Wainfleet

Weed cutting was completed mid September to get the roots out of the middle of the river ready for dredging.

Steeping Steering Group Chair Robert Caudwell, centre, is with local councillors from the partnership, Joe Taylor and Wendy Bowkett, near Bycroft's Bridge at the start of the dredging.

This is a lagoon similar to those that have been constructed so the dredged material can settle – the water will run into nearby drains and silt eventually be mixed into the land.

Additional flood risk activity within the Catchment Action Plan includes reducing bank erosion through 'toe protection work' e.g. using coir rolls shown here.
