

LINCOLNSHIRE HEALTH AND WELLBEING BOARD

Open Report on behalf of East Lindsey Strategic Health and Wellbeing Partnership

Report to	Lincolnshire Health and Wellbeing Board
Date:	5 December 2017
Subject:	East Lindsey Strategic Health and Wellbeing Partnership's Quality of Life Health and Wellbeing Strategy 2017-18

Summary:

This report considers a Health and Wellbeing Strategy for East Lindsey. This has been developed by East Lindsey's Health and Wellbeing Partnership, a group of organisations working together to improve the health and wellbeing of local residents. The core members are East Lindsey District Council (ELDC), Lincolnshire County Council (LCC) and Lincolnshire East Clinical Commissioning Group (LECCG). The Partnership aims to support delivery of the Lincolnshire Health and Wellbeing Strategy and contribute towards delivering their own corporate strategy ambitions. The Partnership aims, through this Strategy, to add value through collective activity on a small number of agreed priorities.

Actions Required:

The Board is requested to endorse East Lindsey's Quality of Life Health and Wellbeing Strategy 2017-18, noting that this will be refreshed in 2018 to align to Lincolnshire's Joint Health and Wellbeing Strategy priorities and timeframes for revision.

1. Background

- 1.1. East Lindsey's Health and Wellbeing Partnership was retained when Local Strategic Partnerships (LSPs) were de-commissioned. It was re-focussed in 2015 to consist of a smaller group of core partners, to develop a strategy and action plan. The Partnership meets every 2-3 months, convened and supported by LCC Public Health Division.
- 1.2. A wider partnership of public, voluntary and community agencies meets as the East Lindsey Quality of Life Group. This Group, also convened and supported by LCC's Public Health colleagues, meets quarterly to share information and promote better multi-agency working.

- 1.3. Most Lincolnshire District Councils have local health partnerships. North Kesteven District Council and Boston Borough Council have agreed locally-focussed strategies, which have been presented to Lincolnshire's Health and Wellbeing Board. Like these partnerships, East Lindsey's Health and Wellbeing Strategy aims to address the social determinants of health and wellbeing rather than 'medical' issues, taking note of but avoiding duplication with NHS strategy documents.
- 1.4. The East Lindsey Strategy draws on evidence from Public Health England's East Lindsey Health Profile 2017 published in July 2017 and Lincolnshire's Joint Strategic Needs Assessment published in June 2017.
- 1.5. The Strategy and its related action plan are intended to run for one year, so that they can, if necessary, be refreshed in 2018, to support delivery of Lincolnshire's Joint Health and Wellbeing Strategy and align to its timeframes for review.
- 1.6. The Strategy action plan includes both projects which will be monitored through meeting agreed milestones (e.g. setting up and delivering multi-agency workshops on planning and housing), and programmes which will be monitored by specific outcome measures (e.g. the number of people with disabilities in employment will be measured in the next census).
- 1.7. The Strategy is owned collectively by East Lindsey's Strategic Health and Wellbeing Partnership i.e. it is not a Strategy of the District Council in isolation. The Partnership is chaired by LCC Public Health Division.
- 1.8. East Lindsey District Council's Overview Committee (5 September) commented on the Strategy which was then supported by the Executive Board (27 September 2017). The Executive Board requested that the Strategy is promoted to those organisations who can contribute to this as it develops.
- 1.9. Lincolnshire East CCG's Governing Body considered the Strategy at its October meeting.

2. Conclusion

- 2.1 East Lindsey's Strategic Health and Wellbeing Partnership's Strategy aims to deliver a small number of locally-relevant activities. The Partnership aims to support the work of others, adding value to and extending their activity, rather than generating lots of new activity, especially where this requires extra resource. Being able to lever greater support for existing initiatives e.g. dementia awareness, is likely to generate long-term and more widespread returns. The Health and Wellbeing Board is asked to endorse the Strategy.

3. Consultation

Members of the East Lindsey Quality of Life Group have been actively involved in developing this Strategy. The District Council's Overview Committee has also had the opportunity to comment.

4. Appendices

These are listed below and attached at the back of the report	
Appendix A	East Lindsey Health and Wellbeing Partnership's Quality of Life Health and Wellbeing Strategy 2017-18

5. Background Papers

No background papers within Section 100D of the Local Government Act 1972 were used in the preparation of this report.

This report was written by Samantha Neal, Strategic Development Manager, ELDC and Vice Chair, East Lindsey Strategic Health and Wellbeing Partnership, who can be contacted on 01507 601111 or Samantha.neal@e-lindsey.gov.uk
