total Fund value that can be invested in these asset classes. The asset allocation is consistent with the Committee's views on the appropriate balance between generating a satisfactory long-term return on investments, whilst taking account of market risk and the nature of the Fund's liabilities.

Asset class	Strategic allocation	Range	Maximum
Equities	60%	+/- 6%	66%
UK equities	20%	+/- 2%	22%
Global equities	40%	+/- 5.5%	45.5%
Alternatives	15%	+/- 1.5%	16.5%
Property	9%	+/- 1.5%	10.5%
Infrastructure	2.5%	+/- 1.5%	4%
Fixed Income	13.5%	+/- 1.5%	15%
Cash	0%	+/- 0.5%	0.5%

The Regulations do not permit more than 5% of the Fund's value to be invested in entities which are connected with that authority within the meaning of section 212 of the Local Government and Public Involvement in Health Act 2007(e). The investment policy of the Fund does not permit any employer-related investment, other than is necessary to meet the regulatory requirements with regards to pooling.

The Pensions Committee believes that the Fund's portfolio is adequately diversified, and has taken professional advice to this effect from their investment consultant and independent advisor.

The strategic asset allocation includes ranges for each asset class within which the asset allocation can vary. In the event that any asset class range is breached, the Pensions Committee will be informed and the Fund's officers will endeavour to bring the asset allocation back within the range within an appropriate period of time.

The Pensions Committee reviews the suitability of the asset allocation of the Fund on a quarterly basis, following advice from the officers, investment consultant and independent advisor.

It is intended that the Fund's investment strategy will be reviewed at least every three years, following the latest actuarial valuation of the Fund. The investment strategy takes due account of the maturity profile of the Fund and the current funding position.

The Pensions Committee has set the following benchmark against which performance of the Fund will be measured:

Asset class	Benchmark
<b>Equities</b>	
UK Equities	FTSE All Share
Global Equities (ex UK)	MSCI World ex UK Index
Global Equities	MSCI All Countries World Index
<b>Bonds</b>	
UK Gilts Over 5 Years	FTSE UK Gilts Index-Linked Over 5 Years Index
Corporate Bonds	iBoxx £ Non-Gilts Index
All Stocks UK Gilt Index Fund	FTSE UK Gilts Index-Linked All Stocks Index
Corporate Bonds up to 5 Years	iBoxx Sterling Non-Gilts 1-5 Year Index
<b>Property</b>	
Property Venture	7% Per Annum
Property Unit Trusts	UK IPD Monthly Index
Infrastructure	6% Per Annum
<b>Alternatives</b>	LIBOR 3 Months + 4%

### The suitability of particular investments and types of investments

The actuarial valuation, at 31 March 2016, was prepared on the basis of an expected real return on assets of 1.8% over the long term, a nominal return of 4.0% assuming inflation (CPI) to be 2.2%. The Pensions Committee has set the investment objective of producing a long term return of 0.75% p.a above the strategic benchmark.

In order to monitor the investment objective, the Pensions Committee requires the provision of detailed performance measurement of the Fund's investments. This is provided by the Fund's custodian on a quarterly basis. In addition, the Pensions Committee conducts a formal annual performance review of overall fund performance.

### The approach to risk

The Committee is aware that the Fund has a need to take risk to help it achieve its funding objectives. It has an active risk management programme in place that aims to help it identify the risks being taken and put in place processes to manage, measure, monitor and (where possible) mitigate the risks being taken. One of the Committee's overarching beliefs is to only take as much investment risk as is necessary.

The principal risks affecting the Fund are set out below:

Risk	Description	Mitigants
<b>Market</b>	Value of an investment decreases as a result of changing market conditions.	Strategic asset allocation, with suitable diversification and appropriate ranges,

		<p>determined on a triennial basis.</p> <p>The Committee has put in place rebalancing arrangements to ensure the Funds actual allocation does not deviate substantially from its target.</p>
<b>Performance</b>	The Fund's investment managers fail to deliver returns in line with the underlying asset classes.	<p>Analysis of market performance and investment managers' performance relative to their index benchmark on a quarterly basis.</p> <p>Investment Managers present to the Committee on an annual basis.</p>
<b>Valuation</b>	Valuations disclosed in the financial statements, particularly for unquoted investments, are not reflective of the value that could be achieved on disposal.	The valuation of investments is derived using a conservative valuation methodology and, where applicable, market observable data.
<b>Liquidity</b>	The Fund is not able to meet its financial obligations as they fall due or can do so only at an excessive cost.	The Fund maintains sufficient liquid funds at all times to ensure that it can meet its financial obligations.
<b>Interest rate</b>	A change in interest rates will result in a change in the valuation of the Fund's assets and liabilities.	The Fund regularly monitors its exposure to interest rates, and may consider hedging where appropriate.
<b>Foreign exchange</b>	An adverse movement in foreign exchange rates will impact on the value of the Fund's investments.	The Fund regularly monitors its foreign exchange exposure.
<b>Demographic</b>	Changes, such as increased longevity or ill-health retirement, will increase the value of the Fund's liabilities.	Demographic assumptions are conservative, regularly monitored, and reviewed on a triennial basis.
<b>Regulatory</b>	Changes to regulations and guidance may increase the cost of administering the Fund or increase the value of the Fund's liabilities.	The Fund ensures that it is aware of any actual or potential changes to regulations and guidance and will participate in consultations where appropriate.
<b>Governance</b>	The administering authority is	The Fund regularly monitors

	unaware of changes to the Fund's membership which increases the value of its liabilities.	membership information and communicates with employers.
--	---	---

### Approach to pooling investments

In order to satisfy the requirements of the “Local Government Pension Scheme: Investment Reform and Guidance” issued by the Department for Communities and Local Government (“DCLG”) in November 2015, the Pension Fund has elected to become a shareholder in Border to Coast Pensions Partnership Limited (Border to Coast). Border to Coast is a FCA-regulated Operator and Alternative Investment Fund Manager (“AIFM”).

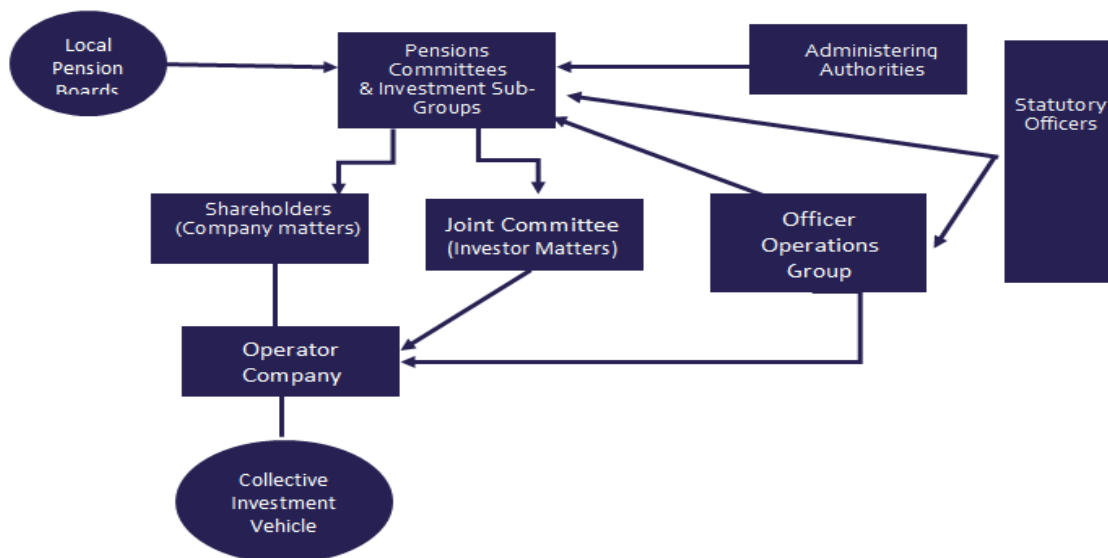

Border to Coast is a partnership of the administering authorities of the following LGPS Funds:

- Bedfordshire Pension Fund
- Cumbria Pension Fund
- Durham Pension Fund
- East Riding Pension Fund
- Lincolnshire Pension Fund
- North Yorkshire Pension Fund
- Northumberland Pension Fund
- South Yorkshire Pension Fund
- Surrey Pension Fund
- Teesside Pension Fund
- Tyne and Wear Pension Fund
- Warwickshire Pension Fund

The partner Funds submitted their proposal to Government on 15<sup>th</sup> July 2016 and have received written confirmation from the Minister to confirm that the proposal meets the criteria laid down in the guidance issued in November 2015.

The governance structure of Border to Coast is as follows:

The Fund will hold Border to Coast to account through the following mechanisms:

- A representative on the Shareholder Board, with equal voting rights, who will provide oversight and control of the corporate operations of Border to Coast.
- A representative on the Joint Committee who will monitor and oversee the investment operations of Border to Coast.
- Officer support to the above representatives from the Officer Operations Group and the Statutory Officer Group.

The Pension Fund will retain the decision making powers regarding asset allocation and will delegate the investment management function to Border to Coast.

It is anticipated that a significant proportion of the Fund's investments will be made through Border to Coast. Where it is not practical or cost effective for assets to be transferred into the pool, they will continue to be managed at the Fund level. This is expected to predominantly include legacy unquoted investments such as limited partnerships. Whilst these assets are unlikely to be transferred, it is expected that once these investments mature the proceeds will be reinvested into Border to Coast. At the current time it is estimated that c. 66% of the Fund's assets will be invested in Border to Coast subject to it having suitable management arrangements in place.

The Fund will perform an annual review of assets that are determined to be held outside to ensure that it continues to demonstrate value for money. Following this review it will submit a report on the progress of asset transfers to the Scheme Advisory Board, in line with the guidance.

### **Approach to environmental, social and corporate governance (ESG) factors**

The Fund considers itself to be a responsible investor and take ESG matters very seriously and monitors investment managers' approach to ESG.

All of the Fund's investment managers consider that ESG factors can have a material impact on an investments financial return. As a result, ESG factors are fully incorporated into their respective investment processes.

The Fund's external Investment Managers also consider the impact of climate change risks and opportunities in the investment process to engage with companies in which they invest to ensure that they are minimising the risks and maximising the opportunities presented by climate change and climate policy. External investment managers are required to report quarterly on their engagement activity.

The Fund does not hold any investments that it deems to be social investments.

The Fund will take non-financial considerations into account when making investments, but not where it is considered to have a detrimental financial impact.

The Fund has not excluded any investments on purely non-financial considerations and will continue to invest in accordance with the Regulations in this regard.

The Fund has published its Responsible Investment Policy and Voting Guidelines on the shared website at [www.wypf.org.uk](http://www.wypf.org.uk).

It is considered that the Pensions Committee represents the views of the Fund membership and, in addition, the views of the Local Pension Board will be taken into account as part of their review of this document.

### **The exercise of rights attaching to investments (including voting rights)**

Lincolnshire Pension Fund is fully committed to responsible investment (RI) to improve the long term value for shareholders. The Fund believes that well governed companies produce better and more sustainable returns than poorly governed companies. The Fund also believe that asset owners, either directly (where resources allow) or through their external managers and membership of collaborative shareholder engagement groups (such as LAPFF), could influence the Board/Directors of underperforming companies to improve the management and financial performance of those companies.

As global investors, the Fund expects the principles of good stewardship to apply globally, whilst recognising the need for local market considerations in its application. Reflecting on this the Fund has summarised its compliance with the UK Stewardship code and principles relating to good stewardship below.

### **Principle 1 – Institutional investors should publicly disclose their policy on how they will discharge their stewardship responsibilities.**

The Lincolnshire Pension Fund takes its responsibilities as a shareholder seriously, and has a Responsible Investment Policy that is aligned with our asset pool, Border to Coast. This can be found on the Pension Fund's shared website at <http://www.wypf.org.uk/Member/Publications/PolicyStatements/Lincolnshire/PolicyStatement>

[s Lincoln Index.aspx](#). It seeks to adhere to the Stewardship Code where possible, and expects its appointed asset managers to do so too. Resources do not currently allow for a dedicated role to oversee LPF's RI responsibilities at a Fund level, however the asset pooling arrangements currently being implemented will enable a more active role in the future.

In practice the Fund applies the Code in two ways; through arrangements with its asset managers and through membership of the Local Authority Pension Fund Forum, a collaborative shareholder engagement group for Local Authority Pension Funds. Through these channels, LPF seeks to improve long term share performance through investment in better governed companies, therefore improving the funding level of the LPF and reducing the cost to stakeholders in the Local Government Pension Scheme.

As part of the manager appointment process, the Fund selects managers who show how their stewardship responsibilities are built in as an integral part of their investment process. Managers are asked to include information on stewardship and engagement activity in their quarterly reports to LPF, so that activity can be monitored. The Fund has regular meetings with its external managers where their stewardship activities are on the agenda. This assists the Fund in understanding the impact of any such activities undertaken and ensures that they are aligned with the engagement work done by LAPFF.

The Fund reports quarterly to the Pensions Committee on the engagement work undertaken by LAPFF and an officer regularly attends the LAPFF meetings. The Fund also attends the LAPFF Annual Conference to ensure a full understanding and input into the work programme of LAPFF.

Voting is carried out at by the external fund managers, who are expected to vote in line with best practice. Managers report detail of voting undertaken quarterly to officers, and the Fund reports quarterly to the Pensions Committee in summary on all voting activity undertaken.

**Principle 2 - Institutional investors should have a robust policy on managing conflicts of interest in relation to stewardship and this policy should be publicly disclosed.**

The Fund expects the asset managers it employs to have effective policies addressing potential conflicts of interest, and that these are all publically available on their respective websites. These are discussed prior to the appointment of a manager, and reviewed as part of the standard manager monitoring process.

In respect of conflicts of interest within the Fund, Pensions Committee and the Pension Board review the Pension Fund Code of Conduct and Conflicts of Interest Policy annually and all members are required to sign an annual declaration form in line with the published policy. The policy can be found on the shared LPF website at [www.wypf.org.uk](http://www.wypf.org.uk). In addition, Committee members are required to make declarations of interest prior to committee meetings which are documented in the minutes of each meeting and available on the Council's website at [www.lincolnshire.gov.uk](http://www.lincolnshire.gov.uk).

**Principle 3 - Institutional investors should monitor their investee companies.**

As investors we own a portion of the companies we invest in. With working through our external managers and LAPFF we can use our rights as owners to encourage companies to act more responsibly and improve their practices. All our managers are required to consider how environmental, social and governance factors might impact companies sustainability, and therefore their long term share performance.

Day-to-day responsibility for managing our externally managed equity holdings is delegated to our appointed asset managers, and the Fund expects them to monitor their investee companies and engage where necessary. Managers are asked to include information on stewardship and engagement activity in their quarterly reports to LPF, so that activity and impact can be monitored. The Fund has regular meetings with its external managers where their stewardship activities are on the agenda. This assists the Fund in understanding the impact and effectiveness of any such activities undertaken and ensures that they are aligned with the engagement work done by LAPFF. Reports on the Funds voting and engagement activity through LAPFF are received by the Pensions Committee on a quarterly basis.

Resources do not currently allow for a dedicated role to monitor investee companies at a Fund level, however the asset pooling arrangements currently being implemented will enable a more active role in the future.

**Principle 4 - Institutional investors should establish clear guidelines on when and how they will escalate their activities.**

As highlighted above, responsibility for day-to-day interaction with companies is delegated to the Fund's asset managers, including the escalation of engagement when necessary. Their guidelines for such activities are expected to be disclosed in their own statement of adherence to the Stewardship Code. We review each manager's policy on engagement and escalation prior to appointment and we review their engagement activity during regular review meetings with them, and support it when required. Escalation routes across our managers involve meetings with company management, meetings with Non-Executive Directors, collaborating with other institutional shareholders, submitting resolutions at general meetings and in the most extreme instances divestment of shares. The outcome of any engagement is reported to the Fund through the normal reporting routine.

On occasion, the Fund may itself choose to escalate activity through its participation in the Local Authority Pension Fund Forum. The areas where escalation might occur would be aligned with the LAPFF work programme. Fund involvement would be by either co-signing a shareholder resolution or publically supporting a shareholder resolution. This would happen following a request from LAPFF explaining the engagement activity taken so far and the reasons why a shareholder resolution is required. The Fund had an agreed process for this internally which requires a paper taken to our Pensions Committee (time allowing) or through delegation to the Council's Executive Director of Finance and Public Protection in consultation with the Chair and Vice Chair of the Pensions Committee to agree. Examples of escalation activity from LAPFF that the Fund has supported are shown below:

- Supporting the Human Rights Capital shareholder resolution at Sports Direct
- Part of the 'Aiming for A' investor coalition – successfully co-filing at BP, Shell, Anglo American, Rio Tinto and Glencore on strategic resilience resolutions
- Supported shareholder resolutions at National Express on workplace rights

The Fund monitors and participates in shareholder litigation through its contracts with IPS (Institutional Protection Services) and US law firm Labaton Sucharow. In addition, supplementary monitoring is provided by BLBG.

**Principle 5 - Institutional investors should be willing to act collectively with other investors where appropriate.**

The Fund seeks to work collaboratively with other institutional shareholders in order to maximise the influence that it can have on individual companies. The Fund achieves this through membership of the Local Authority Pension Fund Forum, which engages with companies over environmental, social and governance issues on behalf of its members. The LAPFF agree planned work programmes each year which are discussed and approved at LAPFF meetings. This plan sets out the engagement areas for activity for the coming year. Lincolnshire Pensions Team Accounting, Investment and Governance Manager Claire Machej is the named representative responsible for attending these meetings and actively participates in any discussions and setting of the work programme. She raises any concerns that the Fund may have and feeds back to the Pensions Committee on a quarterly basis.

The asset pooling arrangements with Border to Coast currently being implemented will enable additional collaborative working.

The contact for any potential collective action with the Fund is the Head of Pensions, Jo Ray, at [jo.ray@lincolnshire.gov.uk](mailto:jo.ray@lincolnshire.gov.uk).

**Principle 6 - Institutional investors should have a clear policy on voting and disclosure of voting activity.**

Responsibility for the exercise of voting rights is delegated to the Fund's appointed asset managers. The Fund has a Corporate Governance Voting Guidelines and Voting Guidelines policy that can be found on the Pension Fund's shared website at [http://www.wypf.org.uk/Member/Publications/PolicyStatements/Lincolnshire/PolicyStatements\\_Lincoln\\_Index.aspx](http://www.wypf.org.uk/Member/Publications/PolicyStatements/Lincolnshire/PolicyStatements_Lincoln_Index.aspx). This is aligned to the Border to Coast policy.

The quarterly reports presented to the Pensions Committee include high level voting activity and are available on the Council's website, alongside all committee reports.

The Fund participates in stock lending through its Custodian. Stock is not recalled ahead of company meetings to allow voting on the holdings participating in the stock lending programme, due to the restricted resources within the internal team.

**Principle 7 - Institutional investors should report periodically on their stewardship and**

**voting activities.**

The Fund reports quarterly to the Pensions Committee on stewardship activity through a specific section on voting undertaken each quarter, in the Fund Update. This includes details of engagement activity undertaken through the Local Authority Pension Fund Forum. On an annual basis the Fund includes a section on Stewardship Responsibilities in its Annual Report and Accounts, detailing voting activity and highlighting the key engagements over the year through its membership of LAPFF. These are available on the Council's website.

Data to produce these reports is taken from the Fund's external managers, and from reports produced by LAPFF.

**Compliance and monitoring**

The investment managers are required to adhere to the principles set out in this Investment Strategy Statement. The Pensions Committee will require an annual written statement from the investment managers that they have adhered to the principles set out in this statement.

The Investment Strategy Statement of the Lincolnshire Pension Fund will be reviewed by the Pensions Committee at least every 3 years and more regularly if considered appropriate or amendments are required.

Approved by Lincolnshire Pension Committee 21<sup>st</sup> March 2019

# Communication Policy Statement

## COMMUNICATION POLICY STATEMENT

Lincolnshire County Council, as administering authority for the Local Government Pension Scheme, is required by statute to publish a communications policy statement. The Fund communicates with over 260 employers and over 75,000 scheme members, in addition to a large number of other interested parties.

The Regulations governing the Local Government Pension Scheme are laid before parliament by the Ministry of Housing, Communities and Local Government. One of the key requirements they make on all Administering Authorities is to prepare, maintain and publish a written statement setting out the information below:-

- a) The Fund must now prepare, maintain and publish a written statement setting out its policy concerning communications with:
  - members;
  - representatives of members;
  - prospective members; and
  - employing authorities.
- b) In particular, the statement must set out the Fund's policy on:
  - i. the provision of information and publicity about the Scheme to members, representatives of members and employing authorities (including non-Scheme Employers);
  - ii. the format, frequency and method of distributing such information or publicity; and
  - iii. the promotion of the Scheme to prospective members and their employing authorities.

The day-to-day administration of the Local Government Pension Scheme is carried out on behalf of the County Council by West Yorkshire Pension Fund (WYPF), in a shared service arrangement. Communication material is produced by WYPF in collaboration with the Pensions Team in Lincolnshire. All arrangements for forums, workshops and meetings covered within this statement are made in partnership with WYPF.

The Fund communicates with all stakeholders, as defined in specific legislation, and listed above.

Communication is increasingly distributed via electronic means, with all documents available on a dedicated Pensions website ([www.wypf.org.uk](http://www.wypf.org.uk)).

WYPF provide a dedicated enquiry phone numbers and emails for both scheme members and employers for pension related enquiries. For scheme members it is 01274 434999 and [pensions@wypf.org.uk](mailto:pensions@wypf.org.uk), and for employers it is 01274 434900 and [wypf.pfr@wypf.org.uk](mailto:wypf.pfr@wypf.org.uk).

The appropriately qualified staff from the County Council, WYPF or external advisers will deliver presentations to groups of stakeholders and conduct individual meetings.

The Fund's objective in respect of communication is to comply with relevant legislation and ensure relevant individuals and employers receive accurate and timely information about their pension arrangements. Methods of communication are set out in the table below.

Reviewed 21<sup>st</sup> March 2019 by the Pensions Committee

# **Governance Policy and Compliance Statement**

Lincolnshire County Council, as administering authority (and Scheme Manager) for the Local Government Pension Scheme, is required by statute to publish a governance compliance statement. The Council has elected to do this by publishing a concise Governance Policy Statement and then to outline, as required by legislation, the extent to which that statement and the underlying practices demonstrate compliance with best practice guidance as published by the Department for Communities and Local Government. This latter aspect constitutes the Governance Compliance Statement.

The Governance Policy and Compliance Statements are set out in turn below.

## **GOVERNANCE POLICY STATEMENT**

The County Council has delegated its pension fund administering authority functions to a Pensions Committee and the Executive Director of Finance and Public Protection. The Public Service Pensions Act (2013) required all administering authorities to introduce a local Pension Board to assist the Scheme Manager.

### **Pensions Committee**

The Pensions Committee has 11 members in total, 8 of which are County Councillors and 3 co-opted members. All the members have full voting rights.

The 8 County Councillors represent the political balance of the Council.

The 3 co-opted members comprise:

- 1 representative from the other local authorities within the County,
- 1 representative for non Local Authority employers, and
- 1 Trade Union representative, reflecting the interests of scheme members.

Under the County Council's Constitution, the Pensions Committee exercises the following functions, to;

- Drawing upon appropriate professional advice, to set investment policies for the Fund, including the establishment and maintenance of a strategic benchmark for asset allocation, and approval of the Investment Strategy Statement.
- To review the performance of Border to Coast Pensions Partnership Limited and its sub-funds, legacy fund managers and associated professional service providers.

- To approve the annual Report and Statement of accounts of the fund.
- To consider any other matters relevant to the operation and management of the fund.
- As necessary and appropriate issue instructions to the Council's representative as shareholder of Border to Coast Pensions Partnership Limited on matters affecting the exercise of the Council's rights as shareholder in the company.
- To respond to any relevant consultations impacting upon the benefit provisions of the Local Government Pension Scheme.

In fulfilling its functions the Committee shall have regard to the advice of the Lincolnshire Local Pension Board established in accordance with the Local Government Pension Scheme (Amendment) (Governance) Regulations 2015 and shall receive and consider recommendations from the Border to Coast Pensions Partnership Joint Committee.

The Pensions Committee has four regular meetings, two manager monitoring meetings and two training meetings each year. In addition, one or more special meetings may be held to appoint new investment managers or other professional advisers.

The Pensions Committee's regular quarterly meetings are open to the public and agendas, reports and minutes are made available through the County Council's website. An annual report on the management of the fund is provided to all scheme employers with an abbreviated version distributed to scheme members.

## **Executive Director of Finance and Public Protection**

The Executive Director of Finance and Public Protection is responsible for the day-to-day administration of the benefits and assets of the pension scheme, specifically to:

- authorise payment of statutory pensions and allowances,
- undertake or arrange for all necessary transactions associated with the management of the assets of the Pension Fund, and
- agree appropriate means of securing external representation on the Pensions Committee, in consultation with relevant external bodies.

## **Lincolnshire Pension Board**

The Lincolnshire Pension Board will ensure the Scheme Manager effectively and efficiently complies with the Code of Practice on the governance and administration of public service pension schemes issued by the Pensions Regulator. The Board will also ensure that it complies with the knowledge and understanding requirements in the Pensions Regulator's Code of Practice.

In addition to the local structure, the Lincolnshire Pension Board is accountable to the Pensions Regulator and the National Scheme Advisory Board.

The Pensions Regulator will also be a point of escalation for whistle blowing or similar issues (supplementary to the whistle blowing policy and anti-fraud and corruption policy operated by the administering authority, which operate to include all of the functions of the Council and its advisers).

The role of the Lincolnshire Pension Board is set out below:

- Assist Lincolnshire County Council as Scheme Manager;
- To secure compliance with the scheme regulations and other legislation relating to the governance and administration of the scheme and any statutory pension scheme that is connected with it;
- To secure compliance with requirements imposed in relation to the scheme and any connected scheme by the Pensions Regulator; and
- In such other matters as the scheme regulations may specify.

The terms of reference for the Board are available on the Funds shared website with WYPF at [www.wypf.org.uk](http://www.wypf.org.uk).

The Lincolnshire Pension Board consists of five members:

- two employer representatives (to represent all employers within the Scheme)
- two scheme members representatives (to represent all members of the Scheme (active, deferred and pensioner))
- an independent member (to act as Chairman)

The employer and scheme member representatives can vote. The Independent Chairman cannot vote.

The Lincolnshire Pension Board has a minimum of four meetings each year. In addition, Board members must attend regular training events.

The Lincolnshire Pension Board meetings are open to the public and agendas, reports and minutes are made available through the Funds shared website with WYPF at [www.wypf.org.uk](http://www.wypf.org.uk). An annual report on the work of the Board is included in

the Fund's annual report, which is published on the Council's website and provided to all scheme employers with an abbreviated version distributed to scheme members.

Any complaint or allegation of breach of due process brought to the attention of the Lincolnshire Pension Board shall be dealt with in accordance with the Code of Practice as published by the Pensions Regulator.

Any questions about the governance of the Lincolnshire Local Government Pension Fund should be addressed to Jo Ray, Head of Pensions (email: [jo.ray@lincolnshire.gov.uk](mailto:jo.ray@lincolnshire.gov.uk) or telephone 01522 553656).

### Asset Pooling Governance

In response to the change in regulations, LGPS Funds have to pool the investment of their assets. Lincolnshire Pension Fund is a Partner Fund in the Border to Coast Pensions Partnership Limited (Border to Coast), one of the eight asset pools created.

The diagram below shows the governance structure for Border to Coast.

The Fund will hold Border to Coast to account through the following mechanisms:

- A representative on the Shareholder Board, with equal voting rights, who will provide oversight and control of the corporate operations of Border to Coast (LCC S151 Officer).
- A representative on the Joint Committee who will monitor and oversee the investment operations of Border to Coast (Pensions Committee Chairman).

- Officer support to the above representatives from the Officer Operations Group and the Statutory Officer Group (Head of Pensions).

The Pension Fund will retain the decision making powers regarding asset allocation and will delegate the investment management function to Border to Coast.

Reviewed 21<sup>st</sup> March 2019 by the Pensions Committee.

## GOVERNANCE COMPLIANCE STATEMENT

Principle		Full Compliance	Comments
<b>A - Structure</b>	<b>a. The management of the administration of benefits and strategic management of fund assets clearly rests with the main committee established by the appointing council.</b>	Yes	See terms of reference for the Pensions Committee in the Policy Statement above.
	<b>b. That representatives of participating LGPS employers, admitted bodies and scheme members (including pensioner and deferred members) are members of either the main or secondary committee established to underpin the work of the main committee.</b>	Partial	The Council has not, to date, seen the need to establish a secondary committee/panel. It will, however, keep this aspect under review and does establish working groups from the Committee to deal with specific issues. Pensioner and deferred beneficiaries are not presently represented directly on the Committee – see B a. below.
	<b>c. That where a secondary committee or panel has been established, the structure ensures effective communication across both levels.</b>	Not Relevant	As discussed above, no such forum has been established as yet.
	<b>d. That where a secondary committee or panel has been established, at least one seat on the main committee is allocated for a member from the secondary committee or panel.</b>	Not Relevant	As discussed above, no such forum has been established as yet.

<b>B - Representation</b>	<p>a. That all key stakeholders are afforded the opportunity to be represented within the main or secondary committee structure. These include :-</p> <ul style="list-style-type: none"> <li>• Employing authorities (including non-scheme employers, e.g. admitted bodies);</li> <li>• Scheme members (including deferred and pensioner scheme members),</li> <li>• Where appropriate, Independent professional observers, and</li> <li>• Expert advisors (on an ad hoc basis)</li> </ul>	Partial	<p>The Committee has 11 members, all with voting rights, of which 8 are County Council Councillors. Other members include one representing other local authorities (district councils) and one representing small scheduled bodies, currently from an Internal Drainage Board. Member related issues are dealt with by having a trade union representative on the Committee. Given the statutory guarantee that exists in respect of member benefits, this is felt to be sufficient representation. The Council will review this aspect periodically. The Committee have appointed an independent investment advisor who attends all Committees.</p>
	<p>b. That where lay members sit on the main or secondary committee, they are treated equally in terms of access to papers, meetings and training and are given full opportunity to contribute to the decision making process, with or without voting rights.</p>	Yes	<p>All members of the Committee have full voting rights and equal access to information, training, etc.</p>
<b>C – Selection and Role of Lay Members</b>	<p>a. That committee or panel members are made fully aware of the status, role and function they are required to perform on either a main or secondary committee.</p>	Yes	<p>Nationally customised training is available to all members and this is supplemented by locally provided induction sessions for new members of the Committee. In addition, the Committee agrees an annual training plan with specific topics covered</p>

			on set dates.
	<b>b. That at the start of any meeting, committee members are invites to declare any financial or pecuniary interest related to specific matters on the agenda.</b>	Yes	The declaration of member's interests is a standard item on the agenda of the Pensions Committee.
<b>D - Voting</b>	<b>a. That the policy of individual administering authorities on voting rights is clear and transparent, including the justification for not extending voting rights to each body or group represented on main LGPS committees.</b>	Yes	Full voting rights are given to all members of the Committee.
<b>E – Training/Facility Time/Expenses</b>	<b>a. That in relation to the way in which statutory and related decisions are taken by the administering authority, there is a clear policy on training, facility time and reimbursement of expenses in respect of members involved in the decision-making process.</b>	Yes	See C a. above. All expenses incurred by members of the Pensions Committee are either met by the body they represent or directly by the Fund itself.
	<b>b. That where such a policy exists, it applies equally to all members of committees, sub-committees, advisory panels or any other form of secondary forum.</b>	Yes	All members are treated equally in every respect.

	<b>c. That the administering authority considers the adoption of annual training plans for committee members and maintains a log of all such training undertaken.</b>	Yes	The Committee agrees an annual training plan with specific topics covered on set dates. All training undertaken by members of the Pensions Committee is recorded and additional training opportunities are regularly brought to the attention of the Committee, either in monthly update letters or in reports taken to Committee.
<b>F – Meetings - Frequency</b>	<b>a. That an administering authority's main committee meet at least quarterly.</b>	Yes	See Compliance Policy Statement above.
	<b>b. That an administering authority's secondary committee or panel meet at least twice a year and is synchronised with the dates when the main committee sits.</b>	Not Relevant	As discussed above, no such forum has been established as yet.
	<b>c. That an administering authority who does not include lay members in their formal governance arrangements, provide a forum outside of those arrangements by which the interests of key stakeholders can be represented.</b>	Not Relevant	Three added members exist and have equal rights with all mainstream members in all respects.
<b>G – Access</b>	<b>a. That, subject to any rules in the council's constitution, all members of main and secondary committees or panels have equal access to</b>	Yes	All members are treated equally in every respect.

	<b>committee papers, documents and advice that falls to be considered at meetings of the main committee.</b>		
<b>H – Scope</b>	<b>a. That administering authorities have taken steps to bring wider scheme issues within the scope of their governance arrangements.</b>	Partial	The terms of reference of the Pensions Committee were changed a few years ago to include benefit related matters which up until that time had been dealt with elsewhere within the governance arrangements of the Council. A report on the administration of the scheme is taken to each quarterly committee meeting. At present the Council does not believe there is a strong argument in favour of appointing an independent professional observer on administration/governance issues in addition to the independent advisor already in place in respect of investment matters.
<b>I - Publicity</b>	<b>a. That administering authorities have published details of their governance arrangements in such a way that stakeholders with an interest in the way in which the scheme is governed, can express an interest in wanting to be part of those arrangements.</b>	<b>Yes</b>	The County Council publishes the many governance documents and communicates regularly with employers and scheme members.

# **Pensions Administration Strategy**

  - b. Schedule of charges
  - c. Charging levels

## 1. Regulatory framework and purpose

### The Regulations

This strategy is made under Regulation 59 of The Local Government Pension Scheme Regulations (LGPS) 2013.

In line with these regulations Lincolnshire Pension Fund (LPF), West Yorkshire Pension Fund (WYPF) and Hounslow Pension Fund (HPF) employers have been consulted on the strategy, and a copy has been sent to the secretary of state.

### Purpose

This strategy covers all three Funds within the shared service, being Lincolnshire Pension Fund West Yorkshire Pension Fund and Hounslow Pension Fund, administered under a collaboration agreement. Within this document the shared service administration (based in Bradford with a satellite office in Lincoln), will be referred to as 'the administrator'.

This strategy outlines the processes and procedures to allow LPF, WYPF, HPF and employers to work together in a cost- effective way to administer the LGPS whilst maintaining an excellent level of service to members. It recognises that working co-operatively and collaboratively will be key to achieving these aims.

## 2. Review of the strategy

This strategy will be reviewed as soon as reasonably possible following any changes to the regulations, processes or procedures that affect the strategy or on a triennial basis if this occurs sooner.

Changes to this strategy will be made following consultation with employers and a copy of the updated strategy will be sent to the secretary of state.

The administrator will constantly seek to improve communications between itself and the employers.

Employers are welcome to discuss any aspect of this strategy with the administrator at any time and may make suggestions for improvement to the strategy.

## 3. Liaison and communication

### Authorised contacts for employers

Each employer will nominate a contact to administer the three main areas of the LGPS:

- a strategic contact for valuation, scheme consultation, discretionary

- statements and IDRP;
- an administration contact for the day-to-day administration of the scheme, completing forms and responding to queries; and
- a finance contact for completion and submission of monthly postings and co-ordination of exception reports.

If they wish, employers may also nominate additional contacts.

All contacts will receive a login name and password that allows them to access the Civica employer portal for online administration and the combined remittance and monthly return.

When registering, each contact should complete a **Main contact registration** form and **Authorised user list** form, and sign the administrator's user agreement for the secure administration facility.

The three main contacts are responsible for ensuring that contacts are maintained by notifying the administrator when one leaves and registering new contacts where necessary.

### Liaison and communication with employers

The administrator will provide the following contact information for employers and their members:

- a named Pension Fund Representative for regulatory or administration queries, training, advice and guidance;
- a named finance business partner to assist with the monthly returns process; and
- a dedicated contact centre for member queries.

In addition to this, the administrator takes a multi-channel approach to communication with its employers.

Format of communication	Frequency	Method of distribution
Pension Fund Representatives	8.30am to 4.30pm Monday to Friday	Face-to-face/telephone/e-mail
Website	Constant	Web
Fact card	1 per year	Mail
Fact sheets	Constant	Web
Employer guide	Constant	Web/electronic document
<i>Ad hoc</i> training	As and when required	Face-to-face
Update sessions	2 per year	Meeting
Annual meeting	1 per year	Meeting
Manuals/toolkits	Constant	Web/electronic document
<i>Pension Matters</i> and <i>round-up</i>	12 per year and as and when required	Wordpress blog and e-mail
Social media	Constant	Web

<i>Ad hoc</i> meetings	As and when required	Face-to-face
Workshops	10 per year	Face-to-face

## 4. Employer duties and responsibilities

When carrying out their functions, employers must have regard to the current version of this strategy.

### Events for notification

Event	Preferred method of notification	Other methods	Target	Acceptable performance
<b>Monthly postings (submitted via secure portal)</b>	Approved spreadsheet	None	19 <sup>th</sup> day of the month following the month in which contributions were deducted.	100% compliance of returns received in target
<b>New starters</b>	Monthly return		Notified via the monthly return, the administrator will process the data within 2 weeks following monthly return submission.	90% compliance or better
<b>Change of hours, name, payroll number or job title</b>	Monthly return (exception report)	Web form	Notified via monthly returns, the administrator will process the data within 2 weeks following monthly return submission. For exception report output from the monthly return, change data response must be provided to the administrator within 2 weeks of receipt of the exception report. If the employer is not using monthly return, then information is due within 6 weeks of change event.	90% compliance or better

<b>50/50 &amp; main scheme elections</b>	Monthly return	None	Notified by the employer via monthly return, the administrator will process the data within 2 weeks following monthly data submission.	90% compliance or better
<b>Service breaks/absence</b>	Web form	None	Within 6 weeks of the date of the absence commencing.	90% compliance or better
<b>Under 3 months opt-outs</b>	Monthly return	None	Notified by the employer via monthly return, the administrator will process the data within 2 weeks following monthly data submission.	90% compliance or better
<b>Leavers</b>	Monthly return Web form Exception reports	None	Notified by the employer via monthly return, the administrator will process the data within 2 weeks following monthly data submission, else within 6 weeks of leaving. For exception reports leaver forms must be provided within 2 months of receipt of the exception report.	90% compliance or better
<b>Retirement notifications</b>	Web form		10 days before the member is due to retire unless the reason for retirement is ill health or redundancy.	90% compliance or better
<b>Death in service notification</b>	Web form		Within 3 days of the date of notification.	100% compliance

## Responsibilities

Employers are responsible for ensuring that member and employer contributions are deducted at the correct rate, including any additional contributions.

The administrator is not responsible for verifying the accuracy of any information provided by the employer for the purpose of calculating benefits under the provisions of the Local Government Pension Scheme. That responsibility rests with the employer.

Any over-payment as a result of inaccurate information being supplied by the employer shall be recovered from that employer.

In the event of the administrator being fined by The Pensions Regulator, this fine will be passed on to the relevant employer where that employer's actions or inaction caused the fine.

### **Discretionary powers**

The employer is responsible for exercising the discretionary powers given to employers by the regulations. The employer is also responsible for compiling, reviewing and publishing its policy to employees in respect of the key discretions as required by the regulations.

### **Member contribution bands**

Employers are responsible for assessing and reassessing the contribution band that is allocated to a member. The employer must also inform the member of the band that they have been allocated on joining the scheme and when they have been reallocated to a different band.

### **Internal dispute resolution procedure (IDRP)**

Employers must nominate an adjudicator to deal with appeals at stage one of the IDRP where the dispute is against a decision the employer has made or is responsible for making. Employers are responsible for providing details of the IDRP and the adjudicator in writing to members when informing them of decisions they have made.

## **5. Payments and charges**

### **Payments by employing authorities**

Employing authorities will make all payments required under the LGPS regulations, and any related legislations, promptly to LPF and /or its Additional voluntary contribution (AVC) provider (Prudential) as appropriate.

### **Paying contributions**

Member and employer contributions can be paid over at any time and should be accompanied by a monthly postings submission. The latest date contributions can be paid is the 19th day of the month following the month in which the deductions were made.

Where the 19th falls on a weekend or bank holiday, the due date becomes the last working day prior to the 19th.

### **AVC deductions**

Employers will pay AVCs to the relevant provider within one week of them being deducted.

### **Late payment**

The employer may be reported to The Pensions Regulator where contributions are received late, in accordance with the regulator's code of practice.

### **Payment method**

Contributions (but not AVCs) should be paid to the administrator by BACS payment direct to WYPF, LPF or HPF's bank account.

### **Early retirement and augmentation costs**

Employers have the option to pay the full early retirement cost or pay by instalments over up to 5 years, depending on their ability to pay and if agreed by the Pension Fund. Interest is charged if the option to pay by instalments is taken, and the annual interest used Base Rate + 1%.

All augmentation costs must be paid in full in one payment.

### **Interest on late payment**

In accordance with the LGPS regulations, interest will be charged on any amount overdue from an employing authority by more than one month.

### **Employer contributions**

Employers' contributions rates are not fixed and employers are required to pay whatever is necessary to ensure that the portion of the fund relating to their organisation is sufficient to meet its liabilities.

### **Actuarial valuation**

An actuarial valuation of the fund is undertaken every three years by the fund actuary. The actuary balances the fund's assets and liabilities in respect of each employer and assesses the appropriate contribution rate and deficit payment, if appropriate, for each employer for the subsequent three years.

### **Administration charges**

The cost of running the administrator is charged directly to the fund; the actuary takes these costs into account in assessing employers' contribution rates.

### **Administering authority duties and responsibilities**

When carrying out their functions the administrator will have regard to the current version of the strategy.

## 6. Scheme administration

The administrator will ensure that workshops and annual meetings are held on a regular basis and actively seek to promote the Local Government Pension Scheme via the following events:

- Employer annual meeting;
- Pre-retirement courses;
- New starters induction courses;
- Complete guide to administration workshops;
- Your responsibilities workshops;
- Monthly contributions workshops; and
- Ill Health retirement workshops.

### Responsibilities

The administrator will ensure the following functions are carried out:

- Provide a helpdesk facility for enquiries, available during normal office hours, providing a single point of access for information relating to the LGPS;
- Create a member record for all new starters admitted to the LGPS;
- Collect and reconcile employer and employee contributions;
- Maintain and update members' records for any changes received by the administrator;
- At each actuarial valuation, the administrator will forward the required data in respect of each member and provide statistical information over the valuation period to the fund actuary so that they can determine the assets and liabilities for each employer;
- Communicate the results of the actuarial valuation of the fund to each employer;
- Provide every active, deferred and pension credit member with a benefit statement each year;
- Provide estimate of retirement benefits on request by the employer;
- Calculate and pay retirement benefits, deferred benefits and death in service benefits in accordance with LGPS rules, members' options and statutory limits; and
- Comply with HMRC legislation.

### Decisions

The administrator will ensure that members are notified of any decisions made under the scheme regulations in relation to their benefits within 10 working days of the decision being made and will ensure the member is informed of their right of appeal.

## Discretionary powers

The administrator will ensure the appropriate policies are formulated, reviewed and publicised in accordance with the scheme regulations.

## Internal dispute resolution procedure (IDRP)

The administrator will deal with employer appeals at stage two of the IDRP for WYPF and LPF. A nominated officer of the London Borough of Hounslow will undertake this role for HPF.

The administrator will nominate an adjudicator to deal with appeals at stage one and stage two of the IDRP where the appeal is against a decision the administrator has made or is responsible for making.

## Fund performance levels

The minimum performance targets are shown below.

Service	Days	Minimum target
1. New member records created	10	75%
2. Update personal records	10	75%
3. Posting monthly contributions to member records	10	90%
4. Calculate and action incoming transfer values	2 months	100%
5. Deferred benefits – payment of lump sums	3	75%
6. Provide details of deferred benefit entitlement	10	75%
7. Refund of contributions – notification of entitlement	5	75%
8. Refund of contributions – payment	10	75%
9. Action agreed transfers out on receipt of acceptance	10	75%
10. Provide estimate of retirement benefits	10	75%
11. Retirement benefits – payment of lump sum	3	75%
12. Retirement benefits – recalculations of pension/lump sum	10	75%
13. Calculation and payment of death benefits on receipt of all necessary information	5	75%
14. Make death grant payment to the member's nomination (provided all relevant information is received)	1 month	100%
15. Percentage of telephone calls answered within 20 seconds		90%
16. Annual benefit statements issued to deferred members by		31 May
17. Annual benefit statements issued to active members by		31 August
18. Make payment of pensions on the due date		100%
19. Issue P60's to pensioners within statutory deadlines		100%
20. Provide information on request in respect of pension share on divorce within legislative timescales		100%
21. Implement Pension Share Orders within legislative timescales		100%
22. Undertake annual reviews to establish continuing entitlements to pensions for children over the age of 17		100%

## **7. Unsatisfactory performance**

### **Measuring performance**

Both employer and administrator targets will be measured on a quarterly basis using the Civica document management system. Employers will be notified of their performance level each quarter.

Administrator performance levels will be published on a quarterly basis in the employer newsletter. Overall employer and administrator performance will be published by LPF in the Report and Accounts.

### **Unsatisfactory performance**

Where an employer materially fails to operate in accordance with the standards described in this strategy, and this leads to extra costs being incurred by the administering authority, the administering authority may issue a written notice to the employer requiring that these extra costs be met by the employer. A schedule of charges is detailed in Appendix B.

## Appendix B – Schedule of charges

Performance areas	Reason for charge	Basis of charge
Any overpayment made to a member due to inaccurate information provided by an employer will be recovered from employer, if the total overpaid is more than £50.	If the overpaid amount is the result of the employer's error, and the amount is over £50, then as such it will be recharged to the employer, plus costs of resolving and recovering the overpayment. If the overpayment is recovered from the member, then the amount recovered will be passed back to the employer, less any cost of overpayment recovery actions.	Actual amount overpaid + admin charge (admin charge will be based on managerial input at level III), minimum half day charge of £110 + VAT + cost of recovery actions (court and legal fees). Any part or all of this charge may be waived at head of service discretion.  Number of days late interest charged at base rate plus 1%.
Contributions to be paid anytime but latest date by 19th of month (weekends and bank holidays on the last working day before 19th).	Due by 19th month – late receipt of funds, plus cost of additional time spent chasing payment.	Failure to provide appropriate information, resulting in significant work will result in admin charge (at Senior Pensions Officers level II) at £136 a day. This may be waived at head of service discretion.
Monthly return due anytime but latest by 19th month, errors on return, i.e. employer/employee rate deducted incorrectly, exception reporting errors to be resolved within two months.	Due by 19th month, any additional work caused by late receipt of information incorrect information, incorrect contributions.	Failure to provide appropriate information, resulting in significant work will result in admin charge (at Senior Pensions Officers level II) at £136 a day. This may be waived at head of service discretion.
Change in member detail	If submitted via monthly data, the administrator will process data within 2 weeks following monthly data submission. For exception reports output from monthly returns, change data response must be provided to the administrator within 2 weeks of receipt of the exception report.	Failure to provide appropriate information, resulting in significant work will result in admin charge (at Pensions Officer level I) at £96 + VAT a day. This may be waived at head of service discretion.
Early leavers information	If submitted via monthly data, the administrator will process data within 2 weeks following monthly data submission, else within 6 weeks of date of leaving. For exception reports leaver forms provided to the	Failure to provide appropriate information, resulting in significant work will result in admin charge (at Pensions Officer level I) at £96 + VAT a day. This may be waived at head of service discretion.

	administrator within two months of receipt of the exception report.	
Retirement notifications	Due 10 working days before last day of employment unless the reason for retirement is ill health or redundancy – additional work caused by late receipt of information.	Failure to provide appropriate information, resulting in significant work will result in admin charge (at senior pension officers level II) at £136 + VAT a day. This may be waived at head of service discretion.
Death in membership	Due within 3 working days of the notification – additional work caused by late receipt of information.	Failure to provide appropriate information, resulting in significant work will result in admin charge (at pension manager level III) at £220 + VAT a day. This may be waived at head of service discretion.
AVC deducted from pay to be paid anytime but latest date by 19th month. (weekends and bank holidays on the last working day before 19th).	Additional investigative work caused through lack of compliance by employer.	Failure to comply by employer, causing additional work for WYPF will result in admin charge (at pension officers level I) at £96 + VAT a day. This may be waived at head of service discretion.
Re-issue of invoices	Charge based on number of request.	Additional work caused by reproducing invoices will result in admin charge (at pension officer level I) at £96 + VAT a day. This may be waived at head of service discretion.
Authorised officers list not updated – Pension Liaison Officers, monthly contributions responsible officers.	Costs of additional work resulting from employer's failure to notify the administrator of change in authorised officers list.	Failure to comply by employer, causing additional work for the administrator will result in admin charge (at Pensions Officer level I) at £96 + VAT a day. This may be waived at head of service discretion.
Security breach on system re data protection.	Recharge employers any fines imposed on us in this event.	Actual amount fine imposed + admin charge (admin charge will be based on managerial input at level III) at £220 + VAT a day. This charge may

		be waived at head of service discretion.
Member requests estimate	The first estimate provided in each financial year is free, then subsequent estimates are chargeable.	1st request in each financial year is free. Additional request is charged at a notional charge of £50 + VAT is made. This charge is for each member's record folder reference.
Pension sharing order	For pension sharing order work, each party will be charged according to the instruction in the court order.	The charge is £250 + VAT for this work.
Miscellaneous items: • Benefit recalculation • Member file search and record prints • Supplementary information requests	Where information is requested by members that is in addition to routine information.	A notional charge of £50 + VAT will be levied. This charge is for each members record folder reference.

## Appendix C – Charging Levels

Charges will be made on half a day basis, but for less than a quarter day no charge will be made and for more than half a day a full-day charge will be made.

Charge levels	I	II	III
Daily charge	£96	£136	£220
Half day charge	£48	£68	£110

Level I – work at Pensions Officer level

Level II – work at Senior Pensions Officer level

Level III – work at Pensions Manager level
